Welcome to

2

Welcome to SBS Tactical Baits.

SBS is a name familiar to the majority of Carp anglers throughout the world. For over 30 years the company has tested and improved upon its products, continuously enhancing the raw materials used. Owing to its high quality products and on-going developments SBS has become an important participant in the bait production market. During its years of operation the company has had different owners, but this has never effected SBS's development and steady growth. SBS Tactical Baits was purchased by a Hungarian group of companies managed by Zoltan Kovacs in 2008. As the most committed fan of SBS products since 2001, Zoltan then became the Hungarian distributor of SBS products in 2003. Thanks to the more recently developed baits, 2011 became the most successful year for the company to date and SBS continues to build upon that success.

SBS has a unique and world class website which provides much more information about the characteristics and use of the products than the usual anglers' sites. As part of this new trend, Zoltan has paid special attention to the match, feeder, and pole anglers; more and more products are launched specifically for these genres. The products presented in this catalogue are provided with detailed descriptions and as much information as possible. We truly hope that you will like the latest SBS Tactical Baits catalogue and, by using the information we have provided, you will find your way in the mysterious world of baits.

Dear Carp Anglers,

My name is Zoltan Kovacs and I am the manager of SBS Tactical Baits. I would like to assist you with some practical advice on our latest catalogue and I hope that it will contribute to the success of your fishing sessions. I would like to draw your attention to a few basic things in order to achieve the extraordinary catch results promised. SBS has a particularly wide range of products so the key to success is the correct choice of bait and its flavour.

I wish to help you make the best choice because I know from my own experience that it is not easy to choose from such a wide range of products. The product descriptions will help you to make the correct choices as they contain a lot of useful information. After you have made a decision, you will still face an important issue on the bait's flavour. Again, we have made this process easy for you, as seasonal recommendations are provided and the flavours are marked with icons. You will find three icons: spring – autumn, summer and all seasons; each flavour is classified in one of these categories.

With the help of the product descriptions and icons you can choose the most suitable bait with ease, almost a guarantee of success. By choosing the right bait you will be one step closer to experiencing

the outstanding catch rates of SBS products. Finally, I would like to say a few words to my angling friends who use match, feeder and pole fishing methods. Various SBS products have been highly popular in this genre for many years. Considering the needs, SBS has extended its range of various small baits, dips and attractors; the products available for these angling methods are marked with a separate icon in this catalogue.

Dear Anglers, I am pleased to announce that after a long testing period we are launching SBS Tackle Pro products including hooks, hooklink materials and other accessories that are essential for carp fishing

All of these products are of a quality standard that meets the traditionally high demand of the brand SBS. The idea to distribute these products goes way back. During competitions, we tried many rigs; I think that it's not an exaggeration to say that the various hooks, swivels, and clips showed us very different levels of quality.

On bigger international competitions, in tough situations, several times, we lost more fish than usual as a result of questionable quality and we have lost positions in the last phase of the contest. This was the main reason that quality and reliability became the key aspects during the construction process, so we could

successfully land more fish even under pressure in a competition. Do not hesitate, choose quality!

I trust that the information I have shared with you will help you to make the right choices and that the selected bait will compliment your angling skills and enhance your catch rate. Finally, keep in mind that it is not the most expensive equipment or the best bait that makes a good angler. It is the sportsmanlike behaviour towards fish. Carp are not the enemy, but worthy opponents who are to be respected and esteemed. Do not forget: Catch and Release.

Zoltan Kovacs

Competition angler and owner of
SBS Tactical Baits

Company profile

4

- 1981** SBS Baits International established.
- 2002** Des Taylor's Agency takes over the business from Martin Kowal, the previous owner of SBS.
- 2003** Zoltan Kovacs starts to distribute SBS products in Hungary.
- 2008** SBS Tactical Baits purchased from Des Taylor by a Hungarian group of companies managed by Zoltan Kovacs.
- 2010** New Corporate Design, Package Design, Website and Product Catalogue were launched.

- 2012**
 - SBS entered an agreement with Steve Howard (Editor of the World Carp Classic Magazine) as a consultant and angling journalist.
 - SBS websites available in 7 languages with standardized design.

- 2013**
 - SBS Tackle Pro established. Starting to distribute accessories for carp fishing.

SBS Competition Results and Records

- 2005**
 - SBS Szi-Ko Team (Andras Szigetfalvi - Zoltan Kovacs) - Gold Medal at the Big Carp Cup at Palotas, Hungary.

- The Romanian Sensor Carp Team had a world record catch with 1016.25 kg in 100 hours at the IV. International Boilie Cup at Maconka, Hungary.

2006

- Team SBS won the Team Event at the World Carp Classic at Lac de Madine, France.
- SBS Szi-Ko Team (Andras Szigetfalvi – Zoltan Kovacs) – Silver Medal at the Serbian Carp fishing Cup in Palić, Serbia.

2007

- The Polish National Record was beaten with a 30.2 kg Carp at Rainbow Lake, France. Bait: Frankfurter Sausage + Frankfurter Bait Dip.
- SBS Szi-Ko Team (Andras Szigetfalvi – Zoltan Kovacs) – World record result at Jaszkisér (Hungary) with 966 kg in 96 hours.
- SBS Szi-Ko Team (Andras Szigetfalvi – Zoltan Kovacs) – win at the VIII. International Boilie Cup at Maconka, Hungary.

2009

- Rob Hales had the biggest catch of the SBS history at Rainbow Lake, France with a 40.80 kg mirror carp. Bait: Premium Pop Up M1.
- SBS Szi-Ko Team (Andras Szigetfalvi – Zoltan Kovacs) – win at the XIII. International Boilie Cup at Maconka, Hungary.

2010

- The Romanian Tata-Nicu Carp Team won the XV. International Boilie Cup at Maconka, Hungary.
- SBS Szi-Ko Team (Andras Szigetfalvi – Zoltan Kovacs) won the I. International Boilie Cup at Mór, Hungary.

2011

- SBS Szi-Ko Team (Andras Szigetfalvi – Zoltan Kovacs) won the II. International Boilie Cup at Mór, Hungary with 1415 kg in 96 hours, which is a World Record.
- Zoltan Kovacs and Andras Szigetfalvi (Team Runner: Daniel Novak) won the biggest fish in section prize (section: Ultima) at the World Carp Classic at Lac de Madine with a massive 24.80 kg mirror carp. Bait: 20+ Premium Ace Lobworm.
- Imre Gyöngyösi, an official SBS Team member set new Hungarian National Record at Rainbow Lake with a 36.75 kg catch.

2012

- SBS-PB Product Team members, Arpad Szalay and Remus Lenghel made history at I. Székely-Ózetanya Boilie Cup, where they set a new world record with 1426 kg catch in 100 hours.
- SBS Szi-Ko Team (Andras Szigetfalvi - Zoltan Kovacs) earned 2nd place at IV. International Professional Boilie Cup at Maconka, Hungary. They had 24 Carp over 10 kg, which is a

new record in the history of the series. Bait: Flumino F-Code products and Premium C2 boilies.

- Des Taylor, an SBS consultant and well-known angling journalist beat his personal best at Rainbow Lake with a 34.08 kg mirror carp. Bait: 20+ Premium Phaze1.
- Team PVTV (Peter Micula, Nobert Pongracz, Team Runner: Zoltan Nemeti) sponsored by SBS won the event and became World Carp Classic Champions 2012 at Lake Bolsena, Italy. Bait: Flumino Groundbait Z-Code, Premium C1 Method Mix, Premium C1 boilies.
- Team SBS England (Steve Howard, Danny Ormiston, Team Runner: Sylvia Howard) won the PVTV Section at the World Carp Classic 2012 held at Lake Bolsena, Italy.
- Team SBS Switzerland (Milos Antic, Domenico Ungaro) earned the illustrious 9th place at the World Carp Classic 2012 held at Lake Bolsena, Italy.
- Laszlo Pamer set new Hungarian National Record at Rainbow Lake with a 37.90 kg catch. Bait: Premium Ace Lobworm Pop Up.

2014

- New record in the history of the Team SBS! Just in Hungary the SBS team members caught 26 carp over 20 kg in 2014. The team members caught 7 fish over 25 kg and the biggest fish of the year for 2014 was exactly 30 kg.

**TACTICAL

Successful Bait Stories

World Carp Classic Champions 2012

In 2012, Peter Micula, Norbert Pongracz and Zoltan Nemeti were winners of the World Carp Classic overall competition in Bolsena, Italy. We extend special thanks to them for using SBS products for the most prestigious and well-known carp fishing competition in the world. The team achieved this amazing result with the help of newly developed SBS baits. The creamy-tigernut flavoured baits with the name C1 (Competition 1) as part of the Premium range. They also used Premium C1 Method Mix, Flumino Groundbait Z-Code, Premium C1 boilies and Premium C1 Pop Ups. We recommend the C1 baits primarily at wild venues and also during spring and autumn periods.

PRODUCTS**

Világrekord fogás

On 20-24th June 2011, at the II International Carp Angling Competition in Mór, the SBS Szi-Ko Team set a new 96 hour world record with a catch of 1415.05 kg. The key to success was a method mix that had been in development for 10 months and the corresponding hook bait, which intensively increases the food intake of the fish. Since the world record catch this bait range has been named Flumino. Flumino Groundbait, Flumino Groundbait Mixer, Flumino Pop Ups and Flumino Liquid Concentrate belong to this range. SBS launched the best bait combination in one box to the market; the All In Flumino Box. Since these products were launched, anglers have been using them to great effect, winning competitions with the assistance of the Flumino products.

12

The real delightful moment of the World Record Catch, when the SBS Szi-Ko Team reached the one ton with this grass carp.

PRODUCTS**

Products for match, feeder and pole anglers

Many match, feeder and pole anglers are satisfied SBS customers. As more products are added they will be marked with an icon in our catalogue. These baits have been manufactured using the same high quality ingredients as other SBS products, with the main difference being the bait's size. Quality nutrient value, intensive flavour and outstanding feed inducing qualities characterize the SBS products offered to match, feeder and pole anglers.

14

This 40.80 kg Carp is a real record catch which is partially thanks to the M1 Pop-Up bait that Rob Hales used.

SBS Tackle Pro

New! Tackle Pro Products in the SBS Range.

At SBS we thought that it's time for us to come out with high quality hooks, hooklink materials and other accessories that are essential for carp fishing. The products in this range are of a quality that is high enough to be used with confidence even under competition conditions. As a result of testing we have managed to develop a product range from which everyone can choose the best for their needs, the proper hooklink material, the proper hooks, and other accessories that match the different fishing conditions. **In the future, we plan to expand the product range, but only with high quality products that meet the standards of the SBS brand.** If quality and reliability are the most important aspects of your carp rigs, then choose SBS Tackle Pro Products!

Challenger Hooklink

SBS Tackle Pro has created the SBS Challenger supersoft hooklink you can use to enhance the natural behaviour and movement of your hookbait. It is easy to tie and with the colouration of its material it is almost invisible in the water. A flossy and soft hooklink with high durability and unique sinking features, it sinks and lays flat on the lakebed easily without any additional weight but it lifts readily with the bait and the hook into the fish's mouth.

Length: 10 m
Breaking strain:
15 lb, 25 lb
Color: camou

Discovery Hooklink

SBS Tackle Pro has created the SBS Discovery supersoft, a round profile hooklink made of Dyneema material, to enhance the natural behaviour and movement of your hookbait. It is easy to tie and with its colouration it is almost invisible in the water. A flossy and soft hooklink with high durability and unique sinking features, it sinks and lays on the lakebed easily without any additional weight but it lifts readily with the bait and the hook into the fish's mouth.

Length: 10 m
Breaking strain:
15 lb, 25 lb
Color: brown

Bodyguard Coated Hooklink

SBS Bodyguard coated hooklink gives you the chance to create wide variety rigs and bait combinations. The coating protects the core of the hooklink even on a lakebed in extreme conditions. Because of its colour it is almost invisible in the water. The coating can be also stripped off easily and the hooklink sinks and lays on the lakebed easily. The colour of the coating and the soft, ultra fine braided filaments are the same, so it guarantees a complete camouflage.

Length: 10 m
Breaking strain:
15 lb, 25 lb
Color: brown, olive

Dive Master Leadcorefree Leader

SBS have put on the market an ultra sinking special thin leader, without a leadcore! The alternating tones of colour provide superb camouflage and its sinking feature matches that of ordinary leadcores. It follows the ground easily which helps with a perfect rig presentation under the water and is safe to use on any kind of lakebed even in extreme conditions. Thanks to the extraordinary manufacturing process we can be sure that this leader protects the fish during a play, even if it hitches onto the fin during a landing. Easy to make and extremely abrasion-resistant.

Length: 10 m
Breaking strain:
20 lb, 45 lb
Color: darkbrown-silt-gravel

Gravity Leadcore

SBS Gravity Leadcore is a newly developed product tested by SBS consultants and official Team members. Thanks to the special coated material it can be used on any kind of lakebed and because of the colouration it is almost invisible on the lakebed. It has a custom prepared lead wire inside, therefore its sinking capability is supreme and it pins down the rig easily on the lakebed. The extraordinary textile coating always protects the fish during a play, even if it hitches onto a fin during the landing. Easy to make and extremely abrasion-resistant.

Length: 7 m

Breaking strain:

45 lb

Color: silt

Masterpiece monofilament line

Thanks to the brand new manufacturing technology, SBS Tackle Pro Masterpiece mono mainlines are formulated with co-polymer materials. It has unbelievable knot strength quality, low memory, consistently strong and reliable with high tensile strength. The innovative, special outer layer protects the line from UV radiation and it also has great features for long casts.

Colors:

fluo-yellow or black

Diameter, Breaking strain, Length:

0.20 mm (3.5 kg) - 1500 m, 0.24

mm (4.5 kg) - 1750 m, 0.27 mm (6

kg) - 1525 m, 0.30 mm (7 kg) - 1240

m, 0.35 mm (9 kg) - 920 m, 0.40 mm

(11.4 kg) - 670 m.

Masterpiece Tapered Mono Leaders

5 pieces of 15 meter mono leader lines per pack for long casts, tapering from 0.58 mm to 0.26 mm. Made of high quality copolymer with low memory. Supple with good elasticity, fast-sinking, lays very flat on the bottom. Improved casting results with this product; let's give it a try! (The pack includes 5 pieces of 15 meter mono leader lines!)

Length: 5 * 15 meter per pack
Color: waterclear
Available size: 0.26-0.58 mm
Breaking strain: 4-16 kg

Grip-Tip Hooks

The SBS Tackle Pro Grip-Tip hook comes with a classic form and thin material. But this should not deceive anybody. The claw shape gives a strong hook hold. It comes in dark grey color with a non-reflective coating.

Available size: 2, 4, 6, 8
Pack:
10 pc/pack
Color: dark grey

Enigma Hooks

The Enigma hooks from SBS Tackle Pro are designed to be used when fishing near snags. This extra strong hook is not going to let you down even in the most difficult situations.

Available size: 4, 6
Pack:
10 pc/pack
Color: dark grey

Enforcer Hooks

The SBS Tackle Pro Enforcer hook is a reliable hook for the tough venues with snags. The anti-eject shape makes this hook perfect for all situations where fast hooking and tough play of the fish is necessary. The SBS HT Hook comes in grey (non-reflecting in water) color.

Available size: 4, 6
Pack:
10 pc/pack
Color: dark grey

Rolling Swivel

One of the most important elements of the business end is the rolling swivel - that is why it must be reliable. The SBS Tackle Pro Rolling Swivel is available in one size only, designed to fit all SBS systems and accessories. Most of the rigs contain at least one of these swivels. The eye of the swivel is circular, the body barrel-shaped and it comes in black.

Available size: 8
Pack:
10 pc/pack
Color: black

Quick Change Swivel

The SBS Tackle Pro Quick Change Swivel is a quick-link with an integrated swivel designed for speedy rig changes. The swivel has one normal and one open-hook shaped eye. A loop formed in the end of the rig material is fixed into position on the open eye by the elastic fixing case.

Available size: 8
Pack:
10 pc/pack
Color: black

Ring Swivel

The SBS Tackle Pro Ring Swivel is a normal swivel with an extra, integrated and free moving ring. The extra ring creates a hinge, which allows free movement of stiff rigs. This makes bait presentation more efficient and natural.

Available size: 8
Pack:
10 pc/pack
Color: black

Heli-Chod Swivel

The size 8 swivel of the SBS Tackle Pro Heli-Chod Swivel (Helicopter and Chod speed swivel) allows us to change the rig quickly to adapt to changing conditions. It comes with a big eye. We recommend mainly using this swivel with helicopter or chod rigs. The usage of an anti-tangle sleeve is always recommended with this swivel because the rubber ensures that the end loop of the rig does not slide out of the swivel. It fits perfectly with safety lead systems. Because of the standard 8 size it fits products from other manufacturers (leads, rig accessories, etc.).

Available size: 8
Pack:
10 pc/pack
Color: black

TACKLE PRO

ENIGMA HOOKS

SIZE 4 / QTY 10

Big Eye Swivel

Size 8, strong swivel, one eye is significantly bigger which gives extra movement to the rig, best for use with a helicopter or chod rig.

Rubber Bead

The package contains 10 hollow rubber beads which can be used in many different ways. During casting there is a lot of strain on the swivel, but you can reduce this by using SBS Tackle Pro rubber beads. Furthermore SBS Tackle Pro rubber beads are very efficient because they have a tapered bore and as a result they can be attached to anti-tangle tubes too.

Knot Protector Bead

The package contains 10 hollow rubber knot protector beads which can be used in many different ways. During casting there is a lot of strain on the swivel, but you can reduce this by using SBS Tackle Pro rubber knot protector beads.

Buffer Hood

The SBS Tackle Pro Buffer Hood is a rubber sleeve, made from top quality material. The partly stiff and subtle rubber accessory can be set up quickly and holds safely. Thanks to the special material it does not become inflexible even in cold water. Due to the universal design it fits perfectly. It can be used with some inline leads too.

Available size: 8

Pack:

10 pc/pack

Color: black

Pack:

10 pc/pack

Available size: 8

Pack:

10 pc/pack

Color: green

Pack:

4 pc/pack

Color: green

Quick Link

The SBS Tackle Pro Quick Link is a very strong link which has a multitude of uses. It allows the easy attachment of the lead to the line but it can also be used on the rig. It also allows the quick change of the lead or the rig.

Pack:
10 pc/pack
Color: black

Rig Ring

These rig rings are made with a thin Teflon coating which provides free movement to the ring which is in turn transferred to the bait.

Available size: 3 mm, 3.7 mm
Pack:
10 pc/pack
Color: black

Line Aligners

It is very easy to use the SBS Tackle Pro Line Aligners. It just has to be threaded onto the shank of the hook through the hook length material. Steam is not necessary here, because it is not like the shrink tube. The SBS Tackle Pro Line Aligners helps to set the perfect angle of the hook on the rig, ensuring a strong hook hold.

Pack:
7 pc/pack
Color: green

Anti Tangle Sleeves

SBS Tackle Pro Anti Tangle Sleeves have been designed to fit swivel eyes, reduce tangles and pushing the hooklink away from the lead when casting.

Pack:
15 pc/pack
Color: green

Heli-Chod System

The SBS Tackle Pro Heli-Chod Buffer set is designed for making chod or helicopter rigs. It contains 4 silicone pods and 8 beads. The SBS Tackle Pro Heli-Chod Buffer set is unique because thanks to the material it will not slide on the line but you can pull it into the proper position by hand.

Pack:
4 pc/pack
Color: green

Safety lead clip kit

With the SBS Tackle Pro Safety Lead Clip it is easy to set up safe lead clip systems. If the lead becomes snagged, the clip will then release it so that you can continue playing the fish. If there is a line cut, fish will not then be left carrying the lead. Changing of the lead is fast and easy!

Pack:
6 pc/pack
Color: green

Boilie Needle

This baiting needle, complete with a safety clip, is made of durable material and designed for harder baits such as 20+ Premium boilies. The yellow-black coloured handle with SBS logo is comfortable, non-slip and if dropped on the bankside it can be easily found.

Pack:
1 pc/pack

20+ Boilie Needle

This baiting needle, complete with a safety clip, is made of durable material and designed for harder baits such as 20+ Premium boilies. The yellow-black coloured handle with SBS logo is comfortable, non-slip and if dropped on the bankside it can be easily found.

Pack:
1 pc/pack

Fine Baiting Needle

Fine Baiting Needle is specifically for small hookbaits. The thin stainless steel needle with a sharp pointed tip easily goes through tiny baits. The yellow-black coloured handle with SBS logo is comfortable, non-slip, it can be easily found if dropped on the bankside.

Pack:
1 pc/pack

Heavy Baiting Needle

Heavy Baiting Needle is ideal for use with hard boilies or particles such as tiger nuts. The thick and strong stainless steel needle with a sharp pointed tip easily goes through hard hookbaits. The yellow-black coloured handle with SBS logo is comfortable, non-slip, it can be easily found if dropped on the bankside.

Pack:
1 pc/pack

PVA Stick Needle

This is a baiting needle, made of durable material. With this needle it is easy to thread multiple baits at the same time, like boilies or pellets even onto PVA tape. With the help of this tool you can dip the bait even in bigger bottles.

Pack:
1 pc/pack

Leadcore Splicing Needle

This is a thin needle for splicing leadcore. It can be used also as a baiting needle for small and soft baits. The yellow-black coloured handle with SBS logo is comfortable, non-slip and if dropped on the bankside it can be easily found.

Pack:
1 pc/pack

Baiting Needle Set

A triple needle set that includes a Boilie Needle, a Fine Baiting Needle and a Heavy Baiting Needle to cover all baiting options. The ergonomic handle of this Boilie Needle provides a good grip to enable easy threading of bait onto the hair. At the end of the needle there is a safety clip. Fine Baiting Needle is specifically for small hookbaits. The thin stainless steel needle with a sharp pointed tip easily goes through tiny baits. Heavy Baiting Needle is ideal for use with hard boilies or particles such as tiger nuts. The thick and strong stainless steel needle with a sharp pointed tip easily goes through hard hookbaits. The yellow-black coloured handle with SBS logo is comfortable, non-slip, it can be easily found if dropped on the bankside.

Pack:

Incl. a Boilie Needle, a Fine Baiting Needle and a Heavy Baiting Needle.

SBS Braid Scissors

Sharp and strong, corrosion resistant stainless steel SBS Braid Scissors are designed for cutting with a single cut, braided, mono, fluorocarbon lines or heavier leaders with its serrated cutting edge. Soft, yellow grips give a comfortable, secure hold and they are easy to use for both right and left handed anglers.

Pack:

1 pc/pack

New!

PVA mesh system

On numerous occasions, concentrated feeding has proven to be extremely important. This effect can be created very precisely with micro-woven PVA mesh (Polyvinyl alcohol: water-soluble synthetic polymer) when filled with boilies, pellets, or stick-mix and attached to the hook. The SBS PVA dissolves well, even in cold water and it has no tincture that could make our hookbait less effective. The PVA set is 5 m long and contains 25 mm diameter PVA mesh, a container, a plunger and a waterproof case.

Pack: 5 m

Diameter: 25 mm

New!

PVA mesh refill

PVA mesh to match the PVA Mesh Set can be purchased separately too. The refill is 5 m long and it is 25 mm diameter. PVA is a crucial tool for all modern carp anglers, and most definitely when we want to create concentrated feeding around our hookbait.

Pack: 5 m

Diameter: 25 mm

Flumino Products

**TACTICAL
BAIT
PRODUCTS**

The first Flumino products were created in 2011. **Since the world record result of the SBS Szi-Ko Team - achieved with Flumino baits - more and more products were released in this range.** The reason behind this is the increased interest of customers in these products, which shows that it is not only us that are using them with outstanding results. Because of the larger number of products, the Flumino Products will become a separate product range from now on. It will be easier for customers to see the products and choose the ideal one for the next session. Flumino Products were developed with the aim of instant success; they can be used not only in competitions, but also for one day sessions. **We would like to draw your attention to the new, ready-made Flumino boilie.** It has a great price and it is available in a soluble version too.

FLUMINO READY-MADE BOILIES

Flumino Ready-Made Boilies

Do you want to use a very effective, but affordable bait? If yes, then try the newest product in the Flumino range. The Flumino boilie will be a favourite of many carp anglers, because it is based on the proven Flumino Ground bait that has an outstanding track record. We recommend that the cooked version of the Flumino boilie be used on well stocked waters. **It is important to note that you can have instant success with this boilie, but it is also possible that the fish will tire of it after a while. The Flumino ready-made is unbeatable bait for the one day sessions. If you want to have instant success, then choose Flumino products!**

Pack: 1 kg
Available size: 20 mm
Flavours:
Pineapple 🍍, Squid & Octopus 🐙

SOLUBLE FLUMINO READY-MADE BOILIES

Soluble Flumino Ready-Made Boilies

The Soluble version of the Flumino boilie. With this bait, the carp will find the feed even faster. **Do you want to use a very effective, but affordable bait? If yes, then try the newest product in the Flumino range.** The Flumino boilie will be a favourite of many carp anglers, because it is based on the proven Flumino Ground bait that has an outstanding track record. We recommend that the soluble version of the Flumino boilie is used on well stocked waters. **It is important to note that you can have instant success with this soluble boilie, but it is also possible that the fish will tire of it after a while. The Soluble Flumino ready-made is unbeatable bait for the one day sessions. If you want to have instant success, then choose Flumino products!**

All In Flumino Box

Would you like to try a World-Record breaking bait? If yes, you now have the chance. Zoltán Kovács and the SBS Szi-Ko Team caught 1415.04 kg at the 2nd International Carp Angling Cup in Mór, thanks to this bait combination. The box contains a complete selection. In the package you will find 1 kg Flumino Groundbait, 500 ml Flumino Groundbait Mixer liquid, 2 packets of 10 mm Fluro Pop Up hook bait (not the same as the separately available Fluro Pop Up bait, this is more buoyant) and 2 sachets of 2 ml Concentrated Flavours. It is important to note that we achieved the outstanding results during the testing period by using all baits from the box at the same time. The other important experience is that it is not always easy to find the right combination of flavours, but after finding it, you can catch fish within an unbelievably short time. The product to use will be determined by the flavour of the 500 ml liquid, there are 2 for cold and 2 for warm water available. The other baits in the pack are the same. Preparing the feeding material is very simple. Mix 1 kg groundbait powder with 500 ml liquid. This way you will create feeding balls of a perfect consistency, which can be used in the feeder, the method lead or PVA-mesh. After that string the Pop Up baits flavoured with pineapple or squid and octopus on the hair rig, then add 1–2 drops from the 2 ml aroma of the same flavour. If one of the hook baits does not work for any reason, do not waste your time, use the other flavour, there are Pop Up baits with two flavours in the package. All the baits in the box have common characteristics; they all strongly stimulate the feeding response of the fish. Using the baits together, you can experience the effect more intensively. If you want to achieve a World Record catch, choose the All In Flumino Box!

Would you like to try a World Record breaking bait? If yes, you have the chance now. Zoltán Kovács and the SBS Szi-Ko Team caught 1415.04 kg at the 2nd International Carp Angling Cup in Mór, thanks to this bait combination. The box contains a complete selection. In the package, you will find 1 kg Flumino Groundbait, 500 ml Flumino Groundbait Mixer liquid, 2 sachets of 16 mm Flumino Pop Up hook bait with extra aromas added. The package is almost the same as the All In Flumino Box, the only differences being that it contains soluble hook bait and that there are no Concentrated Flavours. It is important to note that we achieved the outstanding results during the testing period by using all baits from the box at the same time. The other important experience is that it is not always easy to find the right combination of flavours, but after finding it, you can catch fish within an unbelievably short time. The product to use will be determined by the flavour of the 500 ml liquid, there are 2 for cold and 2 for warm water available. The other baits in the pack are the same. Making the feeding material is very simple. Mix 1 kg groundbait powder with 500 ml liquid. This way you will create feeding balls of a perfect consistency, which can be used in the feeder, the method lead or the PVA-mesh. After that string the Pop Up baits flavoured with pineapple or squid and octopus on the hair rig, then drop 1–2 drops from the 2 ml aroma of the same flavour. If one of the hook baits does not work for any reason, do not waste your time, use the other flavour, there are Pop Up baits with two flavours in the package. All the baits in the box have common characteristics; they all strongly stimulate the feeding response of the fish. Using the baits together, you can experience the effect more intensively. If you want to achieve a World Record catch, choose the All In Flumino Box!

FLUMINO
GROUNDBAIT

TACTICAL
BAIT
PRODUCTS

Flumino Groundbait

The products of the All In Flumino Box are also available separately for every carp angler. This groundbait contains extremely attractive ingredients, which can achieve fast results. It is the same as the groundbait in the All In Flumino Box. As soon as the groundbait hits the water, it comes off the feeder or method lead creating a huge cloud within a very short time, stimulating fish to feed. We recommend mixing the feeding material with the Flumino Groundbaits Mixer. Using the liquid with the option of four flavours we can adapt better to the situation confronting us. After that, we can make the feeding material even more attractive with a liquid concentrate. The Flumino Liquid Concentrate, a greenish coloured, and highly fluorescent, high amino-containing additive only requires a few drops on the feeding ball in the feeder or on the PVA. Flumino Groundbait is perfect for grass carp angling... We caught a lot of grass carp with the combination of Flumino Pop Up with pineapple flavour. If you want to achieve really quick results, choose the Flumino products!

Flumino Pop Ups

This product is the same as the bait found in the All In Flumino Box, and like other Flumino products, can be bought separately. It will be launched in the two flavours, Pineapple and Squid & Octopus that were used when setting the world record. This bait is not the same as the Fluro Pop Up baits, Flumino Pop Ups have greater buoyancy and a harder consistency so it can withstand increased stress better. There are three sizes in the box, this way you can adjust the bait to the size of the hook. We recommend using this not only with Flumino products, but with any kind of Method Mix or Groundbait. If you want to have instant success, choose Flumino products!

Pack: 100 g

Available size: 10, 12, 14 mm mixed in the box

Flavours:

Squid & Octopus 🐙🐙, Pineapple 🍍🍍

Recommended groundbaits: Flumino Groundbait, Eurostar Groundbait, Premium Method Mix

World Record Bait. More details on Page # 10-11

Soluble Flumino Pop Ups

This product is the same as the soluble bait found in the All In Flumino Box, and like other Flumino products, can also be bought separately. It will be launched in the two flavours, Pineapple and Squid & Octopus that were used when setting up the world record. This bait is very interesting, because as well as the soluble characteristic and vibrant colour an extra quantity of aroma has been added. These three characteristics make it extremely effective. You can be more successful with this product than with a normal Pop Up bait on waters where there is an abundance of fish. The package contains 16 mm bait. We recommend using this not only with Flumino products, but with any kind of Method Mix or Groundbait. If you want to have instant success, choose Flumino products!

Pack: 100 g

Available size: 16 mm

Flavours:

Squid & Octopus 🐙🐙, Pineapple 🍍🍍

Recommended groundbaits: Flumino Groundbait, Eurostar Groundbait, Premium Method Mix

All In Flumino Box F-Code

As a result of the success of the Flumino range and requests from anglers, we have developed a new product. The Groundbait contains high minentage of top quality fishmeal, hence the name F-Code. This feature adds a new dimension to the traditional Flumino Groundbait. All In Flumino Box F-Code contains a complete selection, 1 kg Flumino Groundbait F-Code which contains several kinds of fishmeal, 500 ml Flumino Groundbait Mixer liquid, 2 sachets of 10 mm Flumino Pop Up F-Code hook bait (bright orange coloured Cranberry and black coloured Black Squid) and 2 packs of 2 ml Concentrated Flavours. The product to use will be determined by the flavour of the 500 ml liquid; there are two flavours available: Liver or Undercover. The colour of the Groundbait is dark brown. If you do not want to highlight your hookbait from your feeding area, we recommend using the dark coloured Pop Up, but if you would like to emphasize it you can use the bright orange fluro Pop Up. The results of the F-Code speaks for itself: in a 48 hours competition Team SBS set a record and caught 410.66 kg of carp, also a remarkable result at the European Cup, the Team had 24 carp over 10 kg to set a new record in the tournament. If you want to have instant success, choose Flumino products!

All In Flumino Box Z-Code

This product was developed as the result of the continual innovation of the SBS Flumino range. Maybe you have experienced times when your favourite bait or trick did not give you the edge to catch carp. Often the reason is that during this time carp are not feeding on the lakebed but in mid-water. The products included in the All In Flumino Box Z-Code give you a good chance of solving this problem. Name Z-Code refers to Zig-Rig, which is a method of presenting the bait in the upper water levels. All In Flumino Box Z-Code contains a complete selection, 1 kg Flumino Groundbait Z-Code, 500 ml Flumino Groundbait Mixer liquid, 2 sachets of 14 mm Flumino Pop Up hook bait (yellow coloured Pineapple and black coloured Black Squid) and 2 packs of 2 ml Concentrated Flavours. The Groundbait Z-Code contains special ingredients. Thanks to the bright and fluoro coloured particles and the lifting pellets with high protein content, it works in the whole water column. As soon as the groundbait hits the water, it creates a huge cloud within a very short time, stimulating fish to feed. If you would like to put the Groundbait in the feeder or method lead, mix the 1 kg Groundbait Z-Code with 500 ml Groundbait Mixer liquid. If you plan to use a spomb or a spod, we recommend adding 500 ml extra lake water to the mix to get a soft consistency. During the testing period this bait combination performed extremely well. The WCC 2012 winners in Bolsena sponsored by SBS used the Z-Code because of the weedy area underwater.

Flumino Groundbait Mixer

The contents of the World Record All In Flumino Box can be bought separately. The Flumino Groundbait Mixer liquid will be launched in four flavours, two are recommended for cold waters, two for summer angling. This product was developed for the groundbaits available in the All In Flumino Box; these products form a fantastic pairing. The 500 ml liquid is enough for mixing exactly 1 kg Flumino Groundbait. The overall impact of the mixed groundbait can be further enhanced with the Flumino Liquid Concentrate attractor. Only a few drops of this fluorescent, high amino content liquid concentrate are required on the groundbait, in the feeder, or on the PVA mesh. If you want to have instant success, choose Flumino products!

Pack: 1 L

Flavours:

N-Butyric, Pineapple, Match Special, Cranberry, Liver, Undercover

Dosage: 500 ml / 1 kg Flumino Groundbait

Recommended groundbaits: Flumino Groundbait

**TACTICAL
BAIT
PRODUCTS**

Flumino Liquid Concentrate

Perhaps the most important member of the Flumino range, a fluorescent, high amino content liquid concentrate. Two liquids with different characteristics will be launched, horizontal – spreading out on the bottom of the lake and vertical – working through the entire water column. The horizontal is recommended for base feeding, it should be added in drops directly onto the groundbait. With the vertical the best results are achieved by adding it onto the PVA mesh or the method lead. If the fish are in mid water, they can be attracted to the bottom by adding vertical liquid onto the PVA mesh. It is important to mention that the liquid is much less effective when adding to the bait than using the aforementioned methods. If you want to have instant success, choose Flumino products!

Pack: 20 ml

Pack:

Horizontal (spreads on the bottom of the water);

Vertical (works vertically, at the full height of the water column)

Dosage:

Some drops on the feed or the PVA mesh

Flavour:

Natural 🍷🍷

Ready-Made Boilies and Pastes

SBS has more than 30 years experience in testing raw materials used for boilies and the creation of finished products. For the development of products, advice of anglers throughout Europe has been gathered. The accumulated information and decades of experience provide only the best recipes being launched on the market. – Many of which are based on the recommendations of test anglers.

SBS offer a wide range of ready-made boilies manufactured with the highest quality raw materials, such as the reasonably priced Eurostar line and our top quality Premium Boilie range containing added vitamins, minerals and taste enhancers. In addition to the existing Longlife and Soluble versions a series under the name 'Boilies' has been marketed, available only on request. Boilies are produced using new manufacturing technologies. These products do not contain any additives to facilitate long-term storage and they come in flavour sealing packaging. The Bio series is not available in stores and shops and can be obtained exclusively by order. SBS champions constant innovation and development, first on the market following a long preparatory period they have recently released the soluble boilie. The soluble boilie, SBS's own development, has gained extraordinary popularity in a very short period of time. As a result, every flavour of the Eurostar and Premium product line will also be available in a soluble version. This extraordinary bait is made without cooking, simply by adding Gold Treasure liquid to the mix. It has proved much more effective in many waters compared to conventional boilies because, due to the skipping of the cooking process, many valuable components remain in the boilies. SBS has a very wide range of ready-made boilies meaning that anglers opting for SBS will find the ideal and effective fishing bait for any given situation. We want to help anglers to make the best choice possible by recommending flavours for the different seasons.

BAIT
PRODUCTS

EuroBase Ready-Made Boilies

Quality at an affordable price. We know that many carp anglers were waiting for SBS to come out with a more affordable product. The question that many people asked, was, how can the price be so low without lowering the quality? The answer is simple: experimentation, product development and continual testing. It is true that the most expensive additives that are often used by SBS are missing from the ingredients, but we have managed to develop a product that is easily digestible for carp and can successfully be used on longer sessions. **It is important to note that the flavours are the same in these baits as the ones used in the more expensive products.** We recommend that this bait is used away from competitive fishing and in situations where it is reasonable to feed a larger quantity. This bait fits the big waters, the well-stocked reservoirs, the rivers and all other kinds of water. **If you go on a longer session or to big natural water, then take EuroBase Ready-Made boilies!**

Pack: 1 kg
Available size: 20 and 24 mm
Flavours:

EUROCATCH READY-MADE BOILIES

New!

Eurocatch Ready-Made Boilies

New boilie range in the SBS line! With the Eurocatch boilies we have created attractive and easily digestible baits, which are an attractive food source to the carp during the entire year. The base mix of these baits contains valuable attractors and it is created with utmost care. The mix, combined with the proven flavours (Squid & Octopus, Frankfurter Sausage, Garlic, Strawberry Jam) ends up in a great result. Those anglers who like the "mixed" flavours are aware that, on many venues, the unusual flavours and new bait combinations can often bring success. In terms of the Eurocatch boilies we are sure that the Shrimp & Krill, and the Tuna & Pineapple flavours will become firm favourites with many anglers.

Pack: 1 kg Available size: 20 mm

FREEZER
EUROSTAR
READY-MADE BOILIES

Freezer Eurostar Boilies

Attention: This product is only available by order! Thanks to a revolutionary innovation SBS guarantees the freshest boilies on the bait market made with fresh eggs. An important advantage of this product range is that it does not contain any additives to aid long-term storage (preservatives which reduce its effectiveness) and it is packed in flavour sealing bags. These cooked boilies are an ideal selection for silver and small-bodied fish, and work best in waters where it is usual to wait several hours between catches. These boilies are even more effective than home-made boilies as they are made using the best factory recipes with the company's finest available, unique ingredients. The popular Eurostar series can be ordered in a choice of 9 flavours or in any custom flavouring. If the unopened product is not to be used within 2 weeks it must be put in the freezer where its freshness is guaranteed for several months without losing its effectiveness.

Pack: 1 kg

Available size: 16 and 20 mm

Flavours:

Strawberry Jam 🍓🍷, Sweet Plum 🍷🍓, Squid & Octopus 🍷🐙,
Squid Octopus & Strawberry 🐙🍷, Frankfurter Sausage 🍷🌭, Shellfish 🍷🐚,
Cranberry & Black Caviar 🍷🐟, Green Crab 🍷🦀, Garlic 🍷🧄, Belachan 🍷🌶️

Our factory will make your favourite custom boilies from SBS raw materials. Orders can be placed through your national distributor.

SOLUBLE HIGH POWER
EUROSTAR
READY-MADE BOILIES

**New
flavour:
Krill &
Chili**

Soluble Eurostar Ready-Made Boilies

Based on the recipe of the Ready-Made Eurostar Boilies, SBS has developed a soluble version made without eggs. Its composition is identical to that of the boiled version but eggs are replaced with Gold Treasure liquid. There is one huge difference between the two boilies, however, soluble boilies are made without cooking, and thus all the valuable nutrients remain. As a result, a nutrient rich cloud develops around the bait which will lure Carp that are not even hungry, encouraging them to feed. Soluble boilies are recommended for use in waters with above average Carp stock, because the bait will dissolve off the hair rig within 2 to 6 hours, depending on the temperature of the water. Attention: It is important to store soluble boilies appropriately, keeping them from moisture and humidity. Failing to do so may induce the dissolving process.

Pack: 1 and 5 kg

Available size: 20 mm

Premium Ready-Made Boilies

In line with the traditions of the company, year on year SBS devotes great energy into developing new products with outstanding quality. The number of new products included in the Premium Ready-made Boilie range usually increases by 1 or 2 per year, with only the best and never-failing recipes launched in this range. You will find among them the Bio Big Fish and the Ace Lobworm Ready-made, which have been enormously popular in England for years. Bio Big Fish and the Ace Lobworm became the number one bait for German and British Carp anglers. The M (Monument) and AV (Avenue) series belong to this product range as well. Everyone has heard of the fantastic success of the M1 boilies. In May 2009, M1 boilies was the bait used by Rob Hales when he broke his previous record at Rainbow Lake with a fantastic Mirror Carp weighing 40.8 kg. **The Romanian Team (members: Micula-Pongracz-Nemeti) won the World Carp Classic 2012 in Bolsena with C1 products.**

20+ Premium Ready-Made Boilies

SBS developed the 20+ series with the intention of meeting the needs of fanatic big carp hunters. SBS tested the bait in 2011 at the World Carp Classic and also at Rainbow Lake in France. The bait achieved outstanding results. At the WCC the SBS Szi-Ko Team won the biggest fish in section prize with a mirror carp of 24.81 kg (Ace Lobworm flavour) and ended up in the prestigious 7th place out of 130 teams. Soon after this, at Rainbow Lake, László Pámer - angling with Zoltán Kovács - was successful in catching a 34.20 kg mirror carp (M1 flavoured). The name 20+ refers to 3 important characteristics of the product. First, it suggests the possibility of catching specifically big Carp over 20 kg. Second, it refers to the size of the bait; it will be launched with the diameters of 20, 24 and 30 mm. Third, we would like to emphasize its durability, thanks to a special additive it is guaranteed to last up to 20 hours in the water even with a large silver fish population, during the testing period the bait stayed on the hair rig for over 72 hours. The bait is based on the high-quality Premium series but it stays longer on the hair rig longer than the normal Premium Boilies. It has to be stressed that the durability has been achieved without compromising the ingredients that stimulate feeding in the fish with a continuous and long lasting effect. Those who are familiar with really big Carp angling know that as well as quality, baits with proper consistency and resistance to the continuous attack of silver fish are essential. If you angle in natural waters with a poorer fish population, or your goal is to stalk really big Carp, the 20+ Premium Boilie is your best choice. **The Romanian Team (members: Micula-Pongracz-Nemeti) won the World Carp Classic 2012 in Bolsena with C1 products.**

Freezer Premium Boilies

Premium boilies are the top of the range product of SBS. All of the Premium Boilies are available in the Bio line as well. These boilies are manufactured to order because their shelf life is only two weeks without freezing. What are the advantages of the new product compared with traditional boilies? Their freshness and sealed-in flavour is certainly a benefit, added to this they are made without any preservatives (additives used to extend storage period but reduce effectiveness). They come in aroma sealing packaging. These cooked boilies are suited to silver and small bodied fish and they are the best baits to use on waters where it is not unusual to wait several hours between catches. It is the ideal choice when you want to catch big fish as it can be ordered in 24 mm size as well. These baits are more effective than home-made boilies because they are manufactured using the best factory recipes and contain the company's finest available, unique ingredients. Currently the parent company guarantees the freshness of the Bio Premium Ready-Made boilies for up to 2 weeks. If the boilies are not used within the 2 weeks, they must be put in the freezer where their freshness is guaranteed for several months without losing their effectiveness.

Soluble Premium Ready-Made Boilies

The whole SBS Premium range is also available in soluble versions. Soluble Premium Boilies contain many attractants making them the perfect bait to achieve fantastic results. The soluble boilies are made using exactly the same ingredients as the cooked ones; the only difference is skipping the boiling process, which is compensated by adding Gold Treasure liquid. Soluble boilies differ in two ways from their cooked alternatives: the first significant difference is the impact it has on fish. Once coming into contact with water they instantly start to release small particles which form a flavour and aroma-rich cloud around the bait arousing the interest and stimulating the feeding instinct of fish in the area. Thanks to these properties it is very effective on waters where fish are in abundance. The second important difference is that they will dissolve off the hair rig in considerably less time than cooked boilies, so in waters where the quantity of silver fish is considerably more than Carp it is better to use traditional boilies. Attention: It is important to store soluble boilies appropriately, keeping them from moisture and humidity. Failing to do so may induce the dissolving process. **The Romanian Team (members: Micula-Pongracz-Nemeti) won the World Carp Classic 2012 in Bolsena with C1 products.**

Quest Base Mix

These mixes are the premium category base mixes from SBS and the company is rightly proud in terms of their popularity and effectiveness. Quest Base mixes are the most complex products, loaded with top quality ingredients. They include the M and AV Series, Ace Lobworm, All Season Corn, Fruit & Nut and new in 2009 the Bio Big Fish line. Based on the excellent results achieved in recent years we can proudly recommend any of the Quest Base Mixes for those who want to make top quality boilies from the best SBS mixes. The Quest range offers an excellent bait armoury for all seasons, taking in consideration the seasonal recommendations of course. We are certain that the Bio Big Fish that debuted recently and produced fantastic test results will be a big hit and the most productive bait during the summer. Any product of the Quest mix range can be made into an uncooked soluble boilie by adding Gold Treasure liquid.

Soluble Premium Bomb Paste

The new Soluble Premium Range released in 2010 also includes a paste which can be wrapped around the lead. The Bomb Paste is available in the flavour range of the Premium series and it is of the same consistency as the Soluble Premium Paste.

It can be offered wrapped around the lead or on the method feeder. You can create a very effective flavour and aroma rich haze around the hook bait to attract Carp. Fantastic results can be achieved with this soluble paste in waters with above average Carp stock. It also works well when everything else fails as its composition is nearly equal that of the Premium Boilies, making it irresistible even to fish with no appetite.

Pack: 1 kg

Flavours:

Phaze1 🍌🍌, Ace Lobworm 🍌🍌, C1 🍌🍌, C2 🍌🍌, C3 🍌🍌, M1 🍌🍌, M2 🍌🍌, M3 🍌🍌, M4 🍌🍌, Bio Big Fish 🍌

Soluble Eurostar Bomb Paste

Would you like to try an effective product for a reasonable price? The Eurostar Bomb Paste is available in the favourite flavour range of the Eurostar series. The paste can be wrapped around the lead or on the method feeder and because of the great price of the 300 gr package, you can take 4-5 flavours with you to the lake-side. Let's try something new and be versatile with the new Eurostar Bomb Pastes.

Pack: 300 g

Small quantity hook baits and pellets

SBS produces Sinking, Wafers and Pop Up bait boilies and pellets in numerous flavours. The extraordinary wide range in these types of products is for good reason. On hard fished English waters it is quite difficult to entice Carp to eat any bait, thus newer and newer products are released to lure and catch them. The shape and consistency of these special baits are constantly changed in order to improve their effectiveness. These differently shaped and textured baits are of more and more importance nowadays because the load on the most popular waters is constantly increasing making catches more difficult. As well as introducing a variety of different shapes and consistencies, the way baits are presented is also important. The role of balanced or lightweight baits gains in importance in early spring and in late autumn when the water temperature is quite low, and the fish become inactive. The feeding habit of fish changes when the water cools down and chances to catch fish can be increased by using Wafers or Pop Ups during these periods. SBS provide an exceptional wide range of products including specially shaped baits in different flavours to suit any situation or condition. Selecting the right flavour for the season and the method of presentation is the key to success.

New!

New!

TACTICAL
BAIT
PRODUCTS

SBS pays more and more attention to feeder, match, and pole anglers. In recent years, the borders between feeder, match, pole fishing and big fish hunting are starting to blur because anglers have been exchanging their experiences regarding successful props and techniques. The same goes for bait. SBS Bait boilies and pellets offer countless variations and possibilities for any fishing method. Small changes and improvements are the biggest secrets which will often lead to more effective fishing techniques and which will make you stand out among average anglers. When the temperature of water reaches 8 °C and the fish start to feed more readily, it is time to use sinking boilies or pellets. If the water is colder than this or fish are inactive, Wafers and Pop Ups prove more effective.

Premium Ready-Made Boilies 150 gr

In line with the traditions of the company, year on year SBS devotes great energy into developing new products with outstanding quality. The number of new products included in the Premium Ready-made Boilie range usually increases by 1 or 2 per year, with only the best and never-failing recipes launched in this range. The 150 g tub of Premium boilies in size 20mm can be a great choice for all carp anglers who would like to try the various flavours first, before buying the 1 kg version.

Pack: 150 gr
Available size: 20
Flavours:

Soluble Premium Ready-Made Boilies

The demand for soluble baits stimulated SBS to make all the 10 flavours of the Premium series available in smaller 250 g packages. This small sachet is the perfect choice for the angler who has not experienced the effectiveness of the soluble boilies yet and wishes to have a go by buying this 250 g product. The supplied mix of 16, 18 and 20 mm-sized balls in the box provide the angler with a choice to offer various bait sizes in places with different characteristics, enabling the angler to change baiting techniques as required by the given situation.

Pack: 250 gr

Available size: 16, 18, 20 mm mixed in the box

Phaze1 🍷, Ace Lobworm 🍷🍷, C1 (yellow) 🍷🍷, C2 🍷🍷, C3 🍷🍷, M1 🍷🍷, M2 🍷, M3 🍷, M4 🍷, Bio Big Fish 🍷

Premium Mini Dumbbells

This new and very special dumbbell shaped boilie, is named Premium Mini Dumbbells. The novel attribute of this boilie is its unusual shape. Since Carp can become suspicious of ball shaped boilies, it is increasingly difficult to fool them. Even the most wary carp will snap up the unfamiliar shape of this small bait, because they have never seen anything like it before. This intense smelling 8–10mm hook bait comes in the most popular Premium flavours containing natural attractors, vitamins and minerals.

Pack: 50 gr

Available size: 8 mm

Flavours, colors:

Ace Lobworm (brown) 🍷🍷, C1 (yellow) 🍷🍷, C2 (brown) 🍷🍷, C3 (brown) 🍷🍷, M1 (red) 🍷🍷, M4 (brown) 🍷

Recommended groundbaits: Eurostar Groundbait, Premium Method Mix, Carp Attract Groundbait

This product is also recommended for match, feeder and pole anglers. More details on page #12.

Corn Shaped Sinker Boilies

These small corn-shaped 8–10 mm boilies are specially formulated by SBS. Whether you are a feeder, match, pole angler or a big fish hunter these baits will catch Carp for you. Following huge success, SBS has expanded this range with 7 additional flavours. It looks like corn, but it is a lot more, it contains exactly the same ingredients as a high-quality boilie. It is also available in Sinking (sinker) and Pop Up (popper) versions making it a highly versatile bait. It is very strong smelling bait. The high N-butyric (butyric acid) content makes it irresistible to Carp and Grass Carp. In winter, anglers can achieve fantastic results with the White Pepminorn flavouring.

Pack: 60 gr

Available size: 8–10 mm

Flavours, colors:

Corn (yellow) 🍷, C2 (brown) 🍷, C3 (brown) 🍷🍷, M1 (red) 🍷🍷, M4 (brown) 🍷, Pineapple (yellow) 🍷🍷, Squid & Octopus (brown) 🍷, White Pepper (white) 🍷🍷, Krill & Halibut (brown) 🍷

CSL Hookers

The CSL Hookers pellet is actually a hybrid boilie in a pellet shape. It contains large amounts of corn sprout extracts, soluble Carp feeding stimulating attractants and betaine. It is a mixture of 50% boilie mix and 50% CSL pellet material. Thanks to these ingredients and the variety of flavours, CSL Hookers can be very effective for any season. You will achieve the best results with these baits if CSL pellets and / or Attract Betaine Pellet are used for the ground feed in the selected location. In addition to the hook pellets each box contains a 25 ml bottle of feed stimulating liquid in the same flavour as indicated on the packaging of the CSL Hookers. Pour some of the liquid attractant on the pellets 24 to 48 hours before your fishing session to absorb as much flavour as possible.

Pack: 150 gr

Available size: 16 mm

Soluble Premium Longlife Ready-Made Miniboilies

This bait also guarantees great success for feeder, match, and pole anglers. SBS Premium Longlife Ready-Made Miniboilies will now be available in soluble version. The soluble boilies are the most effective baits, forming a flavour and aroma rich haze around the bait presenting an irresistible delicacy to the Carp. The package contains 10, 12 and 14 mm hook boilies and they are available in all 10 flavours of the Premium range. It is advisable to choose appropriate hook baits for the season. Its effectiveness can be enhanced if the method mix and/or pellets used for ground feeding are matched to your hook bait.

Pack: 150 gr

Available size: 10, 12, 14 mm mixed in the box

Flavours:

Wafers

**TACTICAL
BAIT
PRODUCTS**

64

Wafers are a powerful tool in modern Carp fishing. Now that Pop Ups have gained ground another fantastic idea popped out of the head of Carp anglers. How to trick the most wary Carp in cold water when their feeding slows down? This bait is designed for the most difficult situations so it is worth taking some wafers with you on each fishing session. These hook baits are carefully balanced out with cork thus adding the exact amount is a very important factor in the manufacturing process. Wafers become perfect baits if their specific gravity is close to zero when in water. In a water tank they should sink to the bottom and should react to the faintest movement of water. This sensitivity is the key to their fantastic success.

Eurostar Boilie Wafers

If you decide to go on a fishing session with Eurostar boilies do not leave without some Wafers hook baits of the same flavouring. Those who have successfully used these special baits during periods of high angler pressure or during periods of poor catch rates know what we are talking about. The packaging contains a mix of 16, 18 and 20mm baits, thus you will have three handy sizes in one box. The use of wafers highly increases your chances in cold water and is the ideal hook bait to use for cold water Carp fishing.

Pack: 100 gr

Double Trick Boilie Wafers

Because of the popularity of the Double Trick Boilies SBS has moved forward with the development of this superb bait, from now on it will be available with a balanced wafers core. The core of this hybrid boilie is cooked while the outer shell is soluble. The 14 mm diameter core inside the bait is balanced with cork, which is why you have a good chance of catching the most careful carp even if the 6 mm outer layer brakes down. The baits will not soften or fall off the rig because the cooked core will stay on for up to 24 hours. The time for the outer layer to dissolve depends on the water temperature, but usually it takes about 2 to 3 hours. Double Trick boilies are available in the flavours of our top category Premium series. Give this revolutionary new bait a try if you want to know for sure.

Pack: 150 gr

20+ Premium Boilie Wafers

SBS developed the 20+ series with the intention of meeting the needs of fanatic big carp hunters. SBS tested the bait in 2011 at the World Carp Classic and also at Rainbow Lake in France, achieving outstanding results on both occasions. The 20 + Premium Wafer, just like the sinking version, provides exceptional longevity and thanks to its balanced character it can deceive even the most cautious carp. The name 20+ refers to 3 important characteristics of the product. First, it suggests the possibility of catching specifically big Carp over 20 kg. Second, it refers to the size of the bait; it will be launched with the diameters of 20, 24 and 30 mm. Third, we would like to emphasize its durability, thanks to a special additive it is guaranteed to last up to 20 hours in the water even with a large silver fish population, during the testing period the bait stayed on the hair rig for over 72 hours. The bait is based on the high-quality Premium series but it stays longer on the hair rig longer than the normal Premium Boilies. It has to be stressed that the durability has been achieved without compromising the ingredients that stimulate feeding in the fish with a continuous and long lasting effect. Those who are familiar with really big Carp angling know that as well as quality, baits with proper consistency and resistance to the continuous attack of silver fish are essential. If you angle in natural waters with a poorer fish population, or your goal is to stalk really big Carp, the 20+ Premium Boilie Wafers is your best choice.

TACTICAL BAIT PRODUCTS

Premium Boilie Wafers

These baits are the top quality wafers in the SBS range. Anglers will find 3 sizes in one box and they can choose between packages of smaller or larger sizes: 10, 12 and 14 mm or 16, 18 and 20 mm wafers. These premium quality baits, intended for use on hair rigs, are available in 10 different flavours. Many people have seen underwater images of feeding Carp. Due to the suction movement of the Carp's mouth aquatic plants, small plant debris and leaves at a distance of 15–20 cm from the mouth of the Carp are swallowed together with the desired food. That is precisely what happens during the use of wafers, Carp simply suck up this lightweight hook bait. In cold-water fishing situations when the temperature of water is less than 8 °C the feeding intensity of fish is significantly decreased because their metabolism has slowed down. Wafers offer an excellent solution for such periods or during periods of high angling pressure.

Pop Ups

Every angler is aware of the benefits Pop Ups have to offer. Many anglers use them combined with sinking baits cut in two. Moreover some anglers swear by the so called snowman rig presentation of the bait (a combination of 1 sinker and 1 Pop Up). Pop Ups offer various application possibilities. SBS also provide buoyant pellets and corn shaped buoyant boilies as well as the traditional ball shaped boilies in this product range. For certain fishing situations – like fishing over silt or bottoms with dense vegetation, for catching Grass Carp, or even during periods when fish simply don't seem to pick up hooks – Pop Ups may prove to be very effective.

70

20+ Premium Pop Ups

SBS developed the 20+ series with the intention of meeting the needs of fanatic big carp hunters. SBS tested the bait in 2011 at the World Carp Classic and also at Rainbow Lake in France, achieving outstanding results on both occasions. The 20+ Premium Pop Ups, just like the sinking version, provides exceptional longevity and thanks to its buoyant character it can deceive even the most cautious carp. Attention! This bait has greater buoyancy than normal Pop Ups. A 20 mm Pop Up bait is capable of lifting a 20 mm sinker, a 22 mm Pop Up a 24 mm sinker, a 24 mm Pop Up a 30 mm sinker. You achieve a balanced bait by adding weight to the above mentioned pairings to ensure the bait sits on the bottom. This way you can deceive even the most cautious old carp without being concerned by smaller carp because of the bait size, giving you the maximum chance to stalk a really big fish. The name 20+ refers to 3 important characteristics of the product. First, it suggests the possibility of catching specifically big Carp over 20 kg. Second, it refers to the size of the bait; it will be launched with the diameters of 20, 24 and 30 mm. Third, we would like to emphasize its durability, thanks to a special additive it is guaranteed to last up to 20 hours in the water even with a large silver fish population, during the testing period the bait stayed on the hair rig for over 72 hours. TACTICAL BAIT PRODUCTS

Soft Hooker Pellets

This hook bait has been developed by SBS for the feeder, match, and pole angler. The hook pellets are relatively soft, slightly rubbery baits with 6–8 mm grain size. Despite their soft texture the pellets will not fall from the hook or hair rig on the cast. In addition to their softness the pellets also float. However, although they float they will not even lift the smallest hook from the lakebed. Available in all 10 Premium flavours for successful fishing in every season. A fantastic new product, give it a try!

Pack: 100 gr

Available size: 6–8 mm

Flavours:

Phaze1 🍷🍷, Ace Lobworm 🍷🍷, M1 🍷🍷, M2 🍷🍷, M3 🍷🍷, Bio Big Fish 🍷🍷

Recommended groundbaits:

Eurostar Groundbait, Premium Method Mix, Carp Attract Groundbait

This product is also recommended for match, feeder and pole anglers. More details on page #12.

All SBS flavours are on Page # 6-7

Corn Shaped Popper Boilies

These special small corn shaped boilies of 8mm and 10mm are one of SBS's own developments and they can be used very effectively for feeder, match, pole and big fish angling. Following the huge success of these boilies, SBS has released a further seven flavours. It looks like corn but it is made from exactly the same ingredients as top quality boilies. It is available in Sinkers and Pop Ups also, offering a great number of hook bait variation possibilities. It has a very characteristic smell and its high N-butyric content makes it irresistible to Carp and Grass Carp. Fantastic results can be achieved with the White Pepminorn flavouring in the winter months.

Pack: 40 gr

Available size: 8–10 mm

Flavours:

Corn (yellow) 🍷🍷, C2 (brown) 🍷🍷, C3 (brown) 🍷🍷, M1 (red) 🍷🍷, M4 (brown) 🍷🍷, Pineapple (yellow) 🍷🍷, Squid & Octopus (brown) 🍷🍷, White Pepper (white) 🍷🍷, Krill & Halibut (brown) 🍷🍷

Euro Shelf Life Pop Ups

This is the Pop Up boilie from the extremely popular Eurostar line which has wide selection of flavours at reasonable prices. The addition of granulated cork ensures that they remain buoyant for very long periods. Tests have indicated that this bait stays floating for at least 48 hours. They are extremely tough and durable and are able to withstand the attention of small silver fish and Catfish, thus the bait presented on the hair rig will be in perfect condition until the arrival of the first large fish. By using CSL Session Dip in cold waters and a 3 in 1 Turbo Bait Dip when the temperature of the water is above 10 °C the attraction power of the bait can be increased significantly

Pack: 40 gr

Available size:

14 or 16, 18, 20 mm mixed in the box

Flavours:

Squid Octopus 🍷, Frankfurter Sausage 🍷🍷, Belachan 🍷, Garlic 🍷🍷, Strawberry Jam 🍷🍷

Premium Pop Ups

Fantastic results were achieved with Premium Pop Ups during the past year. Warren Harrison broke the Common Carp record at Rainbow Lake with a 35.4 kg Mirror on the Ace Lobworm Pop Up boilie. If you use Premium boilies for your free offerings it is worth matching them with the same type of Pop Up. Pop Ups offer various application possibilities. On waters where dwarf Catfish are quite common, many anglers use the levitation method to trick these small hungry predators. In such cases the snowman presentation method may prove very effective by fixing one sinker and one Pop Up on the rig. This presentation method is able to select Carp from a certain size and at the same time a lightweight bait is presented which will trick even cautious and wary old specimens. They are effective on muddy and weedy riverbeds, during poor catching periods or when Grass Carp are the target. From this year on anglers can choose from two types of packages containing 3 different sized boilies: the smaller 10, 12 and 14 mm box or the larger 16, 18 and 20 mm sizes. **The Romanian Team (members: Micula-Pongracz-Nemeti) won the World Carp Classic 2012 in Bolsena with C1 products.**

Premium M1 White Pop Ups

Based on our experience we can say without any doubt that the colour and the flavour of this bait have a significant impact on the feeding of the fish. Usually there is one matching color to each flavour, for example the M1 Pop Up baits were red up till now... The red color works very well, usually, but in several conditions (like dark - silty or peaty lakebed) the white is the most attractive colour. From now on, the M1 pop up boilies are available in white colour too, so we have another choice in terms of hookbaits to go after the carp!

CSL Hooker Pop Ups

The CSL Hooker Pop Ups are actually hybrid boilies in a pellet shape. They contain large amounts of Corn Steep Liquid, feed stimulating soluble attractants and betaine. They are made of half boilie mix and half of the ingredients used to make CSL pellets. The wide range of flavourings makes them an effective bait in any situation during any period. It is best to use CSL pellets and/or Betaine Attract Pellets for the ground bait together with the CSL Hooker Pop Ups. Each box contains a 25 ml bottle of feed stimulating liquid as well as the Hooker Pop Ups of the same flavour. It is advisable to soak the hook baits in the attractant liquid for 24 to 48 hours before the fishing session to give them an edge.

Pack: 100 gr **Available size:** 16 mm

Soluble Premium Pop Ups

A fantastic and novel bait in the Pop Up bait line which floats and dissolves. The latest SBS invention combines two extremely popular baits. The Soluble Premium Pop Up brings success during poor catching periods. We recommend it on waters where fish are in abundance and for cold water fishing; this bait is simply unbeatable in such situations. Use this great bait wherever you wish below a water temperature of 12 °C. However, in the summertime stick to the INSOLUBLE Pop Up version if there are less silver fish and more dwarf Catfish in the water. Try this bait and you will have success even in the most extreme conditions. **The Romanian Team (members: Micula-Pongracz-Nemeti) won the World Carp Classic 2012 in Bolsena with C1 products.**

Dark Fireflies Pop Ups

This is a very special and unique bait developed by SBS. It is a buoyant boilie with another important feature; it glows softly in the dark. It has been remarked that glowing things attract the interest of Carp. Recently an increasing number of anglers have been using these fluorescent Pop Ups with great success. People are not sceptical about these new types of baits and more and more anglers turn to them after hearing about their extraordinary effectiveness.

Fluro Pop Ups

These are very intensive coloured buoyant baits. It is well known that Carp are curious and are often not able to overcome their curiosity. The bright colour of the Fluro Pop Ups will certainly distinguish this bait from other baits attracting the interest of Carp. Based on these observations many anglers use these baits successfully. The Pineapple flavoured Fluro Pop Up is one of the most effective Grass Carp baits presented at 2 to 3 cm from the bottom on a rig. The new colours and flavours offered in this product line provide new opportunities in the use of Fluro Pop Up baits.

Dips

**TACTICAL
BAIT
PRODUCTS**

SBS has advanced a very old fishing technique by marketing special products which enhance the flavour and smell of baits to increase their attractiveness. The different aromas, vitamins and feed stimulating additives and liquids are standard ingredients of the bait armoury of anglers today. The various application possibilities and the wide range of flavours of SBS Dips significantly increase the effectiveness of the baits. Hook baits soaked in dips will leak feed stimulating flavours and aromas once submerged in water. It is important, however, to pay attention to the indicated period when selecting flavours. It is better to avoid sweet flavoured dips on Hot summer days and use dips with a mixed or rather foul aroma instead. In warmer waters the strong smell of dead creatures (worms, larvae, snails) dominates, thus strong foul smelling baits will seem more natural to fish during these periods.

3 in 1 Fluro Powder Dip

There are two types of powder in the 3 in 1 Fluro Powder Dip package, each properly sealed and separated. The 150g powder dip with particularly attractive scent and flavour found in the bottom of the package will leak from the bait shortly after submerged in water. The brightly coloured 25g Fluro Powder in the upper part of the package is also flavoured but it will not wash out of the bait. As the product's name implies, this ancillary bait offers three application possibilities. We recommend the first use in most situations. Firstly, it is sufficient to use the flavoured powder dip on lakes where fish are in abundance and the water is relatively shallow (2 m). On such lakes the water is usually rather cloudy (especially when the water's temperature is relatively high). In this cloudy water the Carp relies on its senses while eating thus there is no point in using the Fluro Powder. Wet the bait's surface then roll it in the Powder Dip. The Powder Dip will wash off and surround the bait once submerged in water. The dip will leak flavours and aromas and attract the nearby fish to your bait. The second use is just the other way around. In deep lakes or in clear water (even in shallower lakes in spring and autumn) the Fluro Powder's use takes on special importance. Simply dip the bait in the water then roll it in the Fluro Powder. The Fluro Powder does not soak off of the bait when submerged in water thus the powder's vivid colour and flavour will attract the interest of Carp. The third opportunity is to use the two powders together; again, the water should be clear and translucent to guarantee success. In this case cover the bait's wet surface with Fluro Powder first, then wet it again and roll it into the flavoured Powder Dip. Both the flavoured part, by soaking off the bait, and the Powder Dip's vivid colour on the bait will attract the fish. Attention: It is not recommended using them in the reverse order, because the Fluro Powder will soak off of the bait's surface together with the Powder Dip.

3 in 1 Turbo Bait Dip

The name of this product reveals the three functions it offers to anglers. The most well known application possibility is to put some dip on the baits. Once coming in contact with water the thick liquid leaks off gradually, creating a strong smelling haze. The dip dissolves within 30 to 40 minutes and triggers feeding fish to pick up the bait. Its second use is to pour some into a PVA bag. When the bag has dissolved the liquid will form a flavourful cloud in the water. The third possibility is to soak a few hook baits in the dip, which will harden them beyond belief. The longer boilies are soaked in the dip the harder and more aromatic the hook baits will become. SBS 3 in 1 Turbo Bait is one of the most popular and widely used products; it can be used very effectively with different fishing techniques like match, feeder, pole fishing and big fish hunting. Even live bait and corn can be flavoured with this product. It is available in the flavour range of the Eurostar boilies and it is a PVA friendly product.

Pack: 80 ml

Flavours:

Strawberry Jam 🍓🍷, Sweet Plum 🍷🍓, Squid & Octopus 🐙🐙
Squid Octopus & Strawberry 🐙🐙🍓🍷, Frankfurter Sausage 🍷🍓, Shellfish 🍷🍓,

Premium Bait Dip

This bait dip is from the top quality Premium range and is simply the best dip available from SBS. If you are using Premium hook baits this is a perfect addition because it contains all the fish-catching properties of the basic mix in liquid form. It has the perfect combination of vitamins, aromas and different feed stimulating attractors making Premium Bait Dip extremely irresistible to fish. It is available in 10 different flavours. It is important to keep in mind the indicated season when selecting a flavour. Even the best baits will not be as effective if not chosen for the right season. The sweet and spicy All Season Corn and M3 are all year round dips while M1, Ace Lobworm, AV1 and Fruit & Nut flavours work better in colder waters. The two most attracting flavours on Hot summer days are M2 and Bio Big Fish. Many gold medals have been won by the SBS Szi-Ko Team thanks to the extremely effective M1 boilie and AV1 Dip combination in warming up and cooling waters. Premium dips can be used safely with PVA bags because they are not water based and do not dissolve PVA. **The Romanian Team (members: Micula-Pongracz-Nemeti) won the World Carp Classic 2012 in Bolsena with C1 products.**

Pellets

**TACTICAL
BAIT
PRODUCTS**

Pellets have become indispensable hook baits of modern Carp fishing. Carp simply adore the SBS pellet range thanks to their high digestibility and excellent nutritional value. The wide variety of SBS pellets have different features with regard to texture, composition, grain size, solubility and the measured oil content. Thanks to these different features and the wide flavour range, SBS pellets offer numerous presentation and feeding possibilities. SBS offers pellets for every situation and season; CSL pellets designed for winter fishing with low oil content and quick break off time; micro pellets and complex pellets for periods when catch rates are low, and fishy pellets specifically designed for the summer with high oil content. When you are out on a short session then of course soluble pellets are the best solution as they attract Carp by leaking flavours and attractants in a short time. When you are out on big fish hunting session then durable, slowly leaking pellets with high oil content are the best choice. A feeding strategy where first the fast dissolving pellets are offered to establish a feeding spot and subsequently slowly dissolving pellets are introduced into the water to keep fish feeding can be effective. Information at the end of this catalogue may provide further help in choosing the right pellet.

Halibut

Bomb Pellet Mix

This novel innovation provides the opportunity to create extremely varied feeding from only pellets. The Bomb Pellet Mix is a nourishing pellet mix with high protein content and owing to its particle sizes it is particularly suitable for targeting big Carp. If you are not allowed to use a boat, you may often have a problem to get the feeding baits out to the desired feeding area. This product is a perfect solution for such situations. Take the pellet glue from the bucket, add it and water to the mix and form balls; you can now catapult the balls to great distances and even more than 100 meters away from your swim. The multiple pellets found in the Mix guarantee that the Carp will be attracted to the feeding spot quickly, and kept them there for a long time. The dissolve time of the pellets covers the widest range; even a single ball may take up 14 hours to dissolve and we guarantee it with the 10 mm to 20 mm grain sizes.

Pack: 5 kg

ATTRACT BETAIN CARP PELLETS

TACTICAL
BAIT
PRODUCTS

Attract Betain Carp Pellets

These Carp pellets contain betaine, one of the most important and widely used feeding pellets from SBS. Attract Carp Betaine Pellets are available in the 9 different flavours of the Eurostar series. Once immersed in water this pellet immediately begins to release important feed stimulating substances which will arouse the interest of even the most cautious Carp. It becomes very soft within 1 hour and normally wary fish are induced to feed on the irresistible presentation before them. Always select a feeding pellet according to the seasonal recommendations and match it with the flavour of the used bait. This way you will get a successful combination that never fails. This great bait is characterised by moderately slow dissolve time, low oil content and excellent digestibility.

Pack: 1, 5, 10 kg **Available size:** 6 mm

Solution time: 3–6 hours

Flavours:

This product is also recommended for match, feeder and pole anglers. More details on page #12.

**CSL
PELLETS**

CSL Pellets

Corn Steep Liquor Pellets are based on corn steep liquor and are the most popular SBS pellets. Carp anglers have started to realise the importance of this pellet and, as a result, more and more anglers use it when they go fishing. It dissolves in a very short time with particles breaking off instantly, attracting the attention of fish nearby. Following its rapid dissolving action, corn steep liquid leaks out into the water creating an attracting haze, and this will linger on the bottom for hours. Searching Carp will soon create a blizzard of CSL particles as they search the bottom for the tantalising food signals, triggering and stimulating feeding situations. If only CSL pellets are used for feeding then the only food source to be found will be the hook bait. The versatility of the CSL pellet can be demonstrated by its effectiveness when used in PVA bags or mesh. Made into balls with a method mix it becomes an excellent feeding material which can be catapulted to the feeding spot. All the above features make it the most popular pellet of the SBS Pellet range.

Pack: 1 kg **Available size:** 3, 5 and 8 mm

Solution time: Depend on the grain sizes: 0.5–2 hours

Flavour: CSL 🌻🌻

Recommended groundbaits: Eurostar Groundbait, Premium Method Mix, Carp Attract Groundbait

**TACTICAL
BAIT
PRODUCTS**

CSL Pellets

Each 5kg bucket of CSL Pellet contains a free 500ml bottle of attraction enhancing Corn Steep Liquor. With the 10kg bucket you will receive a 1litre bottle. Pellets pre-soaked and topped with corn Steep Liquor immediately start to leak off carp attracting substances when submerged in water, providing a highly effective rapid response method. CSL pellets are excellent if you want to create a concentrated feeding zone with PVA mesh and bags around your hook bait. Corn Steep Liquor does not dissolve PVA products thus boilies, pellets and grains placed in PVA bags, mesh or on strings can be used with it. CSL pellets make excellent feeding material when mixed with method mixes which can be catapulted to the feeding spot. This most popular SBS Pellet is characterised by extremely fast dissolve time, low oil content and high digestibility.

High Oil Halibut Pellets

The powerful attraction of Halibut Pellets is well known among anglers. For this reason alone, it could not be left out from our range of high quality SBS products. It is the ideal feeding pellet during the summer due to its durability and high fishmeal content. Easily digestible ingredients go hand in hand with quality oils, enhancing fast metabolism and stimulating fish to go for more. Different grain sizes help in selecting the targeted fish and mixed with other pellets it makes an excellent pellet mix, which thanks to the different break down and particle release periods of the various pellets keep fish coming to feed on it. SBS High Oil Halibut Pellet is a durable and highly digestible pellet with high oil content.

Pack: 1 kg Available size: 4, 6, 8, 10 mm

Solution time: 4–6 hours

Flavour:

Fish 

Recommended groundbaits: Eurostar Groundbait, Premium Method Mix, Carp Attract Groundbait

Pre-Drilled High Oil Halibut Pellets

It has exactly the same ingredients as the smaller sized Halibut Pellets the only difference being that it is available in 14 and 20mm sizes. The different sizes are packaged pre-drilled thus, as well as using them for feeding they can be presented on hair rigs. High Oil Halibut Pellets are the ideal baits for big fish hunting in the summer. It is sometimes the only effective bait on heavily fished waters or during periods of low catch rates. The best SBS summer pellet for big fish is characterised by high oil content, excellent durability and high digestibility.

Pack: 1 kg

Available size: 12, 20 mm

Solution time: 8–12 hours

This product is also recommended for match, feeder and pole anglers. More details on page #12.

Premium Pellets

Premium Pellets are the highest quality pellets of the SBS range. Similar to other product categories the name Premium means a guarantee of top quality. Premium Pellets are the most complex pellets containing the finest ingredients. When choosing the right flavour it is important to keep in mind the seasonal recommendations indicated on the package and to match it to the flavour of the bait presented on the hair. If these factors are observed and a good feeding strategy is chosen then you will have provided the potential for a memorable fishing session. **The new flavours of C1 and C2 are part of the Premium category. MICRO MATCH PELLETS

TACTICAL
BAIT
PRODUCTS

MicroMatch Betain Pellets

This product contains extraordinarily small-sized 1.5mm diameter pellets. Primarily intended for match, feeder and pole anglers, it is an ideal addition to mix with other pellet to promote a very rapid response. Due to its low oil content anglers can achieve considerable success with this product even in winter. As the name implies it contains betaine, one of the most effective feed stimulators. This product is characterised by a low oil content, fast dissolve time and good digestibility. Made into balls with an SBS method mix of the same flavour it becomes an excellent feeding material which can be catapulted to the feeding spot or used in a method feeder. Available in three highly popular flavours.

Pack: 1 kg

Available size: 1,5 mm

Flavours:

Strawberry Jam 🍓🍓, Scopex 🍓🍓, Fishmeal 🐟🐟

Method Mixes

**TACTICAL
BAIT
PRODUCTS**

Method mixes are the most important feeding mixes used in Carp fishing no matter which fishing style anglers adopt. These mixes are formulated by using the finest quality ingredients, proven to be the most effective feeding materials to stimulate a feeding response in Carp. On waters where boats are not allowed and feeding is done from the bank several feeding strategies can be used. The most common and effective way of getting the ground bait to the desired spot is to catapult them. Method mixes marketed by SBS are easily catapulted because, due to their composition, they have excellent adhesive qualities and can be rolled into massive balls. Ground mixes become even more nutritious if pellets of different breakdown time and whole or half boilies are added to it. Feeding balls composed in this manner and catapulted to the desired spot have at least 3 advantages:

1. Thanks to the firm texture of the feeding balls rolled from method mixes they can be catapulted large distances.
2. Method mixes break down immediately and create a cloudy haze of attraction which lures fish to the area and stimulates a feeding response.
3. Thanks to their different dissolve times boilies and pellets mixed into the method mix will keep fish searching the spot relentlessly.

CARP ATTRACT GROUNDBAIT

Carp Attract Groundbait

A great groundbait, for a great price. This product will be popular among the match, feeder and pole anglers too. This product has the best price in the groundbait range, but still it is high quality. The Carp Attract Groundbait, thanks to the flavours, is a solution for all seasons. Because of the competitive price you can feed bigger quantities, so that is why we are recommending it for slinging, or for bigger waters, and when mixed with the proper materials (which makes it heavier) on bigger rivers too. Although this groundbait contains fewer components than more expensive products, the flavours are the same as the ones used in the more expensive products. Do not hesitate to try the new SBS groundbait that has the most competitive price!

Pack: 1 kg

Flavours:

Squiddy 🍷, Franky 🍷, Strawberry Jam 🍷🍷

All SBS flavours are on Page # 6-7

EUROSTAR GROUNDBAIT

Eurostar Groundbait

A similar groundbait to the Carp Attract Groundbait but it contains more components and is flavoured with a top category Flavour. Not just the quality of this product is raising attention but also the price. This product can be used successfully in competition. We made it from easily digestible materials so you can keep the fish in your area for a longer period. The flavour choice depends on the season and you can mix two different groundbaits if you like to experiment. You can take the Eurostar Groundbait with you even for a competition; it will cope with any challenge.

Pack: 1 kg

Premium Method Mix

As in each category, Premium means best quality. The main difference between Nitro and the Premium Method Mixes lies in their composition. The Premium Method Mixes are even more complex containing even more additives. Yet, there is something else, Premium Method Mixes break down more slowly once submerged in water thus these ground feeds will keep fish close to the feeding spot for a longer period of time. It is worth mixing it with half or whole boilies and pellets of various dissolve times when catapulted to the feeding spot to get an irresistibly effective feeding material.

Pack: 1 kg

Flavours:

C1 🌸, C2 🌸, C3 🌸, Phaze1 🌸, Ace Lobworm 🌸, M1 🌸, M2 🌸, M3 🌸, M4 🌸, Bio Big Fish 🌸, Krill & Halibut 🌸

Recommended liquid additives: Corn Steep Liquor, Whisky Link, Spicy Robin Red, Spicy Stim Match

Recommended pellets: CSL, Attract Betain Carp, High Oil Halibut, Multimix Proactive, The Edge, MicroMatch Betain

World Carp Classic 2012 Champions. More details on Page # 8-9

Premium Method Mix

SBS provides a bonus bottle of Corn Steep Liquor with each 5 and 10kg bucket. The 5kg bucket contains a 500 ml bottle while the 10kg bucket contains a 1litre bottle of Corn Steep Liquor. As in each category, Premium means the highest quality. The main difference between Nitro and the Premium Method Mixes lies in their composition. The Premium Method Mixes are even more complex containing even more additives. Yet, there is something else, Premium Method Mixes break down more slowly once submerged in water, thus these ground feeds will keep the fish actively searching the feeding spot for a longer period of time. It is worth mixing it with half or whole boilies and pellets of various dissolve times when catapulted to the feeding spot to get an irresistibly effective feeding material.

Pack: 5 and 10 kg – bonus Corn Steep Liquor

Flavours:

PREMIUM PVA BAG MIX

**TACTICAL
BAIT
PRODUCTS**

Premium PVA Bag Mix

The tactic of creating precise and concentrated areas of bait is one of the key factors to induce carp to pick up our hookbait. By using only a small quantity of the SBS Premium PVA Bag Mix, we can either use this tactic on its own to create a small and effective patch for shy feeding fish, or as a small concentrated area of bait within a larger spread of bait. Either way, the extra attractant of the Bag Mix immediately around our hookbait works in the same way. The base of the Bag Mix is the Premium Method Mix plus several types of pellet and other ingredients. The SBS Premium PVA Bag Mix is available in all of the Premium flavours.

TACTICAL
BAIT
PRODUCTS

Nowadays, aromas have become one of the most important components of good quality boilies. High-quality flavours must meet several criteria in order to help lure fish to the feeding spot. One important feature is that they should not contain strong bitter tastes, which may be repulsive to the sophisticated sense organs of fish. Another important feature of a good quality flavour is that it withstands cooking. You may use large quantities of flavours in vain if they are washed out during the cooking process. SBS flavours represent the highest quality on the market. Thanks to the variety of possibilities you can create a truly unique boilie. Usually 3 different flavours are added to the paste when making home-made boilies. Based on current experiences and tests it is unnecessary to add more. Perhaps it is more normal to use 2 flavours because with the combination of 2 flavours excellent mixed-flavour boilies can be created. SBS flavours can be divided into two groups: oil and ethanol-based flavours. Concentrate Flavours and Premium Flavours are oil-based products.

These oil-based flavours are best on waters when the temperature is above 8 °C. In temperatures colder than this the oil may congeal inhibiting the leak off of flavours. In colder waters the ethyl alcohol-based EA Range Flavours offers a great solution. These products do wonders even when the temperature of the water is below 8 °C due to their ethyl-alcohol content. Take into consideration the seasonal recommendations indicated on the bottles and the temperature of the water when deciding which would be the right flavour.

**TACTICAL
BAIT
PRODUCTS**

Concentrated Flavours

Highly concentrated aromas in a wide range of flavours. They are oil-based products which work best on waters where the temperature is above 8 °C. The 16 different flavours offer the ability to create custom made baits by slightly changing the proportion of the added flavours and additives. You can create truly unique bait that will make you justly proud of your catch.

Pack: 10 and 50 ml

Dosage: 6–10 ml/base mix

Recommended periods – legend:

🌸🍫 Spring-Autumn 🌞 Summer 🌸🍫 Four season

Premium Flavours

Premium Flavours are extraordinarily concentrated thus a very small amount like 4 ml is enough to add to a 1 kg boilie mix. Among the flavours, Premium represents the highest quality. We recommend using these oil-based products on waters where the temperature is above 8 °C. Due to its strong concentration a 50 ml bottle is enough to prepare up to 12 kg of boilies. Premium flavours render boilie making very cost effective while using the best quality flavours. All SBS flavours are cook proof, meaning that following a 2 minute boiling period the boilies retain most of the flavour and fragrance matter.

Pack: 10 and 50 ml

Dosage: 4-8 ml/base mix

Flavours:

Frankfurter Sausage 🌻🍷, Squid

& Octopus 🍷, N – Butyric Pineapple 🌻🍷,

N – Butyric Crab 🍷, Black Pepper & Plum 🌻🍷

EA Range Flavours

The Ethyl-alcohol flavours of SBS are real cold water flavourings. These products are most effective in spring and late autumn. Thanks to their ethyl-alcohol content they do not congeal even in waters when the temperature drops below 8 °C ensuring an optimum leak off of flavours. EA Range Flavours are available in the two most popular sweet flavours from the SBS flavour range.

Attractants

**TACTICAL
BAIT
PRODUCTS**

Attractants are liquid foods containing many ingredients to make baits really effective and attracting. SBS offers a fantastic range of products in this line. The highly concentrated attractors come in small bottles and are the real key additives of boilie making. It is an indispensable component of boilies and the diversity of their natural components make them irresistible to fish. Thanks to a wide choice of products you will surely find the appropriate attractant for your boilies. Attract Natural with its neutral flavouring is the ideal additive for any boilie while flavoured Attractors can be found in the SBS range as well. The Attract Natural Flavour Links is available in 14 different flavours thus you can determine the type and flavour of your boilie by using this additive. The larger bottles come in handy when you want to enhance your pellets and boilies. Mostly, they are used in method mixes and with pellets but other grains and seeds can be soaked in it as well. The natural and flavoured versions of Corn Steep Liquor and the effective cold water attractant Whiskey-Link are among the most popular attractants of SBS.

**TACTICAL

PRODUCTS**

The Attracts

SBS attractants are the life and soul of boilie making. These products cannot be imitated. Attract Natural has been used by satisfied Carp anglers for over 15 years and is one of the longest marketed attractants from SBS. The exact composition is a secret, but its natural ingredients include vitamins, proteins, high nutrient content and feed stimulating substances in a liquid form. One bottle of Attract Natural is enough for the preparation of 5 kg of boilies. Attract Natural will give any type of boilie a marked edge as it is an all season attractant.

Pack: 125 ml
Dosage: 25 ml / 1 kg base mix
Flavour:
Nature 🍷🍷

Attractamino

SBS attractants are the life and soul of boilie making. These products cannot be imitated. Attractamino is rich in amino acids, pre-soaked liver and spleen, vitamins, minerals and natural ingredients. Thanks to its excellent composition Attractamino has long been used by Carp anglers with undiminished popularity. A bottle of Attractamino contains sufficient attractants to make 10 kg of boilies. Thanks to its neutral flavouring it can be added to any boilie type giving them an edge all year round.

Pack: 250 ml
Dosage: 20–60 ml / 1 kg base mix
Flavour:
Nature 🍷🍷

All SBS flavours are on Page # 6-7

Attractamino PPC

SBS attractants are the life and soul of boilie making. These products cannot be imitated. The Attractamino PPC is a pre-digested food source. Its primary attraction is formed round PPC (phosphorylcolamine) an accepted Carp attractor which leaks very attracting food stimulating signals from the baits. Attractamino PPC is a very popular Carp attracting liquid food that contains fresh liver, spleen, amino acids and various minerals in liquid form. Attractamino PPC forms an intensely scented cloud just off of the bottom that is irresistible to Carp. Recommended dosage is 20 to 60 ml per 1 kg of boilie mix. It can be used successfully in all seasons.

Corn Steep Liquor

Corn Steep Liquor has become one of the most popular liquid foods available and one of the best Carp attractors of the decade. SBS is the market leader in the field of maize steep products and its success is based on nearly 20 years of testing and use. Corn Steep Liquor is derived from steeped maize grains resulting in a thick and rich smelling liquid which Carp find almost irresistible. It is made up of 30% protein, a well-defined amino acid profile, natural soluble sugars and essential vitamins and minerals. Pellets can be dipped into CSL liquid to give them a boost before casting out for feeding. It is the most popular pre-soaking additive of CSL Pellets in the SBS attractant range.

The Original Whisky Link

The Original Whisky Link is a natural syrup used in whiskey making which contains 40% soluble protein extracts, free amino acids and sugars. It has an exceptionally rich alcoholic aroma which is a well-known attractor of Carp and Grass Carp. This liquid food plays an important role in the making of soluble boilies intended for use during winter sessions. Due to its alcohol content it inhibits the crystallization of Gold Treasure Liquid and furthers perfect break down of the boilies. It is an ideal soaking fluid for pellets, corn and other seeds and boilies. It is also an important additive in boilie making. Due to its alcohol content the Carp-luring aromas will be dispersed even in the coldest waters.

Pack: 500 ml
Dosage: 20–40 ml / 1 kg base mix
Flavour:
Alcohol 

The Tonic

SBS attractors are the life and soul of boilie making. These products cannot be imitated. Results for this product have been outstanding. The completely natural organic water-soluble food source is ideal for the enhancement of the overall impact of boilie mixes and hook baits. This concentrated natural organic formula is best used on its own at the rate of 30 ml per 1 kg of base mix or with low level flavours. It adds considerable food value to any mix and it is an effective, year-round food source and attractant that catches on even the hardest of waters. The Tonic is an attractant that works perfectly in the coldest of waters.

Spicy Robin Red

This product is a liquid feed stimulator containing original Robin Red concentrate. Thanks to the spicy character of the Robin Red it is a successful product all year round. This product is specially designed for match, feeder and pole anglers to make any method mix more prolific, because the strong spicy taste has feed stimulating effect on fish. If combined with a Method Mix of the same or similar taste and with various pellets you will get an excellent spicy mix.

Pack: 500 ml

Flavour:

Spicy

Dosage: 100 ml/1 kg Method mix

Recommended groundbaits:
Eurostar Groundbait, Premium Method Mix, Carp Attract Groundbait

Hot & Spicy Stim Match

This extremely successful attractor is what large numbers of carp anglers like to use. Due to the spicy notes it has a strong appetite stimulating effect that works great, mainly in low and normal water temperatures. It can be used perfectly well with almost any kind of Method Mix, but it shows the best catch results with the combination of fishy and spicy mixes. Pellets and cooked seeds can be dipped in it. Many use it as a dip, and there are anglers who pour some drops of it into the paste kneaded around a hook bait. A versatile product that can be used in many different ways!

Pack: 500 ml

Flavour:

Hot Spicy

Dosage: 100 ml/1 kg Method mix

Recommended groundbaits:
Eurostar Groundbait, Premium Method Mix, Carp Attract Groundbait

Gold Treasure Spicy

This red coloured additive is completely identical to the traditional Gold Treasure with one exception, it contains Robin Red. Gold Treasure, together with this spicy attractor has an even stronger attraction enhancing effect. It has a special spicy corn scent. Almost every experienced angler knows well what an important role the two additives have played in Carp fishing. In Gold Treasure Spicy these two extremely important scents are combined and therefore the big fish, match, feeder, and pole anglers really like using it. Gold Treasure Spicy significantly increases the attraction properties of mixes and groundbait. This product is perfectly suited to flavour seeds and pellets, a great feed stimulator.

Pack: 225 és 900 ml

Flavour:

Fűszeres – kukoricás

PRODUCTS**

CSL Groundbait Mixer

This Corn Steep-based liquid additive has been developed for the Match Attract Groundbait Mix in the same flavours. It contains nutrients rich in protein, natural sugars, free amino acids, vitamins and mineral salts. These ingredients are particularly attractive to Carp. Use it without dilution if a highly effective additive is required. If diluted, add 1 litre of water to 1 litre CSL Groundbait Mixer, in the latter case the 2 litres of liquid is enough to make 5 kg Groundbait Mix. Leave enough time for the grains of the Groundbait Mix to completely absorb the liquid. The CSL Groundbait Mixer is perfectly suited to flavour pellets, pastes and meaty baits.

Pack: 1 L

Flavours:

Match Special 🍷, Tutti Frutti 🍌, Shellfish 🍤,
Squid&Octopus 🐙, Strawberry Jam 🍓,
Frankfurter Sausage 🌭

Dosage: 500 ml / 1 kg Method mix

Recommended groundbaits:

Eurostar Groundbait, Premium Method Mix, Carp Attract Groundbaits

This product is also recommended for match, feeder and pole anglers. More details on page #12.

Additives

**TACTICAL
BAIT
PRODUCTS**

Here you will find the best additives from the SBS range, which are of course ingredients for boilie making. These natural extracts include Betaine, Edge, Robin Red and Black pepper Oil. These are all well-proven feed stimulating attractors which Carp cannot resist. Anglers have always desired to make their baits even more attractive to fish, based on observations the appetite of Carp is significantly and positively affected by sweet, salty, sour and spicy flavours. Natural extracts and liver extract have a similar impact upon the feeding habits of fish. Based on these observations various feed stimulator mixes in solid or liquid form have been launched on the market. These palatants positively stimulate the appetite of the Carp, triggering a feeding response by inducing their appetite. The different mixes have become part of the indispensable armoury of dedicated anglers. SBS offers a wide selection of the most effective bait enhancers that are indispensable components of boilie creation, for every situation.

**TACTICAL
BAIT
PRODUCTS**

Preserved Egg Liquid

Add the Preserved Egg Liquid to your Boilie Mix to make a perfect long life boilie. This additive makes the boilie making easier, it substitutes the eggs perfectly. With the addition of a preservative the boilies won't have any bad taste, and it's shelf life is 6-9 month without freezing after opening. The recommended dosage is approximately 500 ml for 1 kg of Base Mix depends on the consistency of your mix.

Pack: 1000 ml

Dosage: 500 ml / 1 kg base mix

🍷🌸 Four season

Geranium Oil

The origin of geranium oil is in South Africa, China and Egypt. The essential oil derived from the plant has a special fine, citrus scent. It is one of the most effective natural essential oils used for carp angling. It fits extremely well with sweet-smelly mixes. Like bergamot oil, just a few drops of it are enough for the base mix.

Pack: 20 ml

Dosage:

10-20 drops / 1 kg base mix

Flavour:

Geranium 🍷🍷

**TACTICAL
BAIT
PRODUCTS**

Bergamot Oil

The bergamot tree originates in the tropical areas of Asia, but today it is grown in Italy and in Spain, as well. Its oil is extracted from the fruit by pressing. It has a pleasant scent, reminiscent of fresh fruit. It has a lower density than the water and thus spreads more easily in water. It is a highly concentrated essential oil, so just a few drops of it are enough for boilie making. Take the dosage of this product seriously!

Pack: 20 ml

Dosage: 10–20 drops / 1 kg base mix

Flavour:

Bergamot

Summer

Four season

Special Pop Up Mix

This product has been launched by SBS to please the fans of home boilie-making. In addition to the home-made boilies created based on individual recipes, anyone will be able to create unique floating boilies with this additive. It is very easy to work with the Pop Up Powder, but please observe the advised quantities when preparing this mix. Add 50% groundmix to 50% Pop Up mix, this is a proportion of the weights, so e.g. add 100 gram Pop Up Mix to 100 gram groundmix. Add three times the usual quantity of the additives and flavours to the mix, then knead the dough. After rolling, leave the ready balls to rest for a few hours. The resting time is very important, because the Pop Up Mix absorbs the flavours of the additives slower than usual. After a few hours' resting them, boil the balls for 2 minutes. The home-made Pop Up boilies are ready after drying. The minimum drying time is 3 days. Create your individual floating boilies with the Special Pop Up Mix.

Pack: 200 gr

Dosage: 50–50% Base mix and Pop Up Mix

Flavour:

Nature

Cork Powder

More and more anglers are familiar with the concept of balanced bait. The wafers boilies occupy an illustrious place among our ready-made products. If you want to make this kind of baits home using SBS ground baits, you will also need cork grit. With these balanced baits you can be successful even in the most impossible and hopeless situations. This bait is most perfect, if its density is almost zero in the water; placing it in a fish tank it will sink to the bottom and react sensitive even to the smallest flows.

Pack: 150 gr

Dosage: 25 gr / 1 kg base mix

Flavour:

Nature

Liquid Molasses

Among carp anglers, molasses is one of the longest used liquid additives. Its appetite stimulating effect has long been known. Due to its extremely high sugar content the molasses makes all types of base mix and bait irresistible whether used alone or combined with other additives. Carp like both sweet and spicy flavours, so we can achieve great results using Liquid Molasses together with Robin Red. Making boilies, we can make our bait more attractive by adding 30-60 ml of liquid molasses to it. It is also good for the texture of our paste, because thanks to its features it holds the paste together and makes rolling easier.

Pack: 500 ml
Dosage: 30–60 ml / base mix
Flavour:
Strongly sweet 🍯

Garlic Oil

Garlic Oil is the most frequently used and most successful additive in Carp fishing. Regardless of the season and water temperature you can always rely on this pungent spicy flavour. It is a well-known fact that Carp really like the spicy flavours and thus the flavour of garlic. In addition to its feed stimulating effect, garlic impacts digestion positively. Many anglers use garlic flavour in waters that abound with dwarf Catfish because they are not overly enthusiastic about garlic. The SBS Garlic Oil is a strong concentrate, so be careful with dosing because, if overloaded, this additive has a reverse effect on the fish. Use this fantastic additive at any time of the year.

Pack: 20 ml
Dosage: 10-20 drops /1kg base mix
Flavour:
Garlic 🧄

HCl Betain

SBS Betaine is 98% pure, highly feed stimulating powdered additive having an incredible impact on Carp. It is one of the most well-proven appetite stimulators known and used by Carp anglers all over the world. Betaine has been used in commercial fish feeds for over 30 years as it increases intakes resulting in larger fish over a given period of time. It should not be left out of any good quality boilie, because without Betaine boilies are certainly less effective. Now you can obtain a 250 grams bottle at great prices. With its use, success is almost guaranteed.

Pack: 250 gr
Dosage: 5–10 gr/base mix
Flavour:
Betain 🐟

Concentrated Robin Red®

SBS supplies Original Haith's products. John E Haith Limited has recently celebrated their 75th anniversary and SBS has been buying Robin Red® for the past 25 years because it is one of the best highly concentrated additives. To protect against counterfeit products Haith's registered Robin Red® as a trademark and extended their co-operation with SBS. As a result of this collaboration SBS is one of the few companies that can sell the newly developed Robin Gold™, Robin Green™ and Robin Orange™.

Pack: 300 gr
Dosage: 5–10 gr/ 1kg base mix
Flavour:
Spicy

Robin Red® is a registered trade mark of John E Haith Limited. Robin Gold™, Robin Orange™ and Robin Green™ are trademarks of John E Haith Limited.

The Edge Extract

The Edge is a soluble, search, taste and feeding stimulant packed with micro nutrients which will trigger an intense feeding reaction. It has a slightly sour taste and it is characterised by a porous grainy structure. Due to its intense appetite stimulating impacts the application possibilities are endless. The Edge will enhance method mixes, pastes, maize, boilie mixes and even live hook baits. It is an indispensable key ingredient of any ground or hook bait.

Flavatract & Flavone

These are the appetite stimulator series from SBS, which will be available besides the existing ones with a new flavour called Squid. The Flavatract & Flavone is an additive in powder form that can be used as a main attractor in many base mixes. These products contain a complex group of appetite stimulators, digestion and flavour enhancers, and various trace elements. These products are the result of 15 years research for that elusive special element that will put more Carp on the bank. Adding small amounts of these appetite stimulators to your base mix, ground feed or paste will significantly increase your catch rates. These products are very concentrated, thus you need to be careful with dosage. 5 to 6 g of Flavatract & Flavone is sufficient for 1kg of base mix. The new squid flavour, used as a powder dip has shown extraordinary results in competitions, too; the SBS test anglers put many fish into the net with the use of this.

Pack: 100 gr
Dosage: 5–6 gr/ 1kg base mix
Flavours:
Fish, Gold Top, Squid

Green Lipped Mussel Extract

The green lipped mussel extract is a highly concentrated appetite stimulator and one of the natural food sources of Carp. Although it is a powdered extract derived from dried sea mussels, its content and flavour are very similar to freshwater shellfish. It is one of the most successful and popular appetite stimulating concentrates and many Carp anglers may thank this product for their fantastic catch results. It is a high protein food source rendering it irresistible to Carp. Its texture is highly porous and grainy. It can be added to base mixes and pastes but it will enhance any wetted hook bait as well. The Mussel Extract will significantly increase your catch rate. Warning: This is a highly concentrated product, use only small quantities to achieve the desired effect.

Pack: 100 gr
Dosage: 1–20 gr/ 1kg base mix
Flavour:
GLM 

Kelp Powder

Kelp Powder is derived from dried brown seaweed. Kelp comes from the coast of Norway where it grows in large quantities. It is high in Vitamin E and has a very distinctive taste and smell that Carp seem to like. This appetite stimulating concentrate is quite popular in Western Europe but more and more people have begun to recognise its powerful attraction to Carp. Some anglers will simply not make boilies without adding Kelp Powder. It is a highly concentrated additive, therefore it is important to observe the recommendations regarding levels of use.

Pack: 300 gr
Dosage: 1–20 gr/ 1kg base mix
Flavour:
Kelp

Black Pepper Oil

According to age-old observations Carp love strong and spicy flavours. Black pepper Oil is an essential oil recommended for anglers who want to create unique and unmatched baits and feeding materials. Be very careful when adding this product because, due to its high concentration an overdose may easily trigger alarming reactions in fish. Among the SBS boilie mixes, M1 would be unthinkable without black pepper oil as this oil provides its special, spicy nature.

Pack: 20 ml
Dosage: 20 drops/1kg base mix
Flavour:
Black Pepper 

Recommended periods – legend:

-  Spring-Autumn
-  Summer
-  Four season

High Taste Liquid Sweetener

High Taste Liquid Sweetener is as the name implies a very sweet, highly concentrated natural sweetener with exceptional appetite stimulating qualities. It is well known that Carp identify sweet tastes as natural food sources. It is an indispensable component of sweet mixes, but it can also be used with base mixes where you want to create a sweet background flavour. Primarily we recommend this additive for boilies prepared for spring and autumn sessions. The sweet taste of this product will harmonise with the taste of reeds, seaweed and bulrush appearing in spring. In autumn Carp will consume it as an easily digestible high energy food source as they prepare for the winter.

Pack: 50 ml

Dosage: 3-5 ml /1kg base mix

Flavour:

Very sweet

Recommended periods – legend:

Spring-Autumn

Summer

Four season

Liquid Liver

This product is a liquid version of liver powder. Most Carp anglers like to use liver powder as an indispensable compliment in fishy base mixes. The only disadvantage is that it is very costly. To compensate for this SBS has launched a liver extract concentrate in liquid form. Its biggest advantage is that added to eggs and the other liquid supplements it blends evenly in base mixes. Liquid Liver is very rich in amino acids and vitamins. SBS has tested many liquid liver extracts but this proved to achieve the best results of them all. The economical package contains enough liquid to add to 12 kg of base mix. Liquid Liver has an irresistible attraction power to carp that makes it an indispensable additive of fishy base mixes.

Pack: 250 ml

Dosage: 20 ml /1kg base mix

Flavour:

Liver

N-Butyric Acid

Many anglers have already discovered the positive effect of N-Butyric Acid or whey on fish. N-Butyric Acid is an appetite enhancing valuable food source produced during the lactic fermentation of maize. This is again an indispensable additive of any high-quality boilies. It should be handled very carefully, because due to its high concentration a few drops of it are sufficient to achieve the desired effect. On waters where fish are mainly fed on corn, outstanding results can be achieved with this product. Grass Carp adore its highly acidic taste, so if you go for Grass Carp you can use it diluted as a dip.

Pack: 20 ml

Dosage: 10 drops /1kg base mix

Flavour:

Very sour

The Gold Treasure

SBS Gold Treasure is a very special additive used to make unique and soluble boilies. From this year on a new 900 ml economical bottle is also available, besides the hugely popular 225 ml bottles for the committed Gold Treasure customers. The new 900 ml bottle is marketed for the anglers who wish to make a bigger quantity of soluble boilies. This quantity is enough for over 4 kg ground mix. In the past two years, soluble boilies have become a successful product for SBS. This bait produces fantastic results on intensively populated fishing venues. Once coming in contact with water Gold Treasure contributes to the dissolving of the components of the baits creating a very attractive and strong smelling haze round the feed. Soluble boilies are made without cooking. Soluble boilies have become an integral part of the SBS product line, a hallmark of highly effective boilies that really catch!

Pack:
225 ml and 900 ml

Dosage:
225 ml Gold Treasure + 150 ml mineral water / 1kg base mix

Flavour:
225 ml: Corn 900 ml: Corn 🌽

🌸 Spring-Autumn 🌞 Summer 🌸 Four season

Winterised Omega Red Salmon Oil

Red Salmon Oil is one of the finest oils which will rightly enrich any mix and will make your bait really effective in each season. It is perfect for summer sessions but its impact on fish in cold waters is unmatched. Its huge advantage compared with other oils is that it does not tend to congeal in cold waters, ensuring continuous flavour leakage. Thanks to its loose structure it does not thicken, this is easily demonstrated when put into the fridge in a small cup. If you want to prepare cold water boilies combine it with a flavour of the EA Range to get the most attracting boilies. Ethyl-alcohol based flavours combined with this fish oil are high impact baits even when the temperature of water is between 4 and 8 °C. Winterised Omega Red Salmon Oil is 98% digestible and is unbeatable in its class. This is an all year- round fish oil.

Pack: 500 ml
Dosage: 40 ml
Flavour:
Red Salmon 🐟

SBS mug

SBS branded mugs display our recognisable logo and website address on both sides. Ideal for tea, coffee or soup either at home or at the lakeside.

Important note: we do not recommend the use of the product in a dishwasher

SBS Thermo Mug

Be in style when you're fishing with our thermo mug. It has a removable plastic top and looks good with an official SBS logo. Hand wash only. Capacity: 330 ml

SBS bucket

A strong, securely sealed black plastic bucket with strong handles and a printed SBS logo that helps to keep 5 kg of your bait in prime condition.

SBS fan flag

SBS fan flag with official SBS design printed on the front.

Size: 100x75 cm

During the testing period of the 20+ Premium range we landed two Carp over 35 kgs. The one in the picture is 35.17 kg.

Zoltan Kovacs and Andras Szigetfalvi receive the „Biggest Fish in Section” trophy from Robert Valkeneer and Ross Honey at the Official Prize Giving Ceremony of the World Carp Classic 2011.

Recipes

Ace Lobworm Boilie 1 kg:

- Ace Lobworm Quest Base mix 1 kg
- 12 eggs (for the cooked boilies) or 225 ml Gold Treasure+150 ml water (for the soluble version)
- Ace Lobworm Liquid Attract 8 ml
- Natur attract 25 ml
- Attractamino 25 ml
- Winterished Omega Red Salmon oil 30 ml
- Betain HCl 5 g (about 1 tablespoon)
- The Edge extract 10 g (about 2 tablespoons)
- Flavone Savoury 2 g (about 1 teaspoon)
- Salt 10 g (about 1 heaped tablespoon)

M1 Boilie 1 kg:

- M1 Quest base mix 1kg
- 12 eggs (for the cooked boilies) or 225 ml Gold Treasure+150 ml water (for the soluble version)
- M1 Liquid Attract 8 ml
- Black pepper 10 drops
- Natur attract 25 ml
- Attractamino 25 ml
- Winterished Omega Red Salmon oil 30 ml
- Robin Red 5 g (about 1 tablespoon)
- Betain HCl 5 g (about 1 tablespoon)
- The Edge extract 10 g (about 2 tablespoons)
- Flavone Savoury 2 g (about 1 teaspoon)
- Salt 10 g (about 1 heaped tablespoon)

M3 Boilie 1 kg:

- M3 Quest Base mix 1 kg (0,5 kg Cream Seed - 0,5 kg M1)
- 2x5-6 eggs (for the cooked boilies) or 2x 112,5 ml Gold Treasure+2x75 ml water (for the soluble version)
- M3 Liquid Attract 2x 4 ml/ 2x
- Attractamino 2x 20 ml/ 2x
- Winterished Omega Red Salmon oil 2x 15ml/ 2x
- Betain HCl 2x 2,5 g (2x about 1 tk.)
- The Edge extract 2x 5 g (2x about 1 tablespoon)
- Flavone Savoury 2x 1 g (2x about half tablespoon)
- Salt 2x 5 g (2x about 1 tablespoon)

Bio Big Fish Boilie 1 kg:

- Bio Big Fish Quest Base Mix 1kg
- 12 eggs (for the cooked boilies) or 225 ml Gold Treasure+150 ml water (for the soluble version)
- Bio Big Fish Liquid Attract 8 ml
- Natur attract 25 ml
- Attractamino 25 ml mixed - K.M nuggets oil 30 ml
- Betain HCl 5 gr (about 1 tablespoon)
- The Edge extract 10 gr (about 2 tablespoons)
- Flavone Fish 2 g (about 1 teaspoon)
- Salt 10 g (about 1 heaped tablespoon)
