Dear Carp Anglers!

We had a busy season in 2016 with a lot of success and great results!

In the Spring, we opened the doors to the SBS headquarters for the customers who were curious about our state of the art production procedures and quality insurance system which have a key part in the premium quality of the SBS products.

We had great results in the National Carp Competition. After the 3 rounds of the competition the SBS SziKo team finished 3rd and the SBS Tizo Team won the competition for the second time consecutively. Thanks to this success, both teams will have the chance to represent Hungary next year in the World Championship, which will take place on the Deseda-reservoir.

We are represented across Europe already (almost in 20 countries). We have experienced field testers and experts in each country. We have developed together with them the brand new products for 2017 and these products have passed their tests in different situations. I would like to wish all carp anglers a Merry Christmas and a Happy New Year and don't forget that innovation will never stop!

Zoltan KOVACS
competition angler,
owner of SBS Tactical Baits

PREMIUM KRILL & HALIBUT

The premium products of SBS are the company flagships, which have had a proven track record for decades on numerous venues across Europe. This product range has outstanding flavours like the M1 or the ACE Lobworm. Because of this, the only flavours that have a chance to get into the range, must have similar, high quality ingredients and be capable of producing similar results as the aforementioned ones and as such, provide competition to them. For instance, the Krill & Halibut has not simply passed the test, but on several occasions – mainly in the summer - it has surpassed our expectations.

Products: Attractants, Dips, Hookbaits, Ready-Made Boilies, Pellets, Metod Mixes

from 3.10 €
to 15.90 €

PREMIUM M1 WHITE POP UPS

Based on our experience we can say without any doubt that the colour and the flavour of this bait have a significant impact on the feeding of the fish. Usually there is one matching color to each flavour, for example the M1 Pop Up baits were red up till now. . . The red color works very well, usually, but in several conditions (like dark - silty or peaty lakebed) the white is the most attractive colour. From now on, the M1 pop up boilies are available in white colour too, so we have another choice in terms of hookbaits to go after the carp!

Pack: 100 gr

Size: 10-14 mm, 16-20 mm

Flavour: M1

9.50 €

PREMIUM READY-MADE BOILIES 150gr

4.80 €

In line with the traditions of the company, year on year SBS devotes great energy into developing new products with outstanding quality. The number of new products included in the Premium Ready-made Boilie range usually increases by 1 or 2 per year, with only the best and never-failing recipes launched in this range. The 150 g tub of Premium boilies in size 20mm can be a great choice for all carp anglers who would like to try the various flavours first, before buying the 1 kg version.

Pack: 150 gr

Size: 20 mm

Flavours: Ace Lobworm, Bio Big Fish, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Phaze1

EUROSTAR KRILL & CHILI BOILIES

from 9.45 €
to 12.50 €

The Eurostar name is familiar to most carp anglers. There are not many of those who haven't heard of the Strawberry Jam or the Frankfurter Sausage baits which have been on the market for more than 30 years already. These baits are still successful and popular. The new product for 2017 is the Krill & Chili boilie, which is based on the proven spicy-fishmeal base mix. Based on results during the testing period we can say that this is definitely an all-season bait.

Pack: 1 kg

Size: 16 mm, 20 mm

Type: soluble or boiled

Flavour: Krill & Chili

SOLUBLE EUROSTAR BOMB PASTE

3.10 €

With the help of paste baits we can achieve instant success during our sessions, because of the fact that they dissolve quickly, they attract the fish to our hookbait instantly. This product offers great options for those anglers who like to try new things too. Because it is available in 300 g bags, you don't need to spend a fortune to start fishing with different flavours. From now on, this paste is also available in pineapple flavour, which is one of the most popular flavours of SBS and it could be successfully used both in the warm and the cold period.

Pack: 300 gr

Flavour: Pineapple

EUROCATCH READY-MADE BOILIES

9.45 €

New boilie range in the SBS line! With the Eurocatch boilies we have created attractive and easily digestible baits, which are an attractive food source to the carp during the entire year. The base mix of these baits contains valuable attractors and it is created with utmost care. The mix, combined with the proven flavours (Squid & Octopus, Frankfurter Sausage, Garlic, Strawberry Jam) ends up in a great result. Those anglers who like the "mixed" flavours are aware that, on many venues, the unusual flavours and new bait combinations can often bring success. In terms of the Eurocatch boilies we are sure that the Shrimp & Krill, and the Tuna & Pineapple flavours will become firm favourites with many anglers.

Pack: 1 kg

Size: 20 mm

Flavours: Frankfurter Sausage, Garlic, Shrimp & Krill, Squid & Octopus, Strawberry Jam, Tuna & Pineapple

EUROBASE READY-MADE BOILIES

6.20 €

SBS released the affordable Eurobase boilie range in Spring 2014, and since then it has become a favourite to numerous anglers across Europe. Up until now, five different flavours were made available in this range in 20 or 24 mm size in soluble or shelf-life version. This year we are adding Garlic flavoured boilies to this range which is made of the spicy base mix. Added to the facts that it is easily digestible and it is made with a premium quality flavor, this bait is special because it has a light white colour which, in the clear water of gravel pits, draws more attention to it from the carp.

Pack: 1 kg

Size: 20 mm, 24 mm

Type: soluble or boiled

Flavour: Garlic

PVA MESH SYSTEM

12.90 €

On numerous occasions, concentrated feeding has proven to be extremely important. This effect can be created very precisely with micro-woven PVA mesh (Polyvinyl alcohol: water-soluble synthetic polymer) when filled with boilies, pellets, or stick-mix and attached to the hook. The SBS PVA dissolves well, even in cold water and it has no tincture that could make our hookbait less effective. The PVA set is 5 m long and contains 25 mm diameter PVA mesh, a container, a plunger and a waterproof case.

Pack: 5 m

Diameter: 25 mm

PVA MESH REFILL

9.50 €

PVA mesh to match the PVA Mesh Set can be purchased separately too. The refill is 5 m long and it is 25 mm diameter. PVA is a crucial tool for all modern carp anglers, and most definitely when we want to create concentrated feeding around our hookbait.

Pack: 5 m

Diameter: 25 mm
