# **PRODUCT CATALOGUE**

## Dear Carp Anglers,

Welcome to SBS Tactical Baits. SBS is a name familiar to the majority of Carp anglers throughout the world. **For over 40 years the company has tested and improved upon its products**, continuously enhancing the raw materials used. Owing to its high quality products and on-going developments SBS has become an important participant in the bait production market.

SBS has a unique and world class website which provides much more information about the characteristics and use of the products than the usual anglers' sites. As part of this new trend, Zoltan has paid special attention to the match, feeder, and pole anglers; more and more products are launched specifically for these genres. The products presented in this catalogue are provided with detailed descriptions and as much information as possible. We truly hope that you will like the latest SBS Tactical Baits catalogue and, by using the information we have provided, you will find your way in the mysterious world of baits.

### Zoltán Kovács

Competition angler and owner of SBS

## ATTRACT NATURAL

SBS attractants are the life and soul of boilie making. These products cannot be imitated. Attract Natural has been used by satisfied Carp anglers for over 15 years and is one of the longest marketed attractants from SBS. The exact composition is a secret, but its natural ingredients include vitamins, proteins, high nutrient content and feed stimulating substances in a liquid form. One bottle of Attract Natural is enough for the preparation of 5kg of boilies. Attract Natural will give any type of boilie a marked edge as it is an all season attractant.

**Pack:** 125 ml

**Flavours:** Natural

## ATTRACTAMINO

Attractamino is rich in amino acids, pre-soaked liver and spleen, vitamins, minerals and natural ingredients. Thanks to its excellent composition Attractamino has long been used by Carp anglers with undiminished popularity. A bottle of Attractamino contains sufficient attractants to make 10kg of boilies. Thanks to its neutral flavouring it can be added to any boilie type giving them an edge all year round.

**Pack:** 250 ml

**Flavours:** Natural

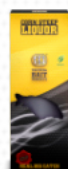

## ATTRACTAMINO PPC

The Attractamino PPC is a pre-digested food source. Its primary attraction is formed round PPC (phosphorylcolamine) an accepted Carp attractor which leaks very attracting food stimulating signals from the baits. Attractamino PPC is a very popular Carp attracting liquid food that contains fresh liver, spleen, amino acids and various minerals in liquid form. Attractamino PPC forms an intensely scented cloud just off of the bottom that is irresistible to Carp. Recommended dosage is 20 to 60 ml per 1kg of boilie mix. It can be used successfully in all seasons.

**Pack:** 250 ml

**Flavours:** Natural

## CORN STEEP LIQUOR

Corn Steep Liquor has become one of the most popular liquid foods available and one of the best Carp attractors of the decade. SBS is the market leader in the field of maize steep products and its success is based on nearly 20 years of testing and use. Corn Steep Liquor is derived from steeped maize grains resulting in a thick and rich smelling liquid which Carp find almost irresistible. It is made up of 30% protein, a well-defined amino acid profile, natural soluble sugars and essential vitamins and minerals. Pellets can be dipped into CSL liquid to give them a boost before casting out for feeding. It is the most popular pre-soaking additive of CSL Pellets in the SBS attractant range.

**Pack:** 500 ml

**Flavours:** CSL

## THE TONIC

SBS attractors are the life and soul of boilie making. These products cannot be imitated. Results for this product have been outstanding. The completely natural organic water-soluble food source is ideal for the enhancement of the overall impact of boilie mixes and hook baits. This concentrated natural organic formula is best used on its own at the rate of 30ml per 1kg of base mix or with low level flavours. It adds considerable food value to any mix and it is an effective, year-round food source and attractant that catches on even the hardest of waters. The Tonic is an attractant that works perfectly in the coldest of waters.

**Pack:** 250 ml

**Flavours:** Natural

## THE ORIGINAL WHISKY LINK

The Original Whiskey Link is a natural syrup used in whiskey making which contains 40% soluble protein extracts, free amino acids and sugars. It has an exceptionally rich alcoholic aroma which is a well-known attractor of Carp and Grass Carp. This liquid food plays an important role in the making of soluble boilies intended for use during winter sessions. Due to its alcohol content it inhibits the crystallization of Gold Treasure Liquid and furthers perfect break down of the boilies. It is an ideal soaking fluid for pellets, corn and other seeds and boilies. It is also an important additive in boilie making. Due to its alcohol content the Carp-luring aromas will be dispersed even in the coldest waters.

**Pack:** 500 ml

**Flavours:** Alcoholic

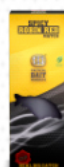

## CORN STEEP LIQUOR FLAVOURED

This is the flavoured version of Corn Steep Liquor which is available in 5 popular flavours. Corn Steep Liquor has become one of the most popular dietary supplements available in liquid form among Carp anglers during the last decade. SBS is the market leader in the field of maize steep products and its success is based on nearly 20 years of testing and use. Corn Steep Liquor is derived from steeped maize grains resulting in a thick and rich smelling liquid which Carp find irresistible. It is made up of 30% protein, a well-defined amino acid profile, natural soluble sugars and essential vitamins and minerals. Pellets can be dipped into CSL liquid to give them a boost before casting out and it is the most popular pre-soaking additive of CSL Pellets in the SBS attractant range.

**Pack:** 500 ml

**Flavours:** Cranberry, Fish & Liver, Frankfurter Sausage, Plum & Shellfish, Shellfish, Squid & Octopus, Strawberry Jam, Sweet Plum

## SPICY ROBIN RED

This product is a liquid feed stimulator containing original Robin Red concentrate. Thanks to the spicy character of the Robin Red it is a successful product all year round. This product is specially designed for match, feeder and pole anglers to make any method mix more prolific, because the strong spicy taste has feed stimulating effect on fish. If combined with a Method Mix of the same or similar taste and with various pellets you will get an excellent spicy mix.

**Pack:** 500 ml

**Flavours:** Spicy

## HOT & SPICY STIM MATCH

This extremely successful attractor is what large numbers of carp anglers like to use. Due to the spicy notes it has a strong appetite stimulating effect that works great, mainly in low and normal water temperatures. It can be used perfectly well with almost any kind of Method Mix, but it shows the best catch results with the combination of fishy and spicy mixes. Pellets and cooked seeds can be dipped in it. Many use it as a dip, and there are anglers who pour some drops of it into the paste kneaded around a hook bait. A versatile product that can be used in many different ways!

**Pack:** 500 ml

**Flavours:** Hot & Spicy

## PREMIUM SPOD JUICE

This specially formulated thick liquid with extremely high nutrient value has been developed by SBS primarily to soak seeds and pellets in to increase their attractiveness. The soaked pellets and seeds absorb the Spod Juice flavour due to the thick texture. The juice can be added to the Method mix you wish to use for feeding to make strongly adhesive balls which can be catapulted to the feeding spot. Available in the ten top quality Premium flavours, you are guaranteed to find the best flavour for every situation and season.

**Pack:** 1 l

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Phaze1, Tuna & Black Pepper

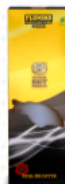

## CSL GROUNDBAIT MIXER

This Corn Steep-based liquid additive has been developed for the Match Attract Groundbait Mix in the same flavours. It contains nutrients rich in protein, natural sugars, free amino acids, vitamins and mineral salts. These ingredients are particularly attractive to Carp. Use it without dilution if a highly effective additive is required. If diluted, add 1 litre of water to 1 litre CSL Groundbait Mixer, in the latter case the 2 litres of liquid is enough to make 5 kg Groundbait Mix. Leave enough time for the grains of the Groundbait Mix to completely absorb the liquid. The CSL Groundbait Mixer is perfectly suited to flavour pellets, pastes and meaty baits.

**Pack:** 1 l

**Flavours:** Ace Lobworm, Frankfurter Sausage, Match Special, Shellfish, Squid & Octopus, Strawberry Jam, Tutti Frutti

## FLUMINO GROUNDBAIT MIXER

The contents of the World Record All In Flumino Box can be bought separately, as well, such as the Flumino Groundbait Mixer liquid. It will be launched in four flavours, two are recommended for cold waters, two for summer angling. This product was developed by the manufacturer for the groundbaits available in the All In Flumino Box, these products form a fantastic pairing. The 500 ml liquid is a sufficient quantity for the mixing of exactly 1 kg Flumino Groundbait. The overall impact of the mixed groundbait can be further enhanced with the Flumino Liquid Concentrate attractor. Out of this fluorescent, high-amino-containing liquid concentrate only a few drops are required on the groundbait, in the feeder or on the PVA mesh. If you want to get really quick results, choose the Flumino.

**Pack:** 1 l

**Flavours:** Cranberry, Liver, Match Special, N-Butyric, Squid & Octopus, Summer Pineapple, Undercover

## PREMIUM PVA LIQUID

## PREMIUM PVA LIQUID REFILL

Fishing with PVA bag is probably the best way of getting the quickest bite possible. To give it a bit of a boost, we recommend you to give it a few squirts of Premium PVA Liquid, which works really well with pellets and groundbaits. This effective and innovative range, Premium PVA liquid, comes in a 200 ml bottle. It is PVA friendly, flavoured and has been developed to use with PVA mesh and PVA bags, or you can put directly onto the hookbait or the groundbait in a feeder.

*This effective and innovative range, Premium PVA liquid, originally comes in a 200 ml bottle, so if you already have one, you can buy this 1000 ml bottle to refill it.*

**Pack:** 200 ml, Refill: 1 l

**Flavours:** Ace Lobworm, C1, Lemon & Orange, M1, Peach, Pineapple, Spice plum, Strawberry Jam

## EUROSTAR BOOST JUICE

This juice is a trump for any angling situation, and an excellent choice to boost the attraction of pellets, boilies, particles or groundbait. Thanks to the high quality ingredients, this denseness of liquid creates a highly effective, PVA friendly stimulant that you can combine with any presentation.

**Pack:** 300 ml

**Flavours:** Belachan, Cocoshell, Frankfurter Sausage, Garlic, Krill & Chili, Pineapple, Squid & Octopus, Squid & Octopus & Mulberry, Strawberry Jam, Tuna & Pineapple

## HCL BETAIN

SBS Betaine is 98% pure, highly feed stimulating powdered additive having an incredible impact on Carp. It is one of the most well-proven appetite stimulators known and used by Carp anglers all over the world. Betaine has been used in commercial fish feeds for over 30 years as it increases intakes resulting in larger fish over a given period of time. It should not be left out of any good quality boilie, because without Betaine boilies are certainly less effective. Now you can obtain a 250 grams bottle at great prices. With its use, success is almost guaranteed.

**Pack:** 200 g

**Flavours:** Natural

## CONCENTRATED ROBIN RED

This is an original Haith's Robin Red concentrate. Robin Red is one of the best and highly concentrated additives of the SBS range. Its place of origin is England where anglers have used it successfully in boilie pastes and ground baits for the past 25 years. As well as being a top catcher it can be used all year round in any base mix. This spicy additive is rich in vitamins and minerals and has excellent dyeing qualities. Use up to 10% in base mixes but in pastes it can be used up to 20%. Robin Red is a fantastic additive adored by Carp.

**Pack:** 300 g

**Flavours:** Spicy

## THE EDGE EXTRACT

The Edge is a soluble, search, taste and feeding stimulant packed with micro nutrients which will trigger an intense feeding reaction. It has a slightly sour taste and it is characterised by a porous grainy structure. Due to its intense appetite stimulating impacts the application possibilities are endless. The Edge will enhance method mixes, pastes, maize, boilie mixes and even live hook baits. It is an indispensable key ingredient of any ground or hook bait.

**Pack:** 150 g

**Flavours:** Natural

## FLAVATRACT & FLAVONE

These are the appetite stimulator series from SBS, which will be available besides the existing ones with a new flavour called Squid. The Flavatract & Flavone is an additive in powder form that can be used as a main attractor in many base mixes. These products contain a complex group of appetite stimulators, digestion and flavour enhancers, and various trace elements. These products are the result of 15 years research for that elusive special element that will put more Carp on the bank. Adding small amounts of these appetite stimulators to your base mix, ground feed or paste will significantly increase your catch rates. These products are very concentrated, thus you need to be careful with dosage. 5 to 6 g of Flavatract & Flavone is sufficient for 1kg of base mix. The new squid flavour, used as a powder dip has shown extraordinary results in competitions, too, the SBS test anglers put many fish into the net with the use of this.

**Pack:** 100 g

**Flavours:** Fish, Gold Top, Savoury, Squid & Octopus

## GREEN LIPPED MUSSEL EXTRACT

The green lipped mussel extract is a highly concentrated appetite stimulator and one of the natural food sources of Carp. Although it is a powdered extract derived from dried sea mussels, its content and flavour are very similar to freshwater shellfish. It is one of the most successful and popular appetite stimulating concentrates and many Carp anglers may thank this product for their fantastic catch results. It is a high protein food source rendering it irresistible to Carp. Its texture is highly porous and grainy. It can be added to base mixes and pastes but it will enhance any wetted hook bait as well. The Mussel Extract will significantly increase your catch rate.

*Warning: This is a highly concentrated product, use only small quantities to achieve the desired effect.*

**Pack:** 100 g

**Flavours:** GLM

## KELP POWDER

Kelp Powder is derived from dried brown seaweed. Kelp comes from the coast of Norway where it grows in large quantities. It is high in Vitamin E and has a very distinctive taste and smell that Carp seem to like. This appetite stimulating concentrate is quite popular in Western Europe but more and more people have begun to recognise its powerful attraction to Carp. Some anglers will simply not make boilies without adding Kelp Powder. It is a highly concentrated additive, therefore it is important to observe the recommendations regarding levels of use.

**Pack:** 200 g

**Flavours:** Kelp

## BLACK PEPPER OIL

According to age-old observations Carp love strong and spicy flavours. Black pepper Oil is an essential oil recommended for anglers who want to create unique and unmatched baits and feeding materials. Be very careful when adding this product because, due to its high concentration an overdose may easily trigger alarming reactions in fish. Among the SBS boilie mixes, M1 would be unthinkable without black pepper oil as this oil provides its special, spicy nature.

**Pack:** 20 ml

**Flavours:** Black Pepper

## GARLIC OIL

Garlic Oil is the most frequently used and most successful additive in Carp fishing. Regardless of the season and water temperature you can always rely on this pungent spicy flavour. It is a well-known fact that Carp really like the spicy flavours and thus the flavour of garlic. In addition to its feed stimulating effect, garlic impacts digestion positively. Many anglers use garlic flavour in waters that abound with dwarf Catfish because they are not overly enthusiastic about garlic. The SBS Garlic Oil is a strong concentrate, so be careful with dosing because, if overloaded, this additive has a reverse effect on the fish. Use this fantastic additive at any time of the year.

**Pack:** 20 ml

**Flavours:** Garlic

## HIGH TASTE LIQUID SWEETENER

High Taste Liquid Sweetener is as the name implies a very sweet, highly concentrated natural sweetener with exceptional appetite stimulating qualities. It is well known that Carp identify sweet tastes as natural food sources. It is an indispensable component of sweet mixes, but it can also be used with base mixes where you want to create a sweet background flavour. Primarily we recommend this additive for boilies prepared for spring and autumn sessions. The sweet taste of this product will harmonise with the taste of reeds, seaweed and bulrush appearing in spring. In autumn Carp will consume it as an easily digestible high energy food source as they prepare for the winter.

**Pack:** 50 ml

**Flavours:** Sweet

## LIQUID LIVER

This product is a liquid version of liver powder. Most Carp anglers like to use liver powder as an indispensable compliment in fishy base mixes. The only disadvantage is that it is very costly. To compensate for this SBS has launched a liver extract concentrate in liquid form. Its biggest advantage is that added to eggs and the other liquid supplements it blends evenly in base mixes. Liquid Liver is very rich in amino acids and vitamins. SBS has tested many liquid liver extracts but this proved to achieve the best results of them all. The economical package contains enough liquid to add to 12 kg of base mix. Liquid Liver has an irresistible attraction power to carp that makes it an indispensable additive of fishy base mixes.

**Pack:** 250 ml

**Flavours:** Liver

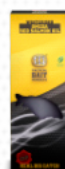

## N-BUTYRIC ACID

Many anglers have already discovered the positive effect of N-Butyric Acid or whey on fish. N-Butyric Acid is an appetite enhancing valuable food source produced during the lactic fermentation of maize. This is again an indispensable additive of any high-quality boilies. It should be handled very carefully, because due to its high concentration a few drops of it are sufficient to achieve the desired effect. On waters where fish are mainly fed on corn, outstanding results can be achieved with this product. Grass Carp adore its highly acidic taste, so if you go for Grass Carp you can use it diluted as a dip.

**Pack:** 20 ml

**Flavours:** Very Sour

## WINTERISED OMEGA RED SALMON OIL

Red Salmon Oil is one of the finest oils which will rightly enrich any mix and will make your bait really effective in each season. It is perfect for summer sessions but its impact on fish in cold waters is unmatched. Its huge advantage compared with other oils is that it does not tend to congeal in cold waters, ensuring continuous flavour leakage. Thanks to its loose structure it does not thicken, this is easily demonstrated when put into the fridge in a small cup. If you want to prepare cold water boilies combine it with a flavour of the EA Range to get the most attracting boilies. Ethyl-alcohol based flavours combined with this fish oil are high impact baits even when the temperature of water is between 4 and 8 °C. Winterised Omega Red Salmon Oil is 98% digestible and is unbeatable in its class. This is an all year- round fish oil.

**Pack:** 500 ml

**Flavours:** Red Salmon

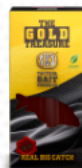

## GOLD TREASURE

SBS Gold Treasure is a very special additive used to make unique and soluble boilies. From this year on a new 900 ml economical bottle is also available, besides the hugely popular 225 ml bottles for the committed Gold Treasure customers. The new 900 ml bottle is marketed for the anglers who wish to make a bigger quantity of soluble boilies. This quantity is enough for over 4 kg ground mix. In the past two years, soluble boilies have become a successful product for SBS. This bait produces fantastic results on intensively populated fishing venues. Once coming in contact with water Gold Treasure contributes to the dissolving of the components of the baits creating a very attractive and strong smelling haze round the feed. Soluble boilies are made without cooking. Soluble boilies have become an integral part of the SBS product line, a hallmark of highly effective boilies that really catch!

**Pack:** 225 ml, 900 ml

**Flavours:** Corn

## GOLD TREASURE SPICY

This red coloured additive is completely identical to the traditional Gold Treasure with one exception, it contains Robin Red. Gold Treasure, together with this spicy attractor has an even stronger attraction enhancing effect. It has a special spicy corn scent. Almost every experienced angler knows well what an important role the two additives have played in Carp fishing. In Gold Treasure Spicy these two extremely important scents are combined and therefore the big fish, match, feeder, and pole anglers really like using it. Gold Treasure Spicy significantly increases the attraction properties of mixes and groundbait. This product is perfectly suited to flavour seeds and pellets, a great feed stimulator.

**Pack:** 225 ml, 900 ml

**Flavours:** Spicy

## SPECIAL POP UP MIX

This product has been launched by SBS to please the fans of home boilie-making. In addition to the home-made boilies created based on individual recipes, anyone will be able to create unique floating boilies with this additive. It is very easy to work with the Pop Up Powder, but please observe the advised quantities when preparing this mix. Add 50% groundmix to 50% Pop Up mix, this is a proportion of the weights, so e.g. add 100 gram Pop Up Mix to 100 gram groundmix. Add three times the usual quantity of the additives and flavours to the mix, then knead the dough. After rolling, leave the ready balls to rest for a few hours. The resting time is very important, because the Pop Up Mix absorbs the flavours of the additives slower than usual. After a few hours' resting them, boil the balls for 2 minutes. The home-made Pop Up boilies are ready after drying. The minimum drying time is 3 days. Create your individual floating boilies with the Special Pop Up Mix.

**Pack:** 200 g

**Flavours:** Natural

## CORK POWDER

More and more anglers are familiar with the concept of balanced bait. The wafter boilies occupy an illustrious place among our ready-made products. If you want to make this kind of bait at home, using SBS ground baits, you will also need cork grist. With these balanced baits you can be successful even in the most impossible and hopeless situations. This bait is most perfect, as its density is almost zero in the water, placing it in a fish tank it will sink to the bottom and react sensitively even to the smallest flows.

If you plan to make critically balanced hookbaits (wafers), we recommend you to put 25 gr cork powder to 1 kg of base mix.

**Pack:** 1 l

**Flavours:** Natural

## LIQUID MOLASSES

Among carp anglers, molasses is one of the longest used liquid additives. Its appetite stimulating effect has long been known. Due to its extremely high sugar content the molasses makes all types of base mix and bait irresistible whether used alone or combined with other additives. Carp like both sweet and spicy flavours, so we can achieve great results using Liquid Molasses together with Robin Red. Making boilies, we can make our bait more attractive by adding 30-60 ml of liquid molasses to it. It is also good for the texture of our paste, because thanks to its features it holds the paste together and makes rolling easier.

**Pack:** 500 ml

**Flavours:** Sweet

## FLUMINO LIQUID CONCENTRATE (VERTICAL, HORIZONTAL)

Perhaps the most important member of the Flumino range, which is nothing more than a fluorescent, high amino containing liquid concentrate. Two liquids with different characteristics will be launched: horizontal – spreading out on the bottom of the lake, and vertical – working through the entire water column. The horizontal is recommended for base feeding, it has to be poured in drops directly on the groundbait. With the vertical one the best results are attained by dropping it on the PVA mesh or the method lead. If the fish are in midwater, they can be attracted to the bottom by dropping vertical liquid on the PVA mesh. It is important to mention that the liquid is much less efficient when dropping it on the bait, than by applying the aforementioned methods. If you would like to achieve really quick results, choose the Flumino products!

**Pack:** 20 ml

**Feature:** vertical, horizontal

**Flavours:** Natural

## GERANIUM ESSENTIAL OIL

The origin of geranium oil is in South Africa, China and Egypt. The essential oil derived from the plant has a special fine, citrus scent. It is one of the most effective natural essential oils used for carp angling. It fits extremely well with sweet-smelly mixes. Like bergamot oil, just a few drops of it are enough for the base mix.

**Pack:** 20 ml

**Flavours:** Geranium

## BERGAMOT ESSENTIAL OIL

The bergamot tree originates in the tropical areas of Asia, but today it is grown in Italy and in Spain, as well. Its oil is extracted from the fruit by pressing. It has a pleasant scent, reminiscent of fresh fruit. It has a lower density than the water and thus spreads more easily in water. It is a highly concentrated essential oil, so just a few drops of it are enough for boilie making. Take the dosage of this product seriously!

**Pack:** 20 ml

**Flavours:** Bergamot

## 20+ PREMIUM READY-MADE BOILIES

SBS developed the 20+ series with the intention to meet the needs of the most fanatical big carp hunters. The name 20+ refers to 3 important characteristics of the product. First, it suggests the possibility to catch specifically big carp, also over 20 kg. Second, it refers to the size of the bait: it will be launched with the diameters of 20, 24 and 30mm. Third, we would like to emphasize its long-lasting qualities as, thanks to a special additive, it is guaranteed to last up to 20 hours in waters with strong silver fish populations. However, during the testing period the bait stayed on the hair rig for over 72 hours. The bait is based on the high-quality Premium series, but it stays on the hair longer than the normal Premium Boilies. Besides its durability it has to be stressed that this property has been achieved in a way that doesn't cause the bait to become less open in nature. If you angle in natural waters with poorer fish populations, or your goal is to stalk really big carp, the 20+ Premium Boilie is the best choice for you!

**Pack:** 1 kg, 5 kg

**Size:** 20 mm, 24 mm, 30 mm

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Tuna & Black Pepper

## PREMIUM READY-MADE BOILIES

In line with the traditions of the company, year on year SBS devotes great energy into developing new products with outstanding quality. The number of new products included in the Premium Ready-made Boilie range usually increases by 1 or 2 per year, with only the best and never-failing recipes launched in this range. You will find among them the Bio Big Fish and the Ace Lobworm Ready-made, which have been enormously popular in England for years.

As a novel bait for 2012, the flavour Phaze1 has been added to the series. This flavour was available in England previously and produced excellent results. Because of its sweet basic taste it promises to be one of the most popular baits for cold water angling.

**Pack:** 1 kg, 5 kg

**Size:** 14 mm, 16 mm, 18 mm, 20 mm

**Flavours:** Ace Lobworm, Bio Big Fish, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Phaze1, Tuna & Black Pepper

## PREMIUM READY-MADE BOILIES 150 GR

In line with the traditions of the company, year on year SBS devotes great energy into developing new products with outstanding quality. The number of new products included in the Premium Ready-made Boilie range usually increases by 1 or 2 per year, with only the best and never-failing recipes launched in this range. The 150 g tub of Premium boilies in size 20mm can be a great choice for all carp anglers who would like to try the various flavours first, before buying the 1 kg version.

**Pack:** 150 g

**Size:** 20 mm

**Flavours:** Ace Lobworm, Bio Big Fish, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Phaze1

## SOLUBLE PREMIUM READY-MADE BOILIES

The whole SBS Premium range is also available in soluble versions. Soluble Premium Boilies contain many attractants making them the perfect bait to achieve fantastic results. The soluble boilies are made using exactly the same ingredients as the cooked ones, the only difference is skipping the boiling process, which is compensated by adding Gold Treasure liquid. Soluble boilies differ in two ways from their cooked alternatives: the first significant difference is the impact it has on fish. Once coming into contact with water they instantly start to release small particles which form a flavour and aroma-rich cloud around the bait arousing the interest and stimulating the feeding instinct of fish in the area. Thanks to these properties it is very effective on waters where fish are in abundance. The second important difference is that they will dissolve off the hair rig in considerably less time than cooked boilies, so in waters where the quantity of silver fish is considerably more than Carp it is better to use traditional boilies.

**Pack:** 1 kg, 5 kg

**Size:** 20 mm

**Flavours:** Ace Lobworm, Bio Big Fish, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Phaze1, Tuna & Black Pepper

## EUROSTAR READY-MADE BOILIES

Eurostar are the most reasonably priced ready-made boilies from SBS. Its final recipe has been developed based on the experience of numerous European test anglers after many years of testing. The ready-made boilies are prepared with high quality ingredients containing all the necessary basic nutrients that Carp need. The 9 flavours in which the Eurostar ready-made boilies are available have been selected based on the preference feedback of fishermen across Europe. The wide selection of flavours ranges from a sweet, fruity character to a rather foul smelling flavour, or a combination of these. Effective bait for every season.

**Pack:** 1 kg, 5 kg

**Size:** 16 mm, 20 mm

**Flavours:** Belachan, Cocoshell, Cranberry, Cranberry & Black Caviar, Fish & Liver, Frankfurter Sausage, Garlic, Green Crab, Krill & Chili, Pineapple & Banana, Plum & Shellfish, Scopex, Shellfish Concentrate, Squid & Octopus, Squid Octopus & Strawberry Jam, Strawberry Jam, Sweet Plum, Tutti Frutti

## EUROSTAR READY-MADE BOILIES + 50 ML 3 IN ONE TURBO BAIT DIP

SBS offers a bonus dip with its best-priced ready-made boilies as a gift. The bonus 3-in-1 Turbo Bait Dip 50ml having the same flavour as the selected boilie significantly increases the odds of catching fish, especially if anglers only have a relatively short time for fishing. Baits dipped into dips continuously release flavours and scents which wake the interest of feeding Carp. The special offer goes for the most popular Eurostar flavours and anglers will receive a 3-in-1 Turbo Bait Dip of same flavour as the selected ready-made boilie.

**Pack:** 1 kg

**Size:** 20 mm

**Flavours:** Belachan, Cocoshell, Cranberry, Cranberry & Black Caviar, Fish & Liver, Frankfurter Sausage, Garlic, Green Crab, Pineapple & Banana, Plum & Shellfish, Scopex, Shellfish Concentrate, Squid & Octopus, Squid Octopus & Strawberry Jam, Strawberry Jam, Sweet Plum, Tutti Frutti

## EUROSTAR READY-MADE BOILIES 150 GR

Its final recipe has been developed based on the experience of numerous European test anglers after many years of testing. The ready-made boilies are prepared with high quality ingredients containing all the necessary basic nutrients that Carp need. The wide selection of flavours ranges from a sweet, fruity character to a rather foul smelling flavour, or a combination of these. Effective bait for every season. The 150 g tub of Eurostar boilies in size 20mm can be a great choice for all carp anglers who would like to try the various flavours first, before buying the 1 kg version.

**Pack:** 150 g

**Size:** 20 mm

**Flavours:** Frankfurter Sausage, Krill & Chili, Squid & Octopus, Strawberry Jam

## SOLUBLE EUROSTAR READY-MADE BOILIES

Based on the recipe of the Ready-made Eurostar Boilies, SBS has developed a soluble version made without eggs. Its composition is identical to that of the boiled version but eggs are replaced with Gold Treasure liquid. There is one huge difference between the two boilies, however, soluble boilies are made without cooking, and thus all the valuable nutrients remain. As a result, a nutrient rich cloud develops around the bait which will lure Carp that are not even hungry, encouraging them to feed. Soluble boilies are recommended for use in waters with above average Carp stock, because the bait will dissolve off the hair rig within 2 to 6 hours, depending on the temperature of the water.

**Pack:** 1 kg, 5 kg

**Size:** 20 mm

**Flavours:** Belachan, Cocoshell, Cranberry, Cranberry & Black Caviar, Fish & Liver, Frankfurter Sausage, Garlic, Green Crab, Krill & Chili, Plum & Shellfish, Shellfish Concentrate, Squid & Octopus, Squid Octopus & Strawberry Jam, Strawberry Jam, Sweet Plum

## FLUMINO READY-MADE BOILIES

Do you want to try a very effective, but affordable bait? If yes, then try the newest product in the Flumino range. The Flumino boilie will be a favourite of many carp anglers, because it is based on the proven Flumino Ground bait that has an outstanding track record. We recommend that the cooked version of the Flumino boilie be used on well stocked waters. It is important to note that you can have instant success with this boilie, but it is also possible that the fish will tire of it after a while. The Flumino ready-made is unbeatable bait for the one day sessions. If you want to have instant success, then choose Flumino products!

**Pack:** 1 kg

**Size:** 20 mm

**Flavours:** Pineapple, Squid & Octopus

## SOLUBLE FLUMINO READY-MADE BOILIES

The Soluble version of the Flumino boilie. With this bait, the carp will find our feed even faster. Do you want to try a very effective, but affordable bait? If yes, then try with the newest product in the Flumino range. The Flumino boilie will be a favourite of many carp anglers, because it is based on the proven Flumino Ground bait that has an outstanding track record. We recommend that the soluble version of the Flumino boilie be used on well stocked waters. It is important to note that you can have instant success with this soluble boilie, but it is also possible that the fish will tire of it after a while. The Soluble Flumino ready-made is unbeatable bait for the one day sessions. If you want to have instant success, then choose Flumino products!

**Pack:** 1 kg

**Size:** 20 mm

**Flavours:** Pineapple, Squid & Octopus

## EUROBASE READY-MADE BOILIES

Quality at an affordable price. We know that many carp anglers were waiting for SBS to come out with a more affordable product. The question of many people is, how can the price be so low without making the quality lower? The answer is simple: experimentation, product development, and continual testing. It is true that the most expensive additives that are often used by SBS are missing from the ingredients, but we have managed to develop a product that is easily digestible for carp and can successfully be used on longer sessions. It is important to note that the flavours are the same in these baits as the ones used in the more expensive products. We recommend this bait be used away from competitive fishing and in situations when it is reasonable to feed a larger quantity. This bait fits the big waters, the well-stocked reservoirs, the rivers, and all other kinds of water. If you go on a longer session or to big natural water, then take EuroBase Ready-Made boilies!

**Pack:** 1 kg

**Size:** 20 mm, 24 mm

**Flavours:** Frankfurter Sausage, Garlic, Krill, Squid & Octopus, Squid & Octopus & Mulberry, Strawberry Jam, Tigernut

## SOLUBLE EUROBASE READY-MADE BOILIES

Quality at an affordable price. We know that many carp anglers were waiting for SBS to come out with a more affordable product. The question of many people is, how could the price be so low without making the quality lower? The answer is simple: experimentation, product development, and continual testing. It is true that the most expensive additives that are often used by SBS are missing from the ingredients, but we have managed to develop a product that is easily digestible for carp and can successfully be used on longer sessions. It is also available in a soluble version. It is important to note that the flavours are the same in these baits as the ones used in the more expensive products. We recommend this bait be used away from competitive fishing and in situations when it is reasonable to feed a larger quantity. It is soluble, so the fish will find our feed faster.

**Pack:** 1 kg

**Size:** 20 mm, 24 mm

**Flavours:** Frankfurter Sausage, Garlic, Krill, Squid & Octopus, Squid & Octopus & Mulberry, Strawberry Jam, Tigernut

## CORN SHAPED POPPER BOILIES

These special small corn shaped boilies of 8 mm and 10 mm are one of SBS's own developments and they can be used very effectively for feeder, match, pole and big fish angling. It looks like corn but it is made from exactly the same ingredients as top quality boilies. It is available in Sinkers and Popper (Pop Up) also, offering a great number of hook bait variation possibilities. It has a very characteristic smell and its high N-butyric content makes it irresistible to Carp and Grass Carp. Fantastic results can be achieved with the White Peppercorn flavouring in the winter months.

**Pack:** 40 g

**Size:** 8, 10 mm

**Flavours:** C2, C3, Corn, Krill & Halibut, Lemon & Orange, M1, M4, Peach, Pineapple, Squid & Octopus, Strawberry Jam, White Pepper Corn

## SOLUBLE CORN SHAPED POPPER BOILIES

These special, small corn-shaped boilies of 8 mm and 10 mm, are one of SBS's own developments and they can be used very effectively for feeder, match, pole and big fish angling. The soluble Popper (Pop Up) version looks like corn, made from exactly the same ingredients as top quality boilies and combines the floating and dissolving features in the same bait. What an amazing attraction in a small hookbait!

**Pack:** 20 g

**Size:** 8, 10 mm

**Flavours:** Corn, Lemon & Orange, M1, Peach, Pineapple, Squid & Octopus, Strawberry Jam, White Pepper Corn

## CSL HOOKER POP UPS

The CSL Hooker Pop Ups are actually hybrid boilies in a pellet shape. They contain large amounts of Corn Steep Liquid, feed stimulating soluble attractants and betaine. They are made of half boilie mix and half of the ingredients used to make CSL pellets. The wide range of flavourings makes them an effective bait in any situation during any period. It is best to use CSL pellets and/or Betaine Attract Pellets for the ground bait together with the CSL Hooker Pop Ups. Each box contains a 25 ml bottle of feed stimulating liquid as well as the Hooker Pop Ups of the same flavour. It is advisable to soak the hook baits in the attractant liquid for 24 to 48 hours before the fishing session to give them an edge.

**Pack:** 100 g

**Size:** 16 mm

**Flavours:** Black Caviar, Cranberry, Fish & Liver, Frankfurter Sausage, Green Crab, Pineapple & Banana, Plum & Shellfish, Shellfish Concentrate, Squid & Octopus, Strawberry Jam, Tutti Frutti

## EURO SHELF LIFE POP UPS 40 GR

This is the Pop Up boilie from the extremely popular Eurostar line which has wide selection of flavours at reasonable prices. The addition of granulated cork ensures that they remain buoyant for very long periods. Tests have indicated that this bait stays floating for at least 48 hours. They are extremely tough and durable and are able to withstand the attention of small silver fish and Catfish, thus the bait presented on the hair rig will be in perfect condition until the arrival of the first large fish. By using CSL Session Dip in cold waters and a 3 in 1 Turbo Bait Dip when the temperature of the water is above 10 °C the attraction power of the bait can be increased significantly.

**Pack:** 40 g

**Size:** 14 mm, 16, 18, 20 mm

**Flavours:** Belachan, Cocoshell, Frankfurter Sausage, Garlic, Squid & Octopus, Strawberry Jam

## SOLUBLE FLUMINO POP UPS

This product is the same as the soluble bait found in the All In Flumino Box, and like other Flumino products, can also be bought separately. It will be launched in two flavours, Pineapple and Squid & Octopus which were used when setting up the world record. This bait is very interesting, because besides the soluble character and vibrant colour, an extra quantity of aroma has been added to it. These three characteristics make it extremely effective. We can be more successful on waters where fish are in abundance with the use of this product than with a normal pop up bait. The package contains baits of 16 mm. We recommend using this not only with Flumino products, but also combined with any kind of Method Mix or Groundbait. If you want to achieve really quick results, choose the Flumino products!

**Pack:** 100 g

**Size:** 16 mm

**Flavours:** Pineapple, Squid & Octopus

## FLUMINO POP UPS

This product is the same as the bait found in the All In Flumino Box, and like other Flumino products, this can be bought separately as well. It will be launched in two flavours, Pineapple and Squid & Octopus, which were used when setting the world record. These differ in consistency and in floating capacity. The Flumino Pop Ups have greater buoyancy and harder consistency, so it can withstand the increased stress better. There are three sizes in the box, this way we can adjust the bait to the size of the hook. We recommend using this not only with Flumino products, but it can be combined with any kind of Method Mix or Groundbait. If you want to achieve really quick results, choose the Flumino products!

**Pack:** 100 g

**Size:** 10, 12, 14 mm

**Flavours:** Pineapple, Squid & Octopus

## FLURO POP UPS

These are very intensive coloured buoyant baits. It is well known that Carp are curious and are often not able to overcome their curiosity. The bright colour of the Fluro Pop Ups will certainly distinguish this bait from other baits attracting the interest of Carp. Based on these observations many anglers use these baits successfully. The Pineapple flavoured Fluro Pop Up is one of the most effective Grass Carp baits presented at 2 to 3 cm from the bottom on a rig. The new colours and flavours offered in this product line provide new opportunities in the use of Fluro Pop Up baits.

**Pack:** 100 g

**Size:** 10, 12, 14 mm, 16, 18, 20 mm

**Flavours:** Bananarama, Cranberry, Frankfurter Sausage, Garlic, Lemon & Orange, Peach, Pineapple, Shellfish, Squid & Octopus, Strawberry Jam

## FLURO POP UPS 10 MM

These are very intensive coloured buoyant baits. It is well known that Carp are curious and are often not able to overcome their curiosity. The bright colour of the Fluro Pop Ups will certainly distinguish this bait from other baits attracting the interest of Carp. Based on these observations many anglers use these baits successfully in all situations.

**Pack:** 20 g

**Size:** 10 mm

**Flavours:** Frankfurter Sausage, Garlic, Lemon & Orange, Peach, Pineapple, Squid & Octopus, Strawberry Jam

## FLURO POP UPS 14 MM

These are very intensive coloured buoyant baits. It is well known that Carp are curious and are often not able to overcome their curiosity. The bright colour of the Fluro Pop Ups will certainly distinguish this bait from other baits attracting the interest of Carp. Based on these observations many anglers use these baits successfully in all situations.

**Pack:** 40 g

**Size:** 14 mm

**Flavours:** Frankfurter Sausage, Garlic, Lemon & Orange, Peach, Pineapple, Squid & Octopus, Strawberry Jam

## SOLUBLE FLURO POP UPS 10 MM

A fantastic and novel bait in the Hi Vis Fluro Pop Up bait line which floats and dissolves. The idea is not new, because previously we have combined these features at our Soluble Premium Pop Up range. The Soluble Hi Vis Fluro Pop Up brings success during poor catching periods. We recommend it on waters where fish are in abundance and for cold water fishing, this bait is simply unbeatable in such situations. Use this great bait wherever you wish below a water temperature of 12 °C. However, in the summertime stick to the INSOLUBLE Pop Up version if there are less silver fish and more dwarf Catfish in the water. Try this bait and you will have success even in the most extreme conditions.

**Pack:** 20 g

**Size:** 10 mm

**Flavours:** Garlic, Lemon & Orange, M1, Peach, Pineapple, Squid & Octopus, Strawberry Jam

## SOLUBLE FLURO POP UPS 14 MM

A fantastic and novel bait in the Hi Vis Fluro Pop Up bait line which floats and dissolves. The idea is not new, because previously we have combined these features at our Soluble Premium Pop Up range. The Soluble Hi Vis Fluro Pop Up brings success during poor catching periods. We recommend it on waters where fish are in abundance and for cold water fishing, this bait is simply unbeatable in such situations. Use this great bait wherever you wish below a water temperature of 12 °C. However, in the summertime stick to the INSOLUBLE Pop Up version if there are less silver fish and more dwarf Catfish in the water. Try this bait and you will have success even in the most extreme conditions.

**Pack:** 40 g

**Size:** 14 mm

**Flavours:** Garlic, Lemon & Orange, M1, Peach, Pineapple, Squid & Octopus, Strawberry Jam

## MINI FLURO POP UPS

These extra buoyant, needle-friendly mini pop ups give you the perfect solution on hard days when you need to scale down your end tackle. Using a method feeder it is surely a must-have bait throughout the whole season.

**Pack:** 20 g

**Size:** 8 mm

**Flavours:** Cranberry, Frankfurter Sausage, Garlic, Lemon & Orange, Mango, N-Butyric, Natural, Peach, Pineapple, Squid & Octopus, Strawberry Jam

## MINI METHOD POP UPS

New mini bait on the front, especially for those, who use the method feeder technique! The Mini Method Pop Up combines four important features (small size, pop up, and dumbbell shape) that can help you to have a successful fishing session! The useage of a small size bait is important during the method technique, as fish can pick it up easily and it is also easy to hide in the filled method feeder. The bait floats in the water on its own, but combined with a smaller hook it remains on the bottom like a balanced wafers hookbait.

**Pack:** 20 g

**Size:** 8, 10 mm

**Flavours:** Garlic, Lemon & Orange, M1, Mango, Peach, Pineapple, Squid & Octopus, Strawberry Jam

## SOLUBLE MINI METHOD POP UPS

New mini bait on the front, especially for those, who use the method feeder technique! The Soluble Mini Method Pop Up combines four important features (small size, pop up, soluble, dumbbell shape) that can help you to have a successful fishing session! The useage of a small size bait is important during the method technique, as fish can pick it up easily and it is also easy to hide in the filled method feeder. The bait floats in the water on its own, but combined with a smaller hook it remains on the bottom like a balanced wafers hookbait.

**Pack:** 20 g

**Size:** 8, 10 mm

**Flavours:** Garlic, Lemon & Orange, M1, Mango, Peach, Pineapple, Squid & Octopus, Strawberry Jam

## 20+ PREMIUM POP UPS

SBS developed the 20+ series with the intention to meet the needs of even the most fanatical big carp hunter. This bait has greater buoyancy than Pop Ups usually have. A 20 mm Pop Up bait is capable of lifting a 20 mm sinker, a 22 mm Pop Up a 24 mm sinker, a 24 mm Pop Up a 30 mm sinker! This bait has not accidentally inherited such great buoyancy. We achieve the most balanced bait by adding weight to the above mentioned pairings to ensure the bait sits on the bottom. This way we can deceive even the most artful old carp, without being concerned by smaller carp, because of the selective property of the bait size. It means we can have the maximum chance to stalk a really big fish!

The name 20+ refers to 3 important characteristics of the product. First, it suggests the possibility to catch specifically big carp, also over 20 kg. Second, it refers to the size of the bait: it will be launched with the diameters of 20, 22, 24 mm. Third, we would like to emphasize its long-lasting qualities as, thanks to a special additive, it is guaranteed to last up to 20 hours in waters with strong silver fish populations.

**Pack:** 150 g

**Size:** 20, 22, 24 mm

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4

## PREMIUM M1 WHITE POP UPS

Based on our experience we can say without any doubt that the colour and the flavour of this bait have a significant impact on the feeding of the fish. Usually there is one matching color to each flavour, for example the M1 Pop Up baits were red up till now... The red color works very well, usually, but in several conditions (like dark - silty or peaty lakebed) the white is the most attractive colour. From now on, the M1 pop up boilies are available in white colour too, so we have another choice in terms of hookbaits to go after the carp!

**Pack:** 100 g

**Size:** 10, 12, 14 mm, 16, 18, 20 mm

**Flavours:** M1

## PREMIUM MINI POP UPS

The use of small hookbaits is proven to be effective in almost any situation. This bait is a top favourite during the colder months and an all-round winner at any time of year when using the popular method-feeder technique. Amazing buoyancy is achieved without compromising its easy-to-mount on a hair quality.

**Pack:** 20 g

**Size:** 8 mm

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M4, Tuna & Black Pepper

## PREMIUM POP UPS

Fantastic results were achieved with Premium Pop Ups during the past year. Warren Harrison broke the Common Carp record at Rainbow Lake with a 35.4 kg Mirror on the Ace Lobworm Pop Up boilie. If you use Premium boilies for your free offerings it is worth matching them with the same type of Pop Up. Pop Ups offer various application possibilities. On waters where dwarf Catfish are quite common, many anglers use the levitation method to trick these small hungry predators. In such cases the snowman presentation method may prove very effective by fixing one sinker and one pop up on the rig. This presentation method is able to select Carp from a certain size and at the same time a lightweight bait is presented which will trick even cautious and wary old specimens. They are effective on muddy and weedy riverbeds, during poor catching periods or when Grass Carp are the target. From this year on anglers can choose from two types of packages containing 3 different sized boilies: the smaller 10, 12 and 14mm box or the larger 16, 18 and 20 mm sizes.

**Pack:** 100 g

**Size:** 10, 12, 14 mm, 16, 18, 20 mm

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Tuna & Black Pepper

## SOLUBLE PREMIUM POP UPS

A fantastic and novel bait in the Pop Up bait line which floats and dissolves. The latest SBS invention combines two extremely popular baits. The Soluble Premium Pop Up brings success during poor catching periods. We recommend it on waters where fish are in abundance and for cold water fishing, this bait is simply unbeatable in such situations. Use this great bait wherever you wish below a water temperature of 12 °C. However, in the summertime stick to the INSOLUBLE Pop Up version if there are less silver fish and more dwarf Catfish in the water. Try this bait and you will have success even in the most extreme conditions.

**Pack:** 100 g

**Size:** 16, 18, 20 mm

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4

## CREATIVE POP UPS

Be versatile and customize quickly to the specific angling situation! The choice of 5 colours and 4 flavours give you the edge with unlimited combinations for your hookbait. Be creative and you'll be the rising star on the bankside. The box includes 5 different colored (white, black, yellow, orange and red), 10 mm non-flavoured pop ups with 4 small tub of flavours (M1, Pineapple, Strawberry Jam, Squid & Octopus - 2 ml/tub), what you can use to boost your hookbait.

**Pack:** 20 g

**Size:** 10 mm, 14 mm

**Flavours:** natural, you can boost the pop ups with the 4 small tub of flavours

## DARK FIREFLYS POP UPS

This is a very special and unique bait developed by SBS. It is a buoyant boilie with another important feature, it glows softly in the dark. It has been remarked that glowing things attract the interest of Carp. Recently an increasing number of anglers have been using these fluorescent Pop Ups with great success. People are not sceptical about these new types of baits and more and more anglers turn to them after hearing about their extraordinary effectiveness.

**Pack:** 25 pc/package

**Size:** 15 mm

**Flavours:** Frankfurter Sausage, Pineapple, Squid & Octopus, Strawberry Jam

## CORN SHAPED SINKER BOILIES

These special small corn shaped boilies of 8 mm and 10 mm are one of SBS's own developments and they can be used very effectively for feeder, match, pole and big fish angling. It looks like corn but it is made from exactly the same ingredients as top quality boilies. It is available in Sinkers and Popper (Pop Up) also, offering a great number of hook bait variation possibilities. It has a very characteristic smell and its high N-butyric content makes it irresistible to Carp and Grass Carp. Fantastic results can be achieved with the White Peppercorn flavouring in the winter months.

**Pack:** 60 g

**Size:** 8, 10 mm

**Flavours:** C2, C3, Corn, Krill & Halibut, Lemon & Orange, M1, M4, Peach, Pineapple, Squid & Octopus, White Pepper Corn

## CSL HOOKERS

The CSL Hookers pellet is actually a hybrid boilie in a pellet shape. It contains large amounts of corn sprout extracts, soluble Carp feeding stimulating attractants and betaine. It is a mixture of 50% boilie mix and 50% CSL pellet material. Thanks to these ingredients and the variety of flavours, CSL Hookers can be very effective for any season. You will achieve the best results with these baits if CSL pellets and / or Attract Betaine Pellet are used for the ground feed in the selected location. In addition to the hook pellets each box contains a 25 ml bottle of feed stimulating liquid in the same flavour as indicated on the packaging of the CSL Hookers. Pour some of the liquid attractant on the pellets 24 to 48 hours before your fishing session to absorb as much flavour as possible.

**Pack:** 150 g

**Size:** 16 mm

**Flavours:** Black Caviar, Cranberry, Fish & Liver, Frankfurter Sausage, Green Crab, Pineapple & Banana, Plum & Shellfish, Scopex, Shellfish Concentrate, Squid & Octopus, Strawberry Jam, Sweet Plum, Tutti Frutti

## PREMIUM LONGLIFE READYMADES MINIBOILIES

This is another of SBS's own developments, boilies specifically formulated for feeder, match and pole anglers. As mentioned in the introduction section of sinkers many proven fishing techniques and tricks have been exchanged by feeder, match, pole anglers and big fish hunters. Longlife Premium Miniboilies are very effective no matter which fishing style is used to catch Carp. The package contains 10, 12 and 14mm hook boilies and they are available in all 10 flavours of the Premium range. It is advisable to choose appropriate hook baits for each season. Its effectiveness can be enhanced if the method mix and/or pellets used for ground feeding are matched by your hook bait.

**Pack:** 150 g

**Size:** 10, 12, 14 mm

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4

## PREMIUM MINI DUMBBELLS

This new and very special dumbbell shaped boilie, is named Premium Mini Dumbbells. The novel attribute of this boilie is its unusual shape. Since Carp can become suspicious of ball shaped boilies, it is increasingly difficult to fool them. Even the most wary carp will snap up the unfamiliar shape of this small bait, because they have never seen anything like it before. This intense smelling 8–10mm hook bait comes in the most popular Premium flavours containing natural attractors, vitamins and minerals.

**Pack:** 50 g

**Size:** 8 mm

**Flavours:** Ace Lobworm, C1, C2, C3, M1, M4

## SOLUBLE PREMIUM LONGLIFE READYMADES MINIBOILIES

This bait also guarantees great success for feeder, match, and pole anglers. SBS Premium Longlife Readymade Miniboilies will now be available in soluble version. The soluble boilies are the most effective baits, forming a flavour and aroma rich haze around the bait presenting an irresistible delicacy to the Carp. The package contains 10, 12 and 14 mm hook boilies and they are available in all 10 flavours of the Premium range. It is advisable to choose appropriate hook baits for the season. Its effectiveness can be enhanced if the method mix and/or pellets used for ground feeding are matched to your hook bait.

**Pack:** 150 g

**Size:** 10, 12, 14 mm

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4

## SOLUBLE PREMIUM READY-MADE BOILIES

The whole SBS Premium range is also available in soluble versions. Soluble Premium Boilies contain many attractants making them the perfect bait to achieve fantastic results. The soluble boilies are made using exactly the same ingredients as the cooked ones, the only difference is skipping the boiling process, which is compensated by adding Gold Treasure liquid. Soluble boilies differ in two ways from their cooked alternatives: the first significant difference is the impact it has on fish. Once coming into contact with water they instantly start to release small particles which form a flavour and aroma-rich cloud around the bait arousing the interest and stimulating the feeding instinct of fish in the area. Thanks to these properties it is very effective on waters where fish are in abundance. The second important difference is that they will dissolve off the hair rig in considerably less time than cooked boilies, so in waters where the quantity of silver fish is considerably more than Carp it is better to use traditional boilies.

**Pack:** 1 kg, 5 kg, 250 g

**Size:** 16, 18, 20 mm, 20 mm

**Flavours:** Ace Lobworm, Bio Big Fish, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Phaze1, Tuna & Black Pepper

## SOLUBLE EUROSTAR BOILIE WAFERS

Two revolutionary ideas in one! These high-attract, critically balanced hookbaits, combined with a soluble feature, provide the edge you need on those hard-fished waters and a good chance to have the Real Big Catch!

**Pack:** 100 g

**Size:** 20 mm, 24 mm

**Flavours:** Frankfurter Sausage, Garlic, Squid & Octopus, Strawberry Jam

## 20+ PREMIUM BOILIE WAFERS

SBS developed the 20+ series with the intention to meet the needs of even the most fanatical big carp hunter. The 20 + Premium Waffer, just like the sinking version, provides exceptional longevity and thanks to its balanced character we can deceive even the most cautious carp with it. The name 20+ refers to 3 important characteristics of the product. First, it suggests the possibility to catch specifically big carp, also over 20 kg. Second, it refers to the size of the bait: it will be launched with the diameters of 20, 22, 24, 28 and 30 mm. Third, we would like to emphasize its long-lasting qualities as, thanks to a special additive, it is guaranteed to last up to 20 hours in waters with strong silver fish populations. However, during the testing period the bait stayed on the hair rig for over 72 hours. The bait is based on the high-quality Premium series, but it stays on the hair longer than the normal Premium Boilies.

**Pack:** 250 g

**Size:** 20, 24, 30 mm

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Tuna & Black Pepper

## PREMIUM BOILIE WAFERS

These baits are the top quality wafers in the SBS range. Anglers will find 3 sizes in one box and they can choose between packages of smaller or larger sizes: 10, 12 and 14 mm or 16, 18 and 20 mm wafers. These premium quality baits, intended for use on hair rigs, are available in 9 different flavours. Many people have seen underwater images of feeding Carp. Due to the suction movement of the Carp's mouth aquatic plants, small plant debris and leaves at a distance of 15–20 cm from the mouth of the Carp are swallowed together with the desired food. That is precisely what happens during the use of wafers, Carp simply suck up this lightweight hook bait. In cold-water fishing situations when the temperature of water is less than 8 °C the feeding intensity of fish is significantly decreased because their metabolism has slowed down. Wafers offer an excellent solution for such periods or during periods of high angling pressure.

**Pack:** 100 g

**Size:** 10, 12, 14 mm, 16, 18, 20 mm

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4

## SOLUBLE PREMIUM BOILIE WAFERS

Two revolutionary ideas in one! These high-attract, critically balanced hookbaits, combined with a soluble feature, provide the edge you need on those hard-fished waters and a good chance to have the Real Big Catch!

**Pack:** 100 g

**Size:** 20 mm, 24 mm

**Flavours:** C1, C2, C3, M1, M4

## SOLUBLE PREMIUM BOILIE WAFERS 40 GR

Two revolutionary ideas in one! These high-attract, critically balanced hookbaits, combined with a soluble feature, provide the edge you need on those hard-fished waters and a good chance to have the Real Big Catch!

**Pack:** 40 g

**Size:** 10, 12, 14 mm

**Flavours:** C1, C2, C3, M1, M4

## DOUBLE TRICK BOILIE WAFERS

Because of the popularity of the Double Trick Boilies SBS has moved forward with the development of this superb bait, from now on it will be available with a balanced wafers core. The core of this hybrid boilie is cooked while the outer shell is soluble. The 14 mm diameter core inside the bait is balanced with cork, which is why you have a good chance of catching the most careful carp even if the 6 mm outer layer breaks down. The baits will not soften or fall off the rig because the cooked core will stay on for up to 24 hours. The time for the outer layer to dissolve depends on the water temperature, but usually it takes about 2 to 3 hours. Double Trick boilies are available in the flavours of our top category Premium series. Give this revolutionary new bait a try if you want to know for sure.

**Pack:** 150 g

**Size:** 20 mm

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Tuna & Black Pepper

## CORN BOOSTER DIP

This is a strong corn-smelling dip developed especially for our Corn Shaped Boilies, but any type of baits will benefit from it. This 50ml product is extremely popular among match, feeder, and pole anglers as it is effective all year round. We can guarantee that Carp regard this flavour as a sure food source. It is a PVA friendly product.

**Pack:** 50 ml

**Flavours:** Corn

## PREMIUM BAIT DIP

This bait dip is from the top quality Premium range and is simply the best dip available from SBS. If you are using Premium hook baits this is a perfect addition because it contains all the fish-catching properties of the basic mix in liquid form. It has the perfect combination of vitamins, aromas and different feed stimulating attractors making Premium Bait Dip extremely irresistible to fish. It is available in 12 different flavours. It is important to keep in mind the indicated season when selecting a flavour. Even the best baits will not be as effective if not chosen for the right season.

Premium dips can be used safely with PVA bags because they are not water based and do not dissolve PVA.

**Pack:** 80 ml, 250 ml

**Flavours:** Ace Lobworm, Bio Big Fish, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Phaze1, Tuna & Black Pepper

## 3 IN ONE FLURO POWDER DIP

There are two types of powder in the 3 in 1 Fluro Powder Dip package, each properly sealed and separated. The 150g powder dip with particularly attractive scent and flavour found in the bottom of the package will leak from the bait shortly after submerged in water. The brightly coloured 25g Fluro Powder in the upper part of the package is also flavoured but it will not wash out of the bait. As the product's name implies, this ancillary bait offers three application possibilities. We recommend the first use in most situations. Firstly, it is sufficient to use the flavoured powder dip on lakes where fish are in abundance and the water is relatively shallow (2 m). On such lakes the water is usually rather cloudy (especially when the water's temperature is relatively high). In this cloudy water the Carp relies on its senses while eating thus there is no point in using the Fluro Powder. Wet the bait's surface then roll it in the Powder Dip. The Powder Dip will wash off and surround the bait once submerged in water. The dip will leak flavours and aromas and attract the nearby fish to your bait. The second use is just the other way around. In deep lakes or in clear water (even in shallower lakes in spring and autumn) the Fluro Powder's use takes on special importance. Simply dip the bait in the water then roll it in the Fluro Powder. The Fluro Powder does not soak off of the bait when submerged in water thus the powder's vivid colour and flavour will attract the interest of Carp. The third opportunity is to use the two powders together, again, the water should be clear and translucent to guarantee success. In this case cover the bait's wet surface with Fluro Powder first, then wet it again and roll it into the flavoured Powder Dip. Both the flavoured part, by soaking off the bait, and the Powder Dip's vivid colour on the bait will attract the fish.

*Attention: It is not recommended using them in the reverse order, because the Fluro Powder will soak off of the bait's surface together with the Powder Dip.*

**Pack:** 175 g

**Flavours:** Garlic, M1, N-Butyric

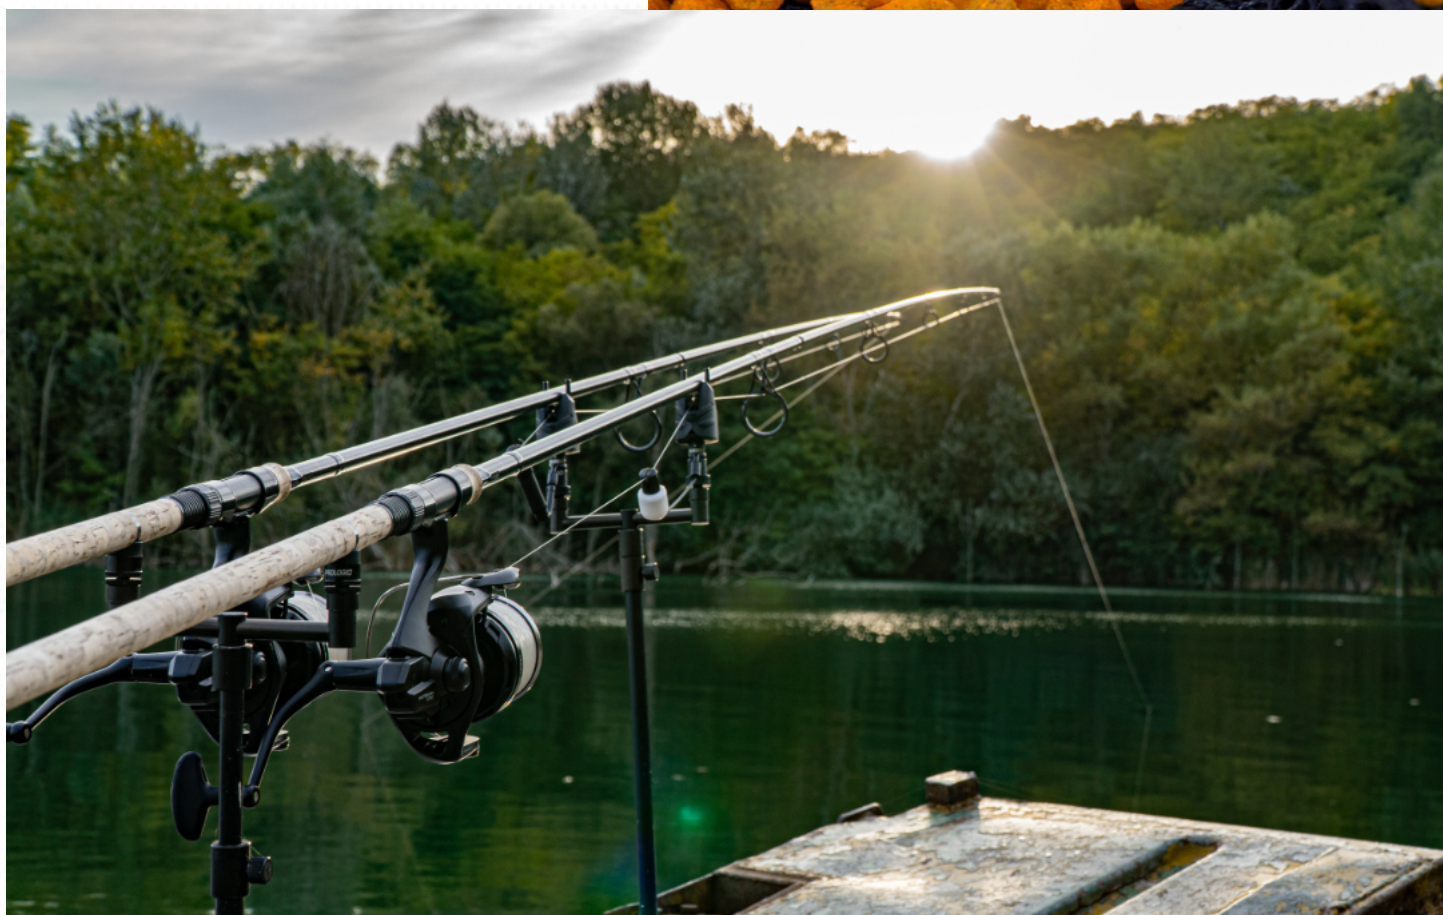

## 3 IN ONE TURBO BAIT DIP 80 ML

The name of this product reveals the three functions it offers to anglers. The most well known application possibility is to put some dip on the baits. Once coming in contact with water the thick liquid leaks off gradually, creating a strong smelling haze. The dip dissolves within 30 to 40 minutes and triggers feeding fish to pick up the bait. Its second use is to pour some into a PVA bag. When the bag has dissolved the liquid will form a flavourful cloud in the water. The third possibility is to soak a few hook baits in the dip, which will harden them beyond belief. The longer boilies are soaked in the dip the harder and more aromatic the hook baits will become. SBS 3 in 1 Turbo Bait is one of the most popular and widely used products, it can be used very effectively with different fishing techniques like match, feeder, pole fishing and big fish hunting. Even live bait and corn can be flavoured with this product. It is available in the flavour range of the Eurostar boilies and it is a PVA friendly product.

**Pack:** 80 ml

**Flavours:** Belachan, Cranberry, Cranberry & Black Caviar, Frankfurter Sausage, Garlic, Green Crab, Pineapple, Shellfish Concentrate, Squid & Octopus, Squid Octopus & Strawberry Jam, Strawberry Jam, Sweet Plum, Tutti Frutti

## SOLUBLE PREMIUM BOMB PASTE

The new Soluble Premium Range released in 2010 also includes a paste which can be wrapped around the lead. The Bomb Paste is available in the flavour range of the Premium series and it is of the same consistency as the Soluble Premium Paste. It can be offered wrapped around the lead or on the method feeder. You can create a very effective flavour and aroma rich haze around the hook bait to attract Carp. Fantastic results can be achieved with this soluble paste in waters with above average Carp stock. It also works well when everything else fails as its composition is nearly equal to that of the Premium Boilies, making it irresistible even to fish with no appetite.

**Pack:** 1 kg

**Flavours:** Ace Lobworm, Bio Big Fish, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Phaze1, Tuna & Black Pepper

## SOLUBLE PREMIUM BOMB PASTE 300 GR

Soluble Premium Pastes in small, 300 g package for reasonable price! It can be offered wrapped around the lead or on the method feeder. You can create a very effective flavour and aroma rich haze around the hook bait to attract Carp. Fantastic results can be achieved with this soluble paste in waters with above average Carp stock. It also works well when everything else fails as its composition is nearly equal to that of the Premium Boilies, making it irresistible even to fish with no appetite.

**Pack:** 300 g

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Phaze1, Tuna & Black Pepper

## PASTES

## SOLUBLE EUROSTAR BOMB PASTE

Would you like to try an effective product for a reasonable price? The Eurostar Bomb Paste is available in the favourite flavour range of the Eurostar series. The paste can be wrapped around the lead or on the method feeder and because of the great price of the 300 gr package, you can take 4-5 flavours with you to the lake-side. Let's try something new and be versatile with the new Eurostar Bomb Pastes.

**Pack:** 300 g

**Flavours:** Belachan, Frankfurter Sausage, Garlic, Krill & Chili, Pineapple, Squid & Octopus, Strawberry Jam, Tuna & Pineapple

## PREMIUM PELLETS

Premium Pellets are the highest quality pellets of the SBS range. Similar to other product categories the name Premium means a guarantee of top quality. Premium Pellets are the most complex pellets containing the finest ingredients. When choosing the right flavour it is important to keep in mind the seasonal recommendations indicated on the package and to match it to the flavour of the bait presented on the hair. If these factors are observed and a good feeding strategy is chosen then you will have provided the potential for a memorable fishing session.

**Pack:** 1 kg, 5 kg, 10 kg

**Size:** 6 mm

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Tuna & Black Pepper

## ATTRACT BETAIN CARP PELLETS

These Carp pellets contain betaine, one of the most important and widely used feeding pellets from SBS. Attract Carp Betaine Pellets are available in all different flavours of the Eurostar series. Once immersed in water this pellet immediately begins to release important feed stimulating substances which will arouse the interest of even the most cautious Carp. It becomes very soft within 1 hour and normally wary fish are induced to feed on the irresistible presentation before them. Always select a feeding pellet according to the seasonal recommendations and match it with the flavour of the used bait. This way you will get a successful combination that never fails. This great bait is characterised by moderately slow dissolve time, low oil content and excellent digestibility.

**Pack:** 1 kg, 5 kg, 10 kg

**Size:** 6 mm

**Flavours:** Cranberry & Black Caviar, Fish & Liver, Frankfurter Sausage, Green Crab, Shellfish Concentrate, Squid & Octopus, Squid Octopus & Strawberry Jam, Strawberry Jam, Sweet Plum, Tutti Frutti

## CSL PELLETS

Corn Steep Liquor Pellets based on corn steep liquor are the most popular SBS pellets. Carp anglers have started to realise the importance of this pellet and, as a result, more and more anglers use it when they go fishing. It dissolves in a very short time with particles breaking off instantly, attracting the attention of fish nearby. Following its rapid dissolving action, corn steep liquid leaks out into the water creating an attracting haze, and this will linger on the bottom for hours. Searching Carp will soon create a blizzard of CSL particles as they search the bottom for the tantalising food signals, triggering and stimulating feeding situations. If only CSL pellets are used for feeding then the only food source to be found will be the hook bait. The versatility of the CSL pellet can be demonstrated by its effectiveness when used in PVA bags or mesh. Made into balls with a method mix it becomes an excellent feeding material which can be catapulted to the feeding spot. All the above features make it the most popular pellet of the SBS Pellet range.

**Pack:** 1 kg, 5 kg, 10 kg

**Size:** 3 mm, 6 mm

## CORN PELLETS

This is a true maize tasting pellet with ingredients mainly matching that of the Attract Carp Betaine Pellets. Its maize flavour makes it an excellent all year round bait and due to its high digestibility Carp keep coming back to feed on it. Its small size makes it a favourite among match, feeder and pole anglers mixed in feeding baits and in method mixes. Corn pellets are moderately durable and easily digestible, Carp love to feed on this bait all year round due to its low oil content and high attraction features.

**Pack:** 1 kg

**Size:** 3 mm

**Flavours:** Corn

## HIGH OIL HALIBUT PELLETS

The powerful attraction of Halibut Pellets is well known among anglers. For this reason alone, it could not be left out from our range of high quality SBS products. It is the ideal feeding pellet during the summer due to its durability and high fishmeal content. Easily digestible ingredients go hand in hand with quality oils, enhancing fast metabolism and stimulating fish to go for more. Different grain sizes help in selecting the targeted fish and mixed with other pellets it makes an excellent pellet mix, which thanks to the different break down and particle release periods of the various pellets keep fish coming to feed on it. SBS High Oil Halibut Pellet is a durable and highly digestible pellet with high oil content.

**Pack:** 1 kg

**Size:** 4 mm, 6 mm, 8 mm

**Flavours:** Fish

## PRE-DRILLED HALIBUT PELLETS

It has exactly the same ingredients as the smaller sized Halibut Pellets the only difference being that it is available in 12, 16 and 20mm sizes. The different sizes are packaged pre-drilled thus, as well as using them for feeding they can be presented on hair rigs. High Oil Halibut Pellets are the ideal baits for big fish hunting in the summer. It is sometimes the only effective bait on heavily fished waters or during periods of low catch rates. The best SBS summer pellet for big fish is characterised by high oil content, excellent durability and high digestibility.

**Pack:** 1 kg

**Size:** 14 mm, 20 mm

**Flavours:** Fish

## MULTIMIX PROACTIVE PELLETS

This product was launched with new ingredients in 2011. Multimix Proactive Pellet is a mix of 6 different pellets with varied oil content. Breakdown and release time of the mix ranges from 10 minutes to up to 4 hours keeping Carp on the feed for an extended period of time. SBS Multimix Proactive Pellet is characterised by mixed break down times, low oil content and good digestibility. This highly effective mix contains the following pellets: CSL Pellets 3 and 5 mm, Halibut Stick Pellets 3 mm, Halibut Pellets 6 mm, Attract Carp Betain Pellets 3mm, Rainbow Pellets 3 mm, M1 Pellets 6 mm.

**Pack:** 1 kg, 5 kg

**Size:** 3-6 mm

**Flavours:** Mixed

## MICROMATCH BETAIN PELLET

This product contains extraordinarily small-sized 1.5mm diameter pellets. Primarily intended for match, feeder and pole anglers, it is an ideal addition to mix with other pellet to promote a very rapid response. Due to its low oil content anglers can achieve considerable success with this product even in winter. As the name implies it contains betaine, one of the most effective feed stimulants. This product is characterised by a low oil content, fast dissolve time and good digestibility. Made into balls with an SBS method mix of the same flavour it becomes an excellent feeding material which can be catapulted to the feeding spot or used in a method feeder. Available in three highly popular flavours.

**Pack:** 1 kg

**Size:** 1,5 mm

**Flavours:** Fishmeal, Scopex, Strawberry Jam

## BOMB PELLET MIX

This novel innovation provides the opportunity to create extremely varied feeding from only pellets. The Bomb Pellet Mix is a nourishing pellet mix with high protein content and owing to its particle sizes it is particularly suitable for targeting big Carp. If you are not allowed to use a boat, you may often have a problem to get the feeding baits out to the desired feeding area. This product is a perfect solution for such situations. Take the pellet glue from the bucket, add it and water to the mix and form balls, you can now catapult the balls to great distances and even more than 100 meters away from your swim. The multiple pellets found in the Mix guarantee that the Carp will be attracted to the feeding spot quickly, and kept them there for a long time. The dissolve time of the pellets covers the widest range, even a single ball may take up 14 hours to dissolve and we guarantee it with the 10 mm to 20 mm grain sizes.

**Pack:** 5 kg

**Size:** 10 mm to 20 mm grain sizes

**Flavours:** Ace Lobworm, Krill & Halibut, M1, M2, M3

## PVA BAG PELLET MIX

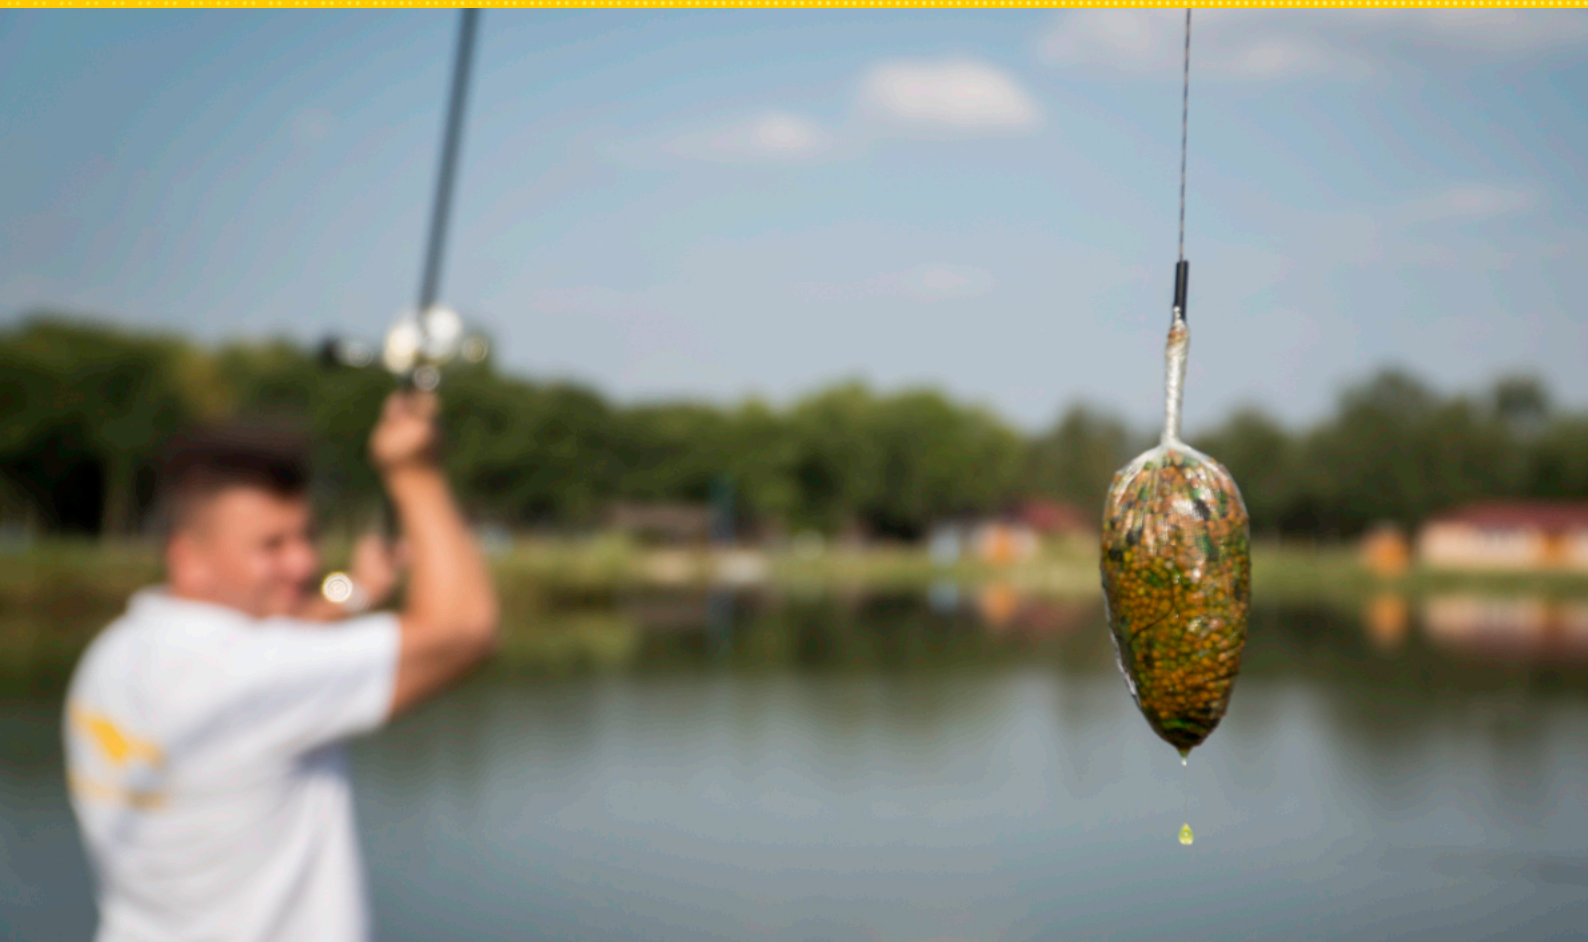

The tactic of creating precise and concentrated areas of bait is one of the key factors to induce carp to pick up our hookbait. By using only a small quantity of the PVA Bag Pellet Mix, we can either use this tactic on its own to create a tiny and effective patch for shy feeding fish, or as a small concentrated area of bait within a larger spread of bait. The PVA Bag Pellet Mix made of small, 2-3 mm pellets, with high protein content. The one, under the name 'Fishmeal' is without any additional flavour, but it can be very attractive for Carp because of the extra fish oil content. Under the name M1, we added the well-known, spicy flavour, and also some original Robin Red, that is why it is a version, that all anglers can use any time of the year without a risk. Scopex and Strawberry PVA Bag Pellet Mixes can be the best choice if we are trying to catch Carp during the cooler months of the year.

**Pack:** 500 g, 1 kg, 5 kg

**Size:** 3 mm

**Flavours:** Fishmeal, Fluro Natural, Garlic, M1, Natural, Pineapple, Scopex, Strawberry Jam

## PREMIUM METHOD MIX

As in each category, Premium means best quality. The main difference between Nitro and the Premium Method Mixes lies in their composition. The Premium Method Mixes are even more complex containing even more additives. Yet, there is something else, Premium Method Mixes break down more slowly once submerged in water thus these ground feeds will keep fish close to the feeding spot for a longer period of time. It is worth mixing it with half or whole boilies and pellets of various dissolve times when catapulted to the feeding spot to get an irresistibly effective feeding material.

**Pack:** 1 kg, 5 kg, 10 kg

**Flavours:** Ace Lobworm, C1, C2, C3, Krill & Halibut, M1, M2, M3, M4, Tuna & Black Pepper

## PREMIUM PVA BAG MIX

The tactic of creating precise and concentrated areas of bait is one of the key factors to induce carp to pick up our hookbait. By using only a small quantity of the SBS Premium PVA Bag Mix, we can either use this tactic on its own to create a small and effective patch for shy feeding fish, or as a small concentrated area of bait within a larger spread of bait. Either way, the extra attractant of the Bag Mix immediately around our hookbait works in the same way. The base of the Bag Mix is the Premium Method Mix plus several types of pellet and other ingredients. The SBS Premium PVA Bag Mix is available in all of the Premium flavours.

**Pack:** 1 kg, 10 kg

**Flavours:** Ace Lobworm, Krill & Halibut, M1, M2, M3, M4

## ALL IN FLUMINO BOX

Would you like to try out a World Record bait? SBS Szi-Ko Team caught 1415,04 kg of carp at the 2nd International Carp Angling Cup in Mór, thanks to this bait combination. The box contains a complete selection and in the package you will be provided with 1 kg Flumino Groundbaits, 500 ml Flumino Groundbaits Mixer liquid, 2 sachets of 10 mm Flumino Pop Up hook bait (not fully identical as the separately available Fluro Pop Up bait, because this is more buoyant), and 2 pieces of 2 ml Concentrated Flavours. It is important to note, that we achieved the outstanding results during the testing period with using all baits in the box at the same time. The other important note from experience is that it is not always easy to find the combination of flavours that work, but after finding it, you can catch fish within an unbelievably short time. The product to use will be determined by the flavour of the 500 ml liquid, there are 2 for cold and 2 for warm water available. The other baits in the pack are steady. Mix 1 kg groundbait in powder form with the 500 ml liquid.

**Pack:** 1.5 kg

**Flavours:** Cranberry, Match Special, N-Butyric, Squid & Octopus, Summer Pineapple

## SOLUBLE ALL IN FLUMINO BOX

The box contains a complete selection and in the package you will be provided with 1 kg Flumino Groundbaits, 500 ml Flumino Groundbaits Mixer liquid, 2 sachets of 16 mm Flumino Pop Up hook bait with extra aromas added. The package is almost the same as the All In Flumino Box, with the difference that it contains soluble hook bait, and that Concentrated Flavours are not available in the package. It is important to note, that we achieved the outstanding results during the testing period with using all baits in the box at the same time. The other important note from experience is that it is not always easy to find the combination of flavours that work, but after finding it, you can catch fish within an unbelievably short time. The product to use will be determined by the flavour of the 500 ml liquid, there are 2 for cold and 2 for warm water available.

**Pack:** 1.5 kg

**Flavours:** Cranberry, Match Special, N-Butyric, Squid & Octopus, Summer Pineapple

## FLUMINO GROUND BAIT

The products of the All In Flumino Box are also available separately for every carp angler. This groundbait contains extremely attractive ingredients, which can achieve fast results. It is the same as the groundbait in the All In Flumino Box. As soon as the groundbait hits the water, it comes off of the feeder or method lead creating a huge cloud within a very short time, stimulating fish to feed. We recommend mixing the feeding material with the Flumino Groundbaits Mixer. Using the liquid with the option of four flavours we can adapt better to the situation confronting us. After that, we can make the feeding material even more attractive with a liquid concentrate. The Flumino Liquid Concentrate, a greenish coloured, and highly fluorescent, high amino-containing additive only requires a few drops on the feeding ball in the feeder or on the PVA. Flumino Groundbait is perfect for grass carp angling... We caught a lot of grass carp with the combination of Flumino Pop Up with pineapple flavour. If you want to achieve really quick results, choose the Flumino products!

**Pack:** 1 kg, 5 kg, 10 kg

**Flavours:** Natural

## ALL IN FLUMINO BOX F-CODE

As a result of the success of the Flumino range and requests from anglers, we have developed a new product. The Groundbait contains high percentage of top quality fishmeal, hence the name F-code. This feature adds a new dimension to the traditional Flumino Groundbait. All In Flumino Box F-code contains a complete selection, 1 kg Flumino Groundbait F-code which contains several kinds of fishmeal, 500 ml Flumino Groundbait Mixer liquid, 2 sachets of 10 mm Flumino Pop Up F-code hook bait (bright orange coloured Cranberry and dark brown coloured Black Squid) and 2 packs of 2 ml Concentrated Flavours. The product to use will be determined by the flavour of the 500 ml liquid, there are two flavours available: Liver or Undercover. The colour of the Groundbait is dark brown. If you do not want to highlight your hookbait from your feeding area, we recommend using the dark coloured Pop Up, but if you would like to emphasize it you can use the bright orange fluoro Pop Up.

**Pack:** 1.5 kg

**Flavours:** Liver, Undercover

## ALL IN FLUMINO BOX Z-CODE

Name Z-code refers to Zig-Rig, which is a method of presenting the bait in the upper water levels. All In Flumino Box Z-code contains a complete selection, 1 kg Flumino Groundbait Z-code, 500 ml Flumino Groundbait Mixer liquid, 2 sachets of 14 mm Flumino Pop Up hook bait (yellow coloured Pineapple and dark brown coloured Black Squid) and 2 packs of 2 ml Concentrated Flavours. The Groundbait Z-code contains special ingredients. Thanks to the bright and fluoro coloured particles and the lifting pellets with high protein content, it works in the whole water column. As soon as the groundbait hits the water, it creates a huge cloud within a very short time, stimulating fish to feed. If you would like to put the Groundbait in the feeder or method lead, mix the 1 kg Groundbait Z-code with 500 ml Groundbait Mixer liquid. If you plan to use a spomb or a spod, we recommend adding 500 ml extra lake water to the mix to get a soft consistency. During the testing period this bait combination performed extremely well. The WCC 2012 winners in Bolsena sponsored by SBS used the Z-code because of the weedy area underwater.

**Pack:** 1.5 kg

**Flavours:** Summer Pineapple, Undercover

## SOLUBLE ALL IN FLUMINO BOX F-CODE

This product is the soluble version of the All in Flumino Box F-code. The Groundbait contains high percentage of top quality fishmeal, hence the name F-code. This feature adds a new dimension to the traditional Flumino Groundbait. The package is almost the same as the All In Flumino Box F-code, the differences being that it contains 16 mm diameter soluble hook bait and Concentrated Flavours are not in the package. The other baits in the pack are the same. The product to use will be determined by the flavour of the 500 ml liquid, there are two flavours available: Liver or Undercover. The colour of the Groundbait is dark brown. If you do not want to highlight your hookbait from your feeding area, we recommend using the dark coloured Pop Up, but if you would like to emphasize it you can use the bright orange fluoro Pop Up. The results of the F-code speaks for itself: in a 48 hours competition Team SBS set a record and caught 410.66 kg of carp, also a remarkable result at the European Cup, the Team had 24 carp over 10 kg to set a new record in the tournament. If you want to achieve really quick results, choose Flumino products!

**Pack:** 1.5 kg

**Flavours:** Liver, Undercover

## SOLUBLE ALL IN FLUMINO BOX Z-CODE

Name Z-code refers to Zig-Rig, which is a method of presenting the bait in the upper water levels. The package is almost the same as the All In Flumino Box Z-code, with the differences being that it contains 16 mm diameter soluble hook bait and Concentrated Flavours are not in the package. The other baits in the pack are the same. The Groundbait Z-code contains special ingredients. Thanks to the bright and fluoro coloured particles and the lifting pellets with high protein content, it works in the whole water column. As soon as the groundbait hits the water, it creates a huge cloud within a very short time, stimulating fish to feed. If you would like to put the Groundbait in the feeder or method lead, let's mix the 1 kg Groundbait Z-code with 500 ml Groundbait Mixer liquid. If you plan to use a spomb or a spod, we recommend adding 500 ml extra lake water to the mix to get a soft consistency. During the testing period this bait combination performed extremely well. The WCC 2012 winners in Bolsena sponsored by SBS used the Z-code because of the weedy area underwater.

**Pack:** 1.5 kg

**Flavours:** Summer Pineapple, Undercover

## FLUMINO GROUNDBAIT Z-CODE

The products of the All In Flumino Box are also available separately. The Groundbait Z-code contains special ingredients. Thanks to the bright and fluoro coloured particles and the lifting pellets with high protein content, it works in the whole water column. As soon as the groundbait hits the water, it creates a huge cloud within a very short time, stimulating fish to feed. We recommend mixing the feeding material with the Flumino Groundbait Mixer. If you would like to put the Groundbait to the feeder or method lead, let's mix the 1 kg Groundbait with 500 ml Groundbait Mixer liquid. If you plan to use a spomb or a spod, we recommend adding 500 ml extra lake water to the mix to get a soft consistency. After that, we can make the feeding material even more attractive with a liquid concentrate. The Flumino Liquid Concentrate, a greenish coloured, and highly fluorescent, high amino-containing additive only requires a few drops on the feeding ball in the feeder or on the PVA. If you want to achieve really quick results, choose the Flumino products!

**Pack:** 1 kg, 5 kg, 10 kg

**Flavours:** Z-Code

## FLUMINO GROUNDBAIT F-CODE

The products of the All In Flumino Box are also available separately. Flumino Groundbait F-code contains high percentage of top quality fishmeal. This groundbait contains high amounts of protein and its colour is dark brown. It is an all-season groundbait, but you can have outstanding results during the summer months. We recommend mixing the feeding material with the Flumino Groundbait Mixer. Using the liquid with the option of different flavours you can adapt better. You can make the feeding material even more attractive with a liquid concentrate. The Flumino Liquid Concentrate, a greenish coloured and highly fluorescent, high amino-containing additive only requires a few drops on the feeding ball in the feeder or on the PVA. If you want to achieve really quick results, choose the Flumino products!

**Pack:** 1 kg, 5 kg, 10 kg

**Flavours:** F-Code

## CARP ATTRACT GROUNDBAIT

A great groundbait, for a great price. This product will be popular among the match, feeder and pole anglers too. This product has the best price in the groundbait range, but still it is high quality. The Carp Attract Groundbait, thanks to the flavours, is a solution for all seasons. Because of the competitive price you can feed bigger quantity, so that is why we are recommending it for slinging, or for bigger waters, and when mixed with the proper materials (which makes it heavier) on bigger rivers too. Although this groundbait contains fewer components than more expensive products, the flavours are the same as the ones used in the more expensive products. Do not hesitate to try the new SBS groundbait that has the most competitive price!

**Pack:** 1 kg

**Flavours:** Franky, Squiddy, Strawberry Jam

## EUROSTAR GROUNDBAIT

A similar groundbait to the Carp Attract Groundbait but contains more components, and it is flavoured with a top category Flavour. Not just the quality of this product is raising attention but also the price. This product can be used successfully in competition. We made it from easily digestible materials so you can keep the fish in your area for a longer period. The flavour choice depends on the season and you can mix two different groundbaits if you like to experiment. You can take the Eurostar Groundbait with you even for a competition, it will cope with any challenge.

**Pack:** 1 kg

**Flavours:** Belachan, Frankfurter Sausage, Garlic, Squid & Octopus, Strawberry Jam

## TEST#1 FEEDER GROUNDBAIT

Are you interested in SBS innovations? There is no doubt that product development by SBS usually takes years until we get the perfect product. Nothing is approved until it meets all of our expectations and performs perfectly. Now, the time has come when we ask anglers out there to participate in the last stage of the product development process. Test #1 Feeder Groundbait has completed all of the development stages up to now, but the last one – testing in practice – is still ahead of us! We ask you to test the new groundbait, with high protein and fishoil content, and share your experiences and ideas with us! By way of a thank you, it is for now, available to you for a special, discounted price!

**Pack:** 800 g

**Flavours:** Natural

## PVA BAG MIX

The tactic of creating precise and concentrated areas of bait is one of the key factors to induce carp to pick up our hookbait. By using only a small quantity of the PVA Bag Mix, we can either use this tactic on its own to create a tiny and effective patch for shy feeding fish, or as a small concentrated area of bait within a larger spread of bait. This fine milled groundbait is suitable with PVA friendly liquid attractants (like Corn Steep Liquor or Premium Spod Juice etc.) to get a Stick Mix with perfect texture, what we can fill into a PVA mesh or bag. The N-Butyric version will work well during the hot months, which contains N-Butyric Acid and also milled and fermented particles. Fish1 has high fishmeal content, and its extra feature, that it includes lifting ingredients, so the whole stick mix will attract fish from the whole water column, from water surface to the bottom. Fish2 can be the rising star of the summertime, because of the high protein and fishoil content!

**Pack:** 800 g

**Flavours:** Fish1, Fish2, N-Butyric

## CATCHER READY-MADE BOILIE MIX

Boilie making could not be made easier. The powder based mix contains aromas, appetite stimulators, sweeteners and the necessary amount of attractants and fish oils. You can make your own, cost effective home-made boilies without the addition of eggs in a very short time. With the help of the plastic measuring container included in the box the exact amount of water can be measured out and added to the mix and subsequently it can be kneaded into a paste. Approximately 1.3 kg of cooked boilies can be made out of the 1kg base mix. You will understand why we say that this product is cost effective when you calculate the price of 1kg ready-made boilies. Just divide the price of the package by 13 and then multiply the answer by 10. This is the price of 1 kg boilies. If you want to prepare a well-proven and effective home-made boilie then give this product a try. You will not be disappointed.

**Pack:** 1 kg, 5 kg, 10 kg

**Flavours:** Frankfurter Sausage, Shellfish Concentrate, Squid & Octopus, Squid Octopus & Strawberry Jam, Strawberry Jam

## SOLUBLE CATCHER READY-MADE BOILIE MIX

Boilie making could not be made easier. The powder based mix contains aromas, appetite stimulators, sweeteners and the necessary amount of attractants and fish oils. You can make your own, cost effective home-made boilies without the addition of eggs in a very short time. All you need to add is water and Gold Treasure Liquid which is included in the package. Once Gold Treasure and water are added to the mix it can be kneaded immediately into a paste and rolled into boilies. These soluble boilies need approximately 8 to 10 days of drying before use. Attention: the ingredients of the soluble version are not identical to that of the cooked version. For this reason the soluble mix should not be used to make cooked boilies even if Gold Treasure Liquid is left out. Approximately 1.3 kg boilies can be made out of the 1 kg base mix. You will understand why we say that this product is cost effective if you calculate the price of 1 kg ready-made boilies. If you want to prepare a well-proven and effective home-made boilie then give this product a try. This recipe does not require cooking.

**Pack:** 1 kg, 5 kg, 10 kg

**Flavours:** Frankfurter Sausage, Shellfish Concentrate, Squid & Octopus, Squid Octopus & Strawberry Jam, Strawberry Jam

## QUEST BASE MIX

These mixes are the premium category base mixes from SBS and the company is rightly proud in terms of their popularity and effectiveness. Quest Base mixes are the most complex products, loaded with top quality ingredients. Based on the excellent results achieved in recent years we can proudly recommend any of the Quest Base Mixes for those who want to make top quality boilies from the best SBS mixes. Any product of the Quest mix range can be made into an uncooked soluble boilie by adding Gold Treasure liquid.

**Pack:** 1 kg, 5 kg, 10 kg

**Flavours:** Ace Lobworm, M1, M2, M3, M4

## QUEST READY-MADE BASE MIX

One of the great new additions SBS launched in 2010 is a product from the best SBS base mix range, it contains all the necessary liquid and powdered ingredients, except eggs to make top quality boilies. The components are packed in transparent plastic foil and are accurately measured to make exactly 1kg of boilies based on a well-proven and effective recipe. You can create a high-quality SBS boilie from the selected base mix by only adding eggs to the mix. This product was launched with the un concealed intention, that anglers who have heard about our products could try out and ascertain the exceptional catching power of Quest Base Mixes on their favourite venues without spending a lot on the purchase of additives. Available in 10 flavours, every package contains a list of ingredients of our best recipes. This is a fantastic new product, give it a try.

**Pack:** 1 kg

**Flavours:** Ace Lobworm, M1, M2, M3, M4

## SOLUBLE QUEST READY-MADE BASE MIX

One of the great new products SBS launched in 2010 is a product from the best SBS base mix range, it contains all the necessary liquid and powdered ingredients, including Gold Treasure Liquid to make top quality soluble boilies. The components are packed in transparent plastic foil and are accurately measured to make exactly 1kg of boilies based on a well-proven and effective recipe. You can create a high-quality soluble boilie from the selected base mix by adding the ingredients provided in the package. This product was launched with the uncoined intention, that anglers who have heard about our products could try out and ascertain the exceptional catching power of Quest Base Mixes on their favourite venues without spending a lot on the purchase of additives. Available in all Premium flavours, every package contains a list of ingredients of our best recipes. This is a fantastic product, give it a try. Preparation of the soluble boilies does not require any cooking.

**Pack:** 1 kg

**Flavours:** Ace Lobworm, M1, M2, M3, M4

## CONCENTRATED FLAVOURS

Highly concentrated aromas in a wide range of flavours. They are oil-based products which work best on waters where the temperature is above 8 °C. The 16 different flavours offer the ability to create custom made baits by slightly changing the proportion of the added flavours and additives. You can create truly unique bait that will make you justly proud of your catch.

**Pack:** 50 ml

**Flavours:** Bananarama, Black Caviar, Cranberry, Fish & Liver, Fresh Pineapple, GLM, Green Crab, Plum & Shellfish, Red Crab, Scopex, Shellfish Concentrate, Strawberry Jam, Sweet Plum, Tutti Frutti, White Chocolate

## PREMIUM FLAVOURS

Premium Flavours are extraordinarily concentrated thus a very small amount like 4ml is enough to add to a 1kg boilie mix. Among the flavours, Premium represents the highest quality. We recommend using these oil-based products on waters where the temperature is above 8 °C. Due to its strong concentration a 50ml bottle is enough to prepare up to 12kg of boilies. Premium flavours render boilie making very cost effective while using the best quality flavours. All SBS flavours are cook proof, meaning that following a 2 minute boiling period the boilies retain most of the flavour and fragrance matter.

**Pack:** 50 ml

**Flavours:** Black Pepper & Plum, Frankfurter Sausage, N-Butyric Crab, N-Butyric Pineapple, Squid & Octopus

## PREMIUM LIQUID ATTRACT

Premium Liquid Attract is a gem among SBS products. This liquid attract is loaded with flavour, vitamins and appetizing food stimulating substances. It is available in all of the flavours within the top quality Premium series. Choose a flavour that matches a selected Quest Base Mix and with this combination you will create a fantastically attractive boilie. This line contains the most popular attractants in Western Europe like Ace Lobworm Liquid Attract, the M1 Liquid Attract and Bio Big Fish which produced fantastic results in 2009. It is very important to observe the seasonal recommendations indicated on the package.

**Pack:** 50 ml

**Flavours:** Ace Lobworm, Bio Big Fish, M1, M2, M3

## EA RANGE FLAVOURS

The Ethyl-alcohol flavours of SBS are real cold water flavourings. These products are most effective in spring and late autumn. Thanks to their ethyl-alcohol content they do not congeal even in waters when the temperature drops below 8 °C ensuring an optimum leak off of flavours. EA Range Flavours are available in the two most popular sweet flavours from the SBS flavour range.

**Pack:** 50 ml

**Flavours:** Cranberry, Strawberry Jam

## PREMIUM FLAVOURS 10 ML

Premium Flavours are extraordinarily concentrated thus a very small amount like 4ml is enough to add to a 1kg boilie mix. Among the flavours, Premium represents the highest quality. We recommend using these oil-based products on waters where the temperature is above 8 °C. Premium flavours render boilie making very cost effective while using the best quality flavours. All SBS flavours are cook proof, meaning that following a 2 minute boiling period the boilies retain most of the flavour and fragrance matter.

**Pack:** 10 ml

**Flavours:** Black Pepper & Plum, Frankfurter Sausage, N-Butyric Crab, N-Butyric Pineapple, Squid & Octopus

## CONCENTRATED FLAVOURS 10 ML

Highly concentrated aromas in a wide range of flavours. They are oil-based products which work best on waters where the temperature is above 8 °C. The wide variety of flavours offer the ability to create custom made baits by slightly changing the proportion of the added flavours and additives. You can create truly unique bait that will make you justly proud of your catch.

**Pack:** 10 ml

**Flavours:** Bananarama, Black Caviar, Cranberry, Fish & Liver, Fresh Pineapple, GLM, Green Crab, Plum & Shellfish, Scopex, Shellfish Concentrate, Strawberry Jam, Sweet Plum, Tutti Frutti, White Chocolate

## BODYGUARD COATED HOOKLINK

SBS Bodyguard coated hooklink gives you the chance to create wide variety rigs and bait combinations. The silky coating has been developed to prevent the hooklink twisting around the main line during long casts. The coating can be also stripped off easily and the hooklink sinks and lays on the lakebed easily.

**Pack:** 1 pc

**Color:** brown, olive

**Length:** 10 m

**Breaking strain:** 15 lb, 25 lb

## CHALLENGER HOOKLINK

SBS Tackle Pro has created the SBS Challenger supersoft hooklink you can use to enhance the natural behaviour and movement of your hookbait. It is easy to tie and with the colouration of its material it is almost invisible in the water. A flossy and soft hooklink with high durability and unique sinking features, it sinks and lays flat on the lakebed easily without any additional weight but it lifts readily with the bait and the hook into the fish's mouth.

**Pack:** 1 pc

**Color:** camouflage

**Length:** 10 m

**Breaking strain:** 15 lb, 25 lb

## DISCOVERY HOOKLINK

SBS Discovery supersoft, a round profile hooklink made of Dyneema which has a unique sinking feature that gives you the chance to create wide variety rigs and bait combinations. This easy-to-tie hooklink is almost invisible on the bottom, so even cautious carp will suck up your bait easily.

**Pack:** 1 pc

**Color:** brown

**Length:** 10 m

**Breaking strain:** 15 lb, 25 lb

## DIVE MASTER LEADCOREFREE LEADER

SBS have put on the market an ultra sinking special thin leader, without a leadcore! The alternating tones of colour provide superb camouflage and its sinking feature matches that of ordinary leadcores. It follows the ground easily which helps with a perfect rig presentation under the water and is safe to use on any kind of lakebed even in extreme conditions. Thanks to the extraordinary manufacturing process we can be sure that this leader protects the fish during a play, even if it hitches onto the fin during a landing. Easy to make and extremely abrasion-resistant.

**Pack:** 1 pc

**Color:** dark brown-silt-gravel

**Length:** 10 m

**Breaking strain:** 20 lb, 45 lb

## GRAVITY LEADCORE

SBS Gravity Leadcore is a newly developed product tested by SBS consultants and official Team members. Thanks to the special coated material it can be used on any kind of lakebed and because of the colouration it is almost invisible on the lakebed. It has a custom prepared lead wire inside, therefore its sinking capability is supreme and it pins down the rig easily on the lakebed. The extraordinary textile coating always protects the fish during a play, even if it hitches onto a fin during the landing. Easy to make and extremely abrasion-resistant.

**Pack:** 1 pc

**Color:** silt

**Length:** 7 m

**Breaking strain:** 45 lb

## MASTERPIECE MONOFIL MAINLINE

Thanks to the brand new manufacturing technology, SBS Tackle Pro Masterpiece mono mainlines are formulated with co-polymer materials. It has unbelievable knot strength quality, low memory, consistently strong and reliable with high tensile strength. The innovative, special outer layer protects the line from UV radiation and it also has great features for long casts.

**Pack:** 1 pc

**Size:** 0.20 mm, 0.24 mm, 0.27 mm, 0.30 mm, 0.35 mm, 0.40 mm

**Color:** black, fluoro yellow

**Length:** 1500 m, 1750 m, 1525 m, 1240 m, 920 m, 670 m

**Breaking strain:** 3.5 kg, 4.5 kg, 6 kg, 7 kg, 9 kg, 11.4 kg

## MASTERPIECE TAPERED MONO LEADER

5 pieces of 15 meter mono leader lines per pack for long casts, tapering from 0.58 mm to 0.26 mm. Made of high quality copolymer with low memory. Elastic, sinking, well lays at the bottom. Better casting results with this products, without complicated leader knots.

**Pack:** 1 package (5 pieces of 15 meter mono leaders per pack)

**Size:** 0.26-0.58 mm

**Color:** waterclear

**Length:** 15 m

**Breaking strain:** 4-16 kg

## COMPETITION MONOFIL MAINLINE

SBS Competition main lines have been developed and tested by SBS Team members at carp angling competitions for two years. The main goal was to create a smooth and high abrasion-resistant line, which helps to reach long casts, and is also able to retain all of its amazing attributes after 40-50 casts a day. The fluoro-yellow colour is a great choice during the night hours, because with the light of a head lamp you can see the line easily.

**Pack:** 1 pc

**Size:** 0.22 mm, 0.24 mm, 0.30 mm

**Color:** fluoro yellow

**Length:** 1000 m

**Breaking strain:** 4.2 kg, 5 kg, 8.2 kg

## ANTI-TANGLE SLEEVES

SBS Tackle Pro Anti Tangle Sleeves have been designed to fit swivel eyes, reduce tangles and pushing the hooklink away from the lead when casting.

**Pack:** 1 package

**Color:** green

**Quantity:** 15 pc/package

## BIG EYE SWIVEL

Size 8, strong swivel, one eye is significantly bigger which gives extra movement to the rig, best for use with a helicopter or chod rig.

**Pack:** 1 package

**Size:** 8

**Color:** black

**Quantity:** 10 pc/package

## BUFFER HOOD

The SBS Tackle Pro Buffer Hood is a rubber sleeve, made from top quality material. The partly stiff and subtle rubber accessory can be set up quickly and holds safely. Thanks to the special material it does not become inflexible even in cold water. Due to the universal design it fits perfectly. It can be used with some inline leads too.

**Pack:** 1 package

**Color:** green

**Quantity:** 4 pc/package

## HELI-CHOD SWIVEL

The size 8 swivel of the SBS Tackle Pro Heli-Chod Swivel (Helicopter and Chod speed swivel) allows us to change the rig quickly to adapt to changing conditions. It comes with a big eye. We recommend mainly using this swivel with helicopter or chod rigs. The usage of an anti-tangle sleeve is always recommended with this swivel because the rubber ensures that the end loop of the rig does not slide out of the swivel. It fits perfectly with safety lead systems. Because of the standard 8 size it fits products from other manufacturers (leads, rig accessories, etc.).

**Pack:** 1 package

**Size:** 8

**Color:** black

**Quantity:** 10 pc/package

## LINE ALIGNERS SHORT

It is very easy to use the SBS Tackle Pro Line Aligners. It just has to be threaded onto the shank of the hook through the hook length material. Steam is not necessary here, because it is not like the shrink tube. The SBS Tackle Pro Line Aligners helps to set the perfect angle of the hook on the rig, ensuring a strong hook hold.

**Pack:** 1 package

**Color:** green

**Quantity:** 7 pc/package

## LINE ALIGNERS LONG

It is very easy to use the SBS Tackle Pro Line Aligners. It just has to be threaded onto the shank of the hook through the hook length material. Steam is not necessary here, because it is not like the shrink tube. The SBS Tackle Pro Line Aligners helps to set the perfect angle of the hook on the rig, ensuring a strong hook hold.

**Pack:** 1 package

**Color:** green

**Quantity:** 7 pc/package

## QUICK CHANGE SWIVEL

The SBS Tackle Pro Quick Change Swivel is a quick-link with an integrated swivel designed for speedy rig changes. The swivel has one normal and one open-hook shaped eye. A loop formed in the end of the rig material is fixed into position on the open eye by the anti tangle sleeves.

**Pack:** 1 package

**Size:** 8

**Color:** black

**Quantity:** 10 pc/package

## QUICK LINK

The SBS Tackle Pro Quick Link is a very strong link which has a multitude of uses. It allows the easy attachment of the lead to the line but it can also be used on the rig. It also allows the quick change of the lead or the rig.

**Pack:** 1 package

**Color:** black

**Quantity:** 10 pc/package

## RIG RING

These rig rings are made with a thin Teflon coating which provides free movement to the ring which is in turn transferred to the bait.

**Pack:** 1 package

**Size:** 3 mm, 3.7 mm

**Color:** black

**Quantity:** 10 pc/package

## RING SWIVEL

The SBS Tackle Pro Ring Swivel is a normal swivel with an extra, integrated and free moving ring. The extra ring creates a hinge, which allows free movement of stiff rigs. This makes bait presentation more efficient and natural.

**Pack:** 1 package

**Size:** 8

**Color:** black

**Quantity:** 10 pc/package

## ROLLING SWIVEL

One of the most important elements of the business end is the rolling swivel - that is why it must be reliable. The SBS Tackle Pro Rolling Swivel is available in one size only, designed to fit all SBS systems and accessories. Most of the rigs contain at least one of these swivels. The eye of the swivel is circular, the body barrel-shaped and it comes in black.

**Pack:** 1 package

**Size:** 8

**Color:** black

**Quantity:** 10 pc/package

## RUBBER BEAD

The package contains 10 hollow rubber beads which can be used in many different ways. During casting there is a lot of strain on the swivel, but you can reduce this by using SBS Tackle Pro rubber beads. Furthermore SBS Tackle Pro rubber beads are very efficient because they have a tapered bore and as a result they can be attached to anti-tangle tubes too.

**Pack:** 1 package

**Size:** 6 mm

**Color:** green

**Quantity:** 10 pc/package

## SAFETY CLIP KIT

With the SBS Tackle Pro Safety Lead Clip it is easy to set up safe lead clip systems. If the lead becomes snagged, the clip will then release it so that you can continue playing the fish. If there is a line cut, fish will not then be left carrying the lead. Changing of the lead is fast and easy!

**Pack:** 1 package

**Color:** green

**Quantity:** 6 pc/package

## SBS BRAID SCISSORS

Sharp and strong, corrosion resistant stainless steel SBS Braid Scissors are designed for cutting with a single cut, braided, mono, fluorocarbon lines or heavier leaders with its serrated cutting edge. Soft, yellow grips give a comfortable, secure hold and they are easy to use for both right and left handed anglers.

**Pack:** 1 pc

## PVA MESH SYSTEM

On numerous occasions, concentrated feeding has proven to be extremely important. This effect can be created very precisely with micro-woven PVA mesh (Polyvinyl alcohol: water-soluble synthetic polymer) when filled with boilies, pellets, or stick-mix and attached to the hook. The SBS PVA dissolves well, even in cold water and it has no tincture that could make our hookbait less effective.

*The PVA set is 5 m long and contains 25 mm diameter PVA mesh, a container, a plunger and a waterproof case.*

**Pack:** 1 pc

## PVA MESH REFILL SPOOL

PVA mesh to match the PVA Mesh Set can be purchased separately too. PVA is a crucial tool for all modern carp anglers, and most definitely when we want to create concentrated feeding around our hookbait.

*The refill is 5 m long and it is 25 mm diameter.*

**Pack:** 1 pc

## KNOT PROTECTOR BEAD

The package contains 10 hollow rubber knot protector beads which can be used in many different ways. During casting there is a lot of strain on the swivel, but you can reduce this by using SBS Tackle Pro rubber knot protector beads.

**Pack:** 1 package

**Size:** 8

**Color:** green

**Quantity:** 10 pc/package

## PVA BAGS

Perforated PVA bags, ideal all year round, for distance casting and for all types of 'PVA Bagging'. Recommended for use with SBS PVA Bag Pellet Mixes, Groundbaits, and to boost contents with PVA friendly Premium PVA Liquids. Dimension: 60 mm x 120 mm, 30 units.

**Pack:** 1 package

## PVA BAG LEAD

Lead shape and its design is a crucial if we choose to fish with solid PVA bags. SBS developed the perfect lead system setup for this method by incorporating a plastic tube to which the PVA bag can be twisted around. The lead is the optimum shape to reach the longest casts. Available in 70 and 90 gr and in green or brown, camouflage colors.

**Pack:** 50 g, 70 g, 90 g

**Color:** brown, green

## PVA BAG LEAD TUBE

Have you ever broken the plastic tube of your PVA Bag Lead? Annoying, isn't it? Now, here they are, 10 pieces of spare Lead Tubes to replace the broken ones.

**Pack:** 1 pc

**Color:** black

**Quantity:** 10 pc/package

## ENFORCER HOOKS

The SBS Tackle Pro Enforcer hook is a reliable hook for the tough venues with snags. The anti-eject shape makes this hook perfect for all situations where fast hooking and tough play of the fish is necessary. The SBS HT Hook comes in grey (non-reflecting in water) color.

**Pack:** 1 package

**Size:** 4, 6

**Quantity:** 10 pc/package

## ENIGMA HOOKS

The Enigma hooks from SBS Tackle Pro are designed to be used when fishing near snags. This extra strong hook is not going to let you down even in the most difficult situations.

**Pack:** 1 package

**Size:** 4, 6

**Quantity:** 10 pc/package

## GRIP-TIP HOOKS

The SBS Tackle Pro Grip-Tip hook comes with a classic form and thin material. But this should not deceive anybody. The claw shape gives a strong hook hold. It comes in dark grey color with a non-reflective coating.

**Pack:** 1 package

**Size:** 2, 4, 6, 8

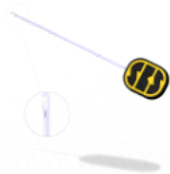

**Quantity:** 10 pc/package

## LEADCORE SPLICING NEEDLE

This is a thin needle for splicing leadcore. It can be used also as a baiting needle for small and soft baits. The yellow-black coloured handle with SBS logo is comfortable, non-slip and if dropped on the bankside it can be easily found.

**Pack:** 1 pc

### **PVA STICK NEEDLE**

This is a baiting needle, made of durable material. With this needle it is easy to thread multiple baits at the same time, like boilies or pellets even onto PVA tape. With the help of this tool you can dip the bait even in bigger bottles.

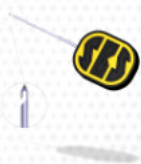

**Pack:** 1 pc

### **FINE BAITING NEEDLE**

Fine Baiting Needle is specifically for small hookbaits. The thin stainless steel needle with a sharp pointed tip easily goes through tiny baits. The yellow-black coloured handle with SBS logo is comfortable, non-slip, it can be easily found if dropped on the bankside.

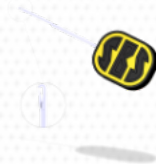

**Pack:** 1 pc

### **HEAVY BAITING NEEDLE**

Heavy Baiting Needle is ideal for use with hard boilies or particles such as tiger nuts. The thick and strong stainless steel needle with a sharp pointed tip easily goes through hard hookbaits. The yellow-black coloured handle with SBS logo is comfortable, non-slip, it can be easily found if dropped on the bankside.

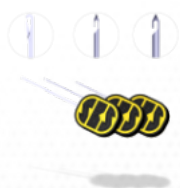

**Pack:** 1 pc

### **BOILIE NEEDLE**

The ergonomic handle of this baiting needle provides a good grip to enable easy threading of bait onto the hair. At the end of the needle there is a safety clip.

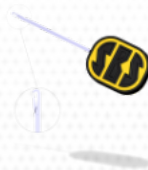

**Pack:** 1 pc

## BAITING NEEDLE SET

A triple needle set that includes a Boilie Needle, a Fine Baiting Needle and a Heavy Baiting Needle to cover all baiting options. The yellow-black coloured handle with SBS logo is comfortable, non-slip, it can be easily found if dropped on the bankside.

**Pack:** 1 package

## 20+ BOILIE NEEDLE

This baiting needle, complete with a safety clip, is made of durable material and designed for harder baits such as 20+ Premium boilies. The yellow-black coloured handle with SBS logo is comfortable, non-slip and if dropped on the bankside it can be easily found.

**Pack:** 1 pc

## **T-SHIRT (WHITE)**

Top quality T-shirt with SBS logo on the front and a Real Big Catch logo and writing on the back.

**Size:** L, M, S, XL, XXL, XXXL

**Color:** white

## **T-SHIRT (BLACK)**

Top quality T-shirt with SBS logo on the front and a Real Big Catch logo and writing on the back.

**Size:** 4XL, L, M, S, XL, XXL, XXXL

**Color:** black

## **POLO SHIRT (BLACK)**

Top quality polo shirt with SBS logo on the front and a Real Big Catch logo and writing on the back.

**Size:** L, M, S, XL, XXL, XXXL

**Color:** black

## **SBS LOGO BASEBALL CAP**

Top quality SBS baseball cap, with embroidered SBS logo.

**Size:**

**Color:** black

## POLO SHIRT (WHITE)

Top quality polo shirt with SBS logo on the front and a Real Big Catch logo and writing on the back.

**Size:** L, M, S, XL, XXL

**Color:** white

## WATERPROOF BASEBALL CAP

Waterproof and breathable unisex SBS baseball cap with SBS logo embroidered on the front and a Real Big Catch logo embroidered on the left side. Adjustable to fit most sizes comfortably.

**Color:** black

## ZIPPED HOODIE

Top quality zippered hoodie with side pocket. With SBS logo and white-yellow stripe on the front and a Real Big Catch logo and writing on the back. Material: 70% cotton, 30% polyester. Color: Black. Wash it at 30 °C.

**Size:** L, M, S, XL, XXL, XXXL

**Color:** black

## SOFTSHELL ZIPPED HOODIE

Softshell zippered hoodie with SBS logo on the front, designed to repel wind and rain while offering full mobility for your fishing adventures. Material: breathable softshell. Colour: Black. Wash it at 30 °C.

**Size:** L, M, S, XL, XXL, XXXL

**Color:** black

## SOFTSHELL TROUSERS

Softshell trousers designed to repel wind and rain while offering full mobility for your fishing adventures. With SBS logo on the front. Material: breathable softshell. Colour: Black. Wash it at 30 °C.

**Size:** L, M, S, XL, XXL

**Color:** black

## FEMALE T-SHIRT

Top quality female T-shirt with SBS logo on the front and a Real Big Catch logo and writing on the back.

**Size:** L, M, S, XL

**Color:** black

## T-SHIRT FOR KIDS

Top quality T-shirt for kids with SBS logo on the front and a Real Big Catch logo and writing on the back.

**Size:** L, M, S, XL, XXL

**Color:** black

## ZIP OFF TROUSERS

The convertible zip off feature allows you to keep you cool when it gets hot. Perfect for all your outdoor adventure needs.

**Size:** L, M, S, XL, XXL

**Color:** black

## BEANIE

The SBS beanie hat in black and yellow is a great winter hat for the year. The hat is a dual layered beanie made of 100% acrylic. An SBS logo is embroidered on the body. This would be a great addition to any winter fishing session!

**Color:** black

## FLEXFIT BASEBALL CAP

SBS Flexfit Cotton Cap (98% cotton, 2% elastane) is constructed with a specialized spandex material, weaved throughout the sweatband and crown of the hat for genuine Flexfit comfort. (Flexfit ® technology with elasticated band for added comfort and support.) The Hat Pros 6-panel, mid profile cap is made with six pieces of fabric bringing back the look of the 1950s pro-ball caps. Color of the cap is black, the original SBS flock logo is white.

Sizes: S/M (6 3/4" - 7 1/4", 54-58 cm), L/XL (7 1/8" - 7 5/8", 57-61 cm).

**Size:** L/XL, S/M

**Color:** black

## T-SHIRT LIMITED EDITION

Top quality, limited edition, black SBS T-shirt with white SBS logo and domain ([www.sbsbaits.com](http://www.sbsbaits.com)) on the front and a white Real Big Catch logo and writing on the back.

**Size:** L, M, S, XL, XXL, XXXL

**Color:** black

## ZIPPED HOODIE FOR KIDS

Top quality zipped hoodie for kids with side pocket. With SBS logo and white-yellow stripe on the front and a Real Big Catch logo and writing on the back. Material: 70% cotton, 30% polyester. Color: Black. Wash it at 30 °C.

**Size:** 128-134, 146-152, 158, 164-170

**Color:** black

## COMPETITION T-SHIRT

Our lightweight custom designed men's SBS competition jersey (140 g/m<sup>2</sup>), crafted from breathable fabrics for your hottest, hardest days at the lakeside. Material: 100% polyester. Wash it at max. 40 °C inside out, do not iron!

**Size:** XS, S, M, L, XL, XXL, XXXL

**Color:** black

## COMPETITION SHORTS

Our lightweight custom designed men's SBS competition shorts (140 g/m<sup>2</sup>), crafted from breathable fabrics for your hottest, hardest days at the lakeside. Material: 100% polyester. Wash it at max. 40 °C inside out, do not iron!

**Size:** XS, S, M, L, XL, XXL, XXXL

**Color:** black

## FAN FLAG

SBS fan flag with official SBS design printed on the front.  
Size: 100 x 75 cm

**Size:** 100 x 75 cm

## MUG

SBS branded mugs display our recognisable logo and website address on both sides. Ideal for tea, coffee or soup either at home or at the lakeside.

*Important note: we do not recommend the use of the product in a dishwasher.*

## BUCKET

A strong, securely sealed black plastic bucket with strong handles and a printed SBS logo that helps to keep 5 or 10 kg of your bait in prime condition.

**Size:** 5 kg, 10 kg

## THERMO MUG

Be in style when you're fishing with our thermo mug. It has a removable plastic top and looks good with an official SBS logo. Hand wash only.

**Capacity:** 330 ml
